**Cyber Tech Innovation (CyTI) Centre**

A CyTI centre is a dedicated environment where students and professionals can gain hands-on experience in defending networks, systems, and applications from cyber-attacks. CoE labs provide practical experience, allowing students to apply theoretical knowledge in real-world scenarios. Enhances skills in areas such as Social Network Security, Ethical Hacking, Penetration Testing, and Digital Forensics. Simulates cyber-attacks and defence strategies to help students understand how to detect, prevent, and respond to threats. It offers a controlled environment where students can experiment without risking actual systems.
