

## **Indian Concrete Institute (Life Member)**

Our department is proud to announce that we offer lifetime membership in the ICI Student Chapter. This membership provides students and alumni with ongoing access to a wealth of professional resources, networking opportunities, and career development tools. As lifetime members, individuals will be able to connect with a global network of civil engineering professionals, participate in industry events and conferences, and gain access to technical resources, research, and industry standards. Additionally, lifetime members benefit from continuous career support, including job boards, certifications, and professional development programs. This is an excellent opportunity for students to enhance their credentials, stay engaged with the profession, and further their career prospects long after graduation.
