K.S.R. COLLEGE OF ENGINEERING: TIRUCHENGODE - 637 215 (Autonomous)

DEPARTMENT OF COMPUTER SCIENCE AND ENIGNEERING

(REGULATIONS 2020)

Vision of the Institution

IV We envision to achieve status as an excellent Educational Institution in the global knowledge hub, making self-learners, experts, ethical and responsible engineers, technologists, scientists, managers, administrators and entrepreneurs who will significantly contribute to research and environment friendly sustainable growth of the nation and the world.

Mission of the Institution

- IM 1 To inculcate in the students self-learning abilities that enable them to become competitive and considerate engineers, technologists, scientists, managers, administrators and entrepreneurs by diligently imparting the best of education, nurturing environmental and social needs.
- **IM 2** To foster and maintain mutually beneficial partnership with global industries and Institutions through knowledge sharing, collaborative research and innovation.

Vision of the Department / Programme: (Computer Science and Engineering)

DV To create ever green professionals for software industry, academicians for knowledge cultivation and researchers for contemporary society modernization.

Mission of the Department / Programme: (Computer Science and Engineering)

- **DM 1** To produce proficient design, code and system engineers for software development.
- **DM 2** To keep updated contemporary technology and fore coming challenges for welfare of the society.

Programme Educational Objectives (PEOs): (Computer Science and Engineering)

The graduates of the programme will be able to

- **PEO 1** Rational Computing: Figure out, formulate, analyze typical problems and develop effective solutions by imparting the idea and principles of science, mathematics, engineering fundamentals and computing.
- **PEO 2** Professional Excellence: Competent professionally and successful in their chosen career through life-long learning.
- **PEO 3** Social and Ethical Technocrats: Excel individually or as member of a team in carrying out projects and exhibit social needs and follow professional ethics.

Programme Outcomes (POs) of B.E. - Computer Science and Engineering

	m Outcomes (POs) of B.E Computer Science and Engineering m Outcomes (POs)
	Engineering Graduates will be able to:
PO1	Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO4	Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
PO6	The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
P07	Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
PO11	Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO12	Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
Progra	m Specific Outcomes (PSOs)
PSO1	Technical competency: Develop and Implement computer solutions that accomplish goals to the industry, government or research by exploring new technologies.
PSO2	Professional awareness: Grow intellectually and professionally in the chosen field.

BSC - Basic Science Courses

ESC - Engineering Science Courses

PCC - Professional core courses

PEC- Professional Elective courses

OEC - Open Elective courses

MC - Mandatory courses

PROJ - Project

Total No. of Credits = 160

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020

SEMESTER - I

20EN151	TECHNICAL ENGLISH – I	L	T	Р	С
ZUENTOT	(Common to All Branches)	2	0	1	3

Prerequisite: No prerequisites are needed for enrolling into the course

Course Outcomes : On Completion of this course, the student will be able to	Cognitive Level

CO1:	Comprehend and apply Grammar in context for professional communication	Understand
CO2:	Infer the gist and specific information.	Apply
CO3:	Discuss, express and interact in the society and place of study.	Create
CO4:	Critically interpret and comprehend a given text.	Evaluate
CO5:	Prioritize the listening skills for academic and professional purposes.	Apply

UNIT – I [9]

Synonyms & Antonyms – Use of Modal Auxiliaries – Infinitive and Gerund – Parts of Speech – Intensive Reading – Predicting Content – Interpretation – Active Listening – Listening for the main idea – Need based Correspondence (request for joining hostel, bonafide certificate) – Self Introduction – Introducing others

UNIT- II [9]

British & American Terminology – Tenses (Simple Present, Present Continuous, Present Perfect, Simple Past, and Simple Future) – Predicting Content – Drawing inferences – Listening for specific details – Listening to News – Job Application and Resume – Writing Instructions – Delivering Welcome Address

Standard Abbreviations and Acronyms – Preposition of Time, Place and Movement – Active Voice & Passive Voice – Consonant Sounds – Pronunciation guidelines related to Vowels and Consonant – Skimming & Scanning - Inference – Context Based Meaning – Recommendation Writing – Proposing Vote of Thanks.

