**Report on Modern Trends in Steam Generator design for Coal Fired Boilers**

**(31.08.2018)**

In K.S.R.College of Engineering, department of electrical and electronics engineering conducted one day workshop on Modern Trends in Steam Generator design for Coal Fired Boilers. This programme was presided over by our vice chairman Thiru.R.srinivasan, our principal Dr.P.Senthilkumar, through offline mode.

Workshop on Modern Trends in Steam Generator design for Coal Fired Boilers was organized by department of Electrical and Electronics Engineering hands on with Mr C.Kathirvelu, AGM-BHEL, Tiruchy was the resource person of this programme.

Steam generation for electricity production can also be achieved via the utilization of solar energy. However, since sunlight is a diffuse energy source, it cannot achieve high enough temperatures on its own to power heat engines for electricity production but rather must be concentrated.
