ENERGY CONSERVATION

SENSOR ASSISTED STREET LAMP

USE OF LED BULBS AND STAR RATED ELECTRICAL APPLIANCES

GREEN CAMPUS is nothing but environmental friendly practices and education combined to promote sustainable and ecofriendly practices along with user-friendly technology in the campus. It creates environmental culture, develops sustainable solutions to environmental problems and provides solutions to various social and economic needs. It provides the concept of green building and oxygenated building which in turn useful to provide a healthy atmosphere.

Energy and Environment Audit Activity at the K.S.R College of Engineering by the NSF Audit Team

In K.S.R.College of Engineering, actively involve the energy conservation day on 14th December, to promote the efficient use of energy resources and the conservation of energy.

“Save Energy, Save Money, Save Nation, Save the planet”

“Reduce, Reuse and Recycle”.

More the energy is conserved more are the chances of saving the planet. Rock your world by saving energy.

Energy conservation helps slow down global warming. As greenhouse gases fill up our planet, the average global temperature slowly rises, causing the adverse changes we see in the environment. By helping to reduce emissions through energy conservation, we make a difference for our planet and future generations.