Vocabulary Building – Phrasal Verbs (Put, Give, Look, Take, Get, Call)- Impersonal passive – Newspaper Reading — Note making – Listening to Dialogues – E Mail Etiquettes & E-mail Writing. – MoC – Anchoring – Role play in academic context

Homonyms – Concord (Subject & Verb Agreement) – Rearranging the jumbled sentences – Listening to Telephonic Conversation – Letter of Invitation (inviting, accepting and declining) – Paragraph writing – Letter to the Editor of a Newspaper – Drills using Minimal pairs – Presentation Skills.

Total = 45 Periods

SEMESTER - I

20MA151	ENGINEERING MATHEMATICS – I	L	T	Ρ	С
ZUIVIATOT	(Common to All Branches)	3	1	0	4

Prerequisite: No prerequisites are needed for enrolling into the course

Course	Outcomes : On Completion of this course, the student will be able to	Cognitive Level
CO1:	Interpret the concepts of Matrix applications in the field of engineering.	Understand
CO2:	Acquire knowledge in solving ordinary differential equations.	Evaluate
CO3:	Extend and apply the concepts of differential calculus problems.	Apply
CO4:	Develop the skills in solving the functions of several variables.	Remember
CO5:	Applying the concepts and solving the Vector Calculus problems.	Apply

UNIT- I LINEAR ALGEBRA

[12]

Characteristic equation – Eigen values and Eigen vectors of a real matrix – Properties of Eigen values and Eigen vectors (Excluding proof) – Cayley Hamilton theorem (excluding proof) – Quadratic forms – Reduction of quadratic form to canonical form by orthogonal transformation.

UNIT – II ORDINARY DIFFERENTIAL EQUATIONS

[12]

Linear differential equations of second and higher order with constant coefficients – Differential equations with variable coefficients – Cauchy's and Legendre's linear equations – Method of variation of parameters.

UNIT – III DIFFERENTIAL CALCULUS

[12]

Curvature – Radius of curvature (Cartesian co-ordinates only) – Centre of curvature and Circle of curvature – Involutes and Evolutes.

UNIT – IV FUNCTIONS OF SEVERAL VARIABLES

[12]

Partial derivatives – Total derivatives – Euler's theorem for homogenous functions – Taylor's series expansion – Maxima and Minima for functions of two variables – Method of Lagrangian multipliers.

UNIT – V VECTOR CALCULUS

[12]

Gradient, Divergence and Curl – Directional derivative – Irrotational and solenoidal vector fields – Green's theorem in plane, Gauss divergence theorem and Stoke's theorem – Problems in Cube, Cuboid and Rectangular parallelopiped only.

Total (L: 45 T:15) = 60 Periods

K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER – I ENGINEERING CHEMISTRY L T P C (Common to All Branches) 3 0 0 3

Prerequisite: No prerequisites are needed for enrolling into the course

Course (Outcomes : On Completion of this course, the student will be able to	Cognitive Level
CO1:	Make use of the manufacture, properties and uses of advanced engineering materials.	Understand
CO2:	Explain the concept of corrosion and its control.	Understand
CO3:	Use the concept of thermodynamics in engineering applications.	Understand
CO4:	Recall the periodic properties such as ionization energy, electron affinity and electro negativity.	Remember
CO5:	Analyze the usage of various spectroscopic techniques.	Understand
LIMIT I	ADVANCED ENGINEEDING MATERIAL C	

UNIT- I ADVANCED ENGINEERING MATERIALS

[9]

Abrasives – Moh's scale of hardness – types – natural [Diamond] – synthetic [SiC]; Refractories – characteristics – classifications [Acidic, basic and neutral refractories] – properties – refractoriness – RUL – porosity – thermal spalling; Lubricants – definition – function – characteristics – properties – viscosity index, flash and fire points, cloud and pour points, oiliness; Solid lubricants – graphite and MoS₂; Nano materials – CNT– synthesis [CVD, laser evaporation, pyrolysis] – applications – medicine, electronics, biomaterials and environment.

