

Centre for Indian Knowledge Systems (IKS)

The Centre for Indian Knowledge Systems (CIKS) at K.S.R. College of Engineering was established on 5th September 2024 with the vision of promoting and preserving India's rich intellectual heritage. The Centre aims to integrate traditional Indian knowledge systems with modern scientific and technological advancements, creating a platform for research, learning, and innovation that draws upon the wisdom of India's diverse cultural, philosophical, and scientific traditions.

Vision

To become a leading hub for the study, preservation, and promotion of India's rich and diverse traditional knowledge systems. We aim to bridge the gap between ancient wisdom and modern technological advancements, fostering interdisciplinary research and innovation that contributes to sustainable solutions, social well-being, and global recognition of India's intellectual heritage.

Mission

1. To integrate traditional Indian knowledge with contemporary academic frameworks, facilitating a holistic and interdisciplinary approach to education.
2. To organize workshops, seminars, and conferences that encourage intellectual discourse and cross-cultural exchanges on the relevance of Indian knowledge systems in the modern world.
3. To collaborate with educational institutions, research centers, and industry partners to develop innovative solutions for global challenges through the lens of Indian knowledge traditions.
4. To create awareness and foster pride in the rich heritage of India's knowledge systems among students, faculty, and the broader community, ensuring their continued relevance and application in today's rapidly evolving world.