UNIT- II ELECTROCHEMISTRY AND CORROSION

· 9 1

Introduction – electrode potential – Nernst equation – EMF series and its significance – types of cells (Electrolytic & electrochemical); Corrosion – causes, consequences – classification – chemical corrosion – electro chemical corrosion – mechanism; Galvanic & differential aeration corrosion – factors influencing corrosion – corrosion control – corrosion inhibitors.

UNIT- III CHEMICAL THERMODYNAMICS

[9

Terminology of thermodynamics – second law; Entropy – entropy change for an ideal gas – reversible and irreversible processes – entropy of phase transition – Clausius inequality; Free energy and work function – Helmholtz and Gibb's free energy functions – criteria of spontaneity; Gibb's – Helmholtz equation (Problems); Maxwell's relations – Van't Hoff isotherm and isochore.

UNIT- IV ATOMIC STRUCTURE AND CHEMICAL BONDING

[9]

Effective nuclear charge – orbitals – variations of s, p, d and f orbital – electronic configurations – ionization energy – electron affinity and electro negativity; Types of bonding – ionic, covalent and coordination bonding – hydrogen bonding and its types; Crystal field theory – the energy level diagram for transition metal complexes ($[Fe(CN)_6]^3$, $[Ni(CN)_4]^2$ and $[CoCl_4]^2$ only); Role of transition metal ions in biological system; Band theory of solids.

UNIT – V PHOTOCHEMISTRY AND SPECTROSCOPIC TECHNIQUES

[9]

Laws of photochemistry – Grotthuss Draper law – Stark-Einstein law – Beer-Lambert law – phosphorescence – fluorescence and it's applications in medicine – chemiluminescence; Colorimetry – principle – instrumentation (block diagram only) – estimation of iron by colorimetry; principles of spectroscopy – selection rules – vibrational and rotational spectroscopy – applications; Flame photometry – principle – instrumentation (block diagram only) – estimation of sodium; Atomic absorption spectroscopy – principle – instrumentation (block diagram only) – estimation of nickel.

20EE04	(Common To AU, CE, CS, IT, ME & SF)	3	0	0	3
Prereq	uisite: Engineering Mathematics, Engineering Physics				
Course	Outcomes : On Completion of this course, the student will be able to	C	ogniti	ve Lev	el
CO1:	Solve the electric circuits by applying basic circuital laws for various combinations of circuit elements.		Ap	ply	
CO2:	Explain the construction, operating principle and application of DC motor and transformers.		Unde	rstand	
CO3:	Enlighten the construction, operating principle and application of AC motors and Special Machines.		Unde	rstand	
CO4:	Illustrate the function of various measuring instruments.		Unde	rstand	
CO5:	Discuss the characteristics of Diodes, BJT and Digital systems.		Under	rstand	
UNIT –	I ELECTRICAL CIRCUITS				[9]
RL & R	ral of Electrical Power System – Ohm's Law – Kirchhoff's Laws –circuit Analysis – Intro RLC series circuits, Average and RMS Value – Power and Power factor for single phas d Delta Connections – Electrical safety.				

UNIT – II DC MOTOR AND TRANSFORMERS

[9]

Faraday's Law – Lenz's Law-Fleming's left hand and right hand rule, DC Motor: Construction – Operation-series and shunt motor Characteristics Applications. Single Phase Transformer: Construction – Operation – EMF Equation – Types – Applications.

UNIT – III AC MOTORS & SPECIAL MACHINES

[9]

Single Phase Induction Motor: Construction – Operation – Split Phase Induction Motor and Capacitor Start Induction Run Motor – Applications, Three Phase Induction Motor: Construction – Operation – Types – Applications. Special Machines: Stepper Motor.

UNIT- IV MEASURING INSTRUMENTS

[9]

Basic Methods of Measurements: Direct and Indirect , Functional elements of an instrument – Errors in measurements– Analog and Digital Instruments – Basic Principle of Indicating Instruments – Moving Coil and Moving Iron Ammeter and Voltmeter. Dynamometer type Wattmeter – Induction type Energy Meter – Cathode Ray Oscilloscope.

UNIT – V ANALOG AND DIGITAL ELECTRONICS

۲9

Semiconductor devices: PN Junction Diode, Zener diode: Operation and Characteristics – Bipolar Junction Transistor – CE Configurations and its Characteristics. Review of number systems – Digital logic gates – Introduction to Microprocessors.

Total = 45 Periods

UNIT – I FUNDAMENTALS OF COMPUTER AND INTERNET

[9]

Understand

Understand

Understand

Introduction and Organization of Computer – History and Generation of Computer – Types of Computer – Components of Computer (Hardware, Software and Firmware) – Classification of Software – Introduction to Algorithms, Pseudo code and Flowchart – Introduction to Network and Internet – Terminologies in Internet – WWW.

UNIT – II COMPUTER PROBLEM SOLVING

Design the fundamental algorithm.

Factorize the numbers using methods.

Process the array for different operations.

[9]

Introduction – Problem solving aspect – Top Down Design – Implementation of Algorithm – Program Verification – Efficiency of Algorithm – Analysis of Algorithm

UNIT – III FUNDAMENTAL ALGORITHMS

[9]

Exchanging the Values – Counting – Summation of Set of Number – Factorial Computation – Sine Function Computation – Generation of the Fibonacci Sequence – Reversing the Digits of an Integer – Base conversion – Character to Number conversion.

UNIT – IV FACTORING METHODS

[9]

Finding the Square Root of a Number – Smallest Divisor of an Integer – GCD of Two Integers – Generating Prime Numbers – Computing Prime Factors of an Integer – Generation of Pseudo random numbers – Raising a number to a larger power – Computing the nth Fibonacci number.

UNIT – V ARRAY TECHNIQUES

[9]

Array order reversal – Array counting – Finding the maximum number in the set – Removal of duplicates from an ordered array – Finding the kth smallest element – Longest monotone subsequence.

	K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER – I			R	2020
201104	INDUCTION PROGRAMME	L	Т	Р	С
20MC1	(Common To All Branches)	0	0	0	0
Prerequ	uisite: No prerequisites are needed for enrolling into the course.				
Course	Outcomes: On Completion of this course, the student will be able to		Cogn	itive le	vel
CO1:	Involve in physical activity, creative arts and culture and feel comfortable in the new environment.		Under	stand	
CO2:	Build relationship between teachers and students and make familiarizing with departments.		Under	stand	
CO3:	Concentrate on literary activities.		Арј	oly	
CO4:	Develop the required skills through lectures and workshops.		Reme	mber	
CO5:	Acquire skills in extracurricular activities.		Anai	yze	
List of	activities during the three weeks Students Induction Programme (SIP):			3 W	eeks

• This would involve a daily routine of physical activity with games and sports. There would be games in the evening. These would help develop team work besides health.

MODULE II: CREATIVE ARTS & CULTURE

MODULE I: PHYSICAL ACTIVITY

- Every student would choose one skill related to the arts whether visual arts or performing arts such as painting, music, dance, pottery, sculpture etc. The student would pursue it every day for the duration of the program.
- These would allow for creative expression. It would develop a sense of aesthetics and also enhance creativity
 which would help in engineering design later.

MODULE III: MENTORING AND CONNECTING THE STUDENTS WITH FACULTY

- Mentoring takes place in the context and setting of Universal Human Values. It gets the student to explore
 oneself and experience the joy of learning, prepares one to stand up to peer and take decisions with courage,
 be aware of relationships and be sensitive to others.
- Discussions would be conducted in small groups of about 20 students with a faculty mentor each. It is to open thinking towards the self. Universal Human Values discussions could even continue for rest of the semester as a normal course, and not stop with the induction program.

MODULE IV: FAMILIRIZATION WITH COLLEGE/DEPARTMENTS & BRANCHES

• They should be shown their department, and told what it means to get into the branch or department. Describe what role the technology related to their department plays in society and after graduation what role the student would play in society as an engineer in that branch. A lecture by an alumnus of the Dept. would be very helpful in this regard. They should also be shown the laboratories, workshops and other facilities.

MODULE V: LITERARY ACTIVITIES

Literary activity would encompass reading a book, writing a summary, debating, enacting a play etc.

MODULE VI: PROFICIENCY MODULES:

 The induction program period can be used to overcome some critical lacunas that students might have difficulties in communication skills. These should run like crash courses, so that when normal courses start after the induction program, the student has overcome the lacunas substantially.

MODULE VII: LECTURES & WORKSHOPS

- Lectures by eminent people to be organized, say, once a week. It would give the students exposure to people who are eminent, in industry or engineering, in social service, or in public life. Alumni could be invited as well.
- Motivational lectures about life, meditation, etc. by Ramakrishna Mission, Art of Living, Vivekanand Kendras, S-VYASA, etc. may be organized. (3 sessions, 9 hours).

MODULE VIII: EXTRA CURRICULAR ACTIVITIES

- The new students should be introduced to the extra-curricular activities at the college.
- They should be shown the facilities and informed about activities related to different clubs etc. This is when selected senior students involved in or leading these activities can give presentations, under faculty supervision.

MODULE IX: FEED BACK & REPORT ON THE PROGRAMMES:

- Students should be asked to give their mid-program feedback. They should be asked to write their opinions about the program at the end of the first week.
- Finally, at the end of the program, each group (of 20 students) should be asked to prepare a single report on their experiences of the program. On the second last day, each group should present their report in front of other groups. Immediately after their presentation, they should submit their written report. This will also serve as a closure to the program.
- Finally, a formal written or online anonymous feedback should be collected at the end of the program.

 20GE051
 HERITAGE OF TAMILS
 L
 T
 P
 C

 (common to all branches)
 1
 0
 0
 1

Prerequisite(s): No prerequisites are needed for enrolling into the course

Course (Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Recognize the extensive literature of Tamil and its classical nature.	Understand
CO2:	Apprehend the heritage of sculpture, painting and musical instruments of ancient people.	Understand
CO3:	Review on folk and martial arts of Tamil people.	Understand
CO4:	Insightthinai concepts, trade and victory of Chozha dynasty.	Understand
CO5:	Realize the contribution of Tamil in Indian freedom struggle, self-esteem movement and siddha medicine.	Understand

UNIT - I LANGUAGE AND LITERATURE

[03]

Language Families in India – Dravidian Languages – Tamil as a Classical Language – Classical Literature in Tamil – Secular Nature of Sangam Literature – Distributive Justice in Sangam Literature – Management Principles in Thirukural – Tamil Epics and Impact of Buddhism & Jainism in Tamil Land – Bakthi Literature Azhwars and Nayanmars – Forms of minor Poetry – Development of Modern literature in Tamil – Contribution of Bharathiyar and Bharathidhasan.

UNIT - II HERITAGE - ROCK ART PAINTINGS TO MODERN ART – SCULPTURE [03

Hero stone to modern sculpture – Bronze icons – Tribes and their handicrafts – Art of temple car making – Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments – Mridhangam, Parai, Veenai, Yazh and Nadhaswaram – Role of Temples in Social and Economic Life of Tamils.

UNIT - III FOLK AND MARTIAL ARTS

[03

Therukoothu, Karagattam, VilluPattu, KaniyanKoothu, Oyillattam, Leather puppetry, Silambattam, Valari, Tiger dance – Sports and Games of Tamils.

UNIT - IV THINAI CONCEPT OF TAMILS

[03

Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature – Aram Concept of Tamils – Education and Literacy during Sangam Age – Ancient Cities and Ports of Sangam Age – Export and Import during Sangam Age – Overseas Conquest of Cholas.

UNIT - V CONTRIBUTION OF TAMILS TO INDIAN NATIONAL MOVEMENT AND INDIAN [03]

Contribution of Tamils to Indian Freedom Struggle – The Cultural Influence of Tamils over the other parts of India – Self-Respect Movement – Role of Siddha Medicine in Indigenous Systems of Medicine – Inscriptions & Manuscripts – Print History of Tamil Books.

Total (L= 15, T = 0) = 15 Periods

Text Books:

	es & Suffixes – Numerical Adjectives – If Conditionals – Making Requests – S deas – Intensive Reading – E-mail Writing – Describing Likes & Dislikes – Repo	•	tion – L	₋istenir	ng for		
UNIT –	· III				[9]		
Types of	of Collocations – Framing Questions – 'Wh' Question – Yes / No Question	- Cause and	Effect E	xpress	ion –		

K.S.R. COLLEGE OF ENGINEERING (Autonomous)

UNIT – IV [9]

Greetings and Introductions - Inviting People - Listening and Note taking - Critical reading- Making inference -

Common English idioms and phrases – Expression of Purpose – Editing text for Spelling and Punctuation – Oral Presentation – Extensive Listening – Short Comprehension Passages – Business Correspondence – Calling for Quotations, Seeking Clarification, placing order and Complaint .

Confused and misused words – Discourse markers – Redundancies – Instructions – Describing – Listening to fill up forms and gapped texts – Reading Short texts from Journals and Newspapers – Telephone Etiquette – Check list – Essay Writing.

20MA232	DISCRETE MATHEMATICS	L	Τ	Р	С
ZUWAZ3Z	(Common To CS & IT)	3	1	0	4

Prerequisite: No prerequisites are needed for enrolling into the course.

Cours	e Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Solve logical problems.	Understand
CO2:	Construct algorithms and derive complexities.	Understand
CO3:	Acquire the knowledge of sets that are required for developing computational models.	Remember
CO4:	Solving computational operations associated with functions.	Understand
CO5:	Apply the concepts of Graph theory and Combinatory in network algorithms.	Apply
HIMIT	I DDODOSITIONAL CALCULUS	[42]

UNIT – I PROPOSITIONAL CALCULUS

[12]

Propositions – Logical connectives – Compound propositions – Conditional and biconditional propositions – Truth tables – Tautologies and contradictions – Contra positive – Logical equivalences and implications – Normal forms – Principal conjunctive and disjunctive normal forms – Rules of inference Theory.

UNIT – II PREDICATE CALCULUS

[12

Predicates – Statement functions – Variables – Free and bound variables – Quantifiers – Universe of discourse – Logical equivalences and implications for quantified statements – Theory of inference – The rules of universal specification and generalization.

UNIT – III SET THEORY [12]

Cartesian product of sets – Relation on sets – Types of relations and their properties – Relational matrix and the graph of a relation – Equivalence relations – Partial ordering – Poset – Hasse diagram.

UNIT – IV FUNCTIONS [12]

Definition – Classification of functions – Composition of functions – Inverse functions – Binary and n-ary operations – Characteristic function of set – Permutation functions.

UNIT – V GRAPH THEORY AND COMBINATORICS

[12]

Graphs: Graph terminology and special types of graphs – Representing graphs and graph isomorphism – connectivity – Euler and Hamilton paths – Matching. Combinatorics: Mathematical Induction – The Basics of Counting – Pigeonhole Principle – Recurrence Relations – Generating Functions.

M.C.D. COLLECE OF ENCINEEDING (Autonomous)

Acoustics—Introduction — Classification of sound — Characteristics of musical sound — Loudness — Weber — Fechner law — Decibel — Absorption coefficient — Reverberation — Reverberation time — Sabine's formula: growth and decay (derivation) — Factors affecting acoustics of buildings and their remedies. Ultrasonics — Production —piezoelectric method — Properties — Velocity measurement: acoustical grating — Engineering applications — SONAR.

UNIT – II LASER TECHNOLOGY [9]

Introduction – Principle of Spontaneous emission and stimulated emission – Population inversion, pumping – Einstein's A and B coefficients (derivation). Types of lasers – Nd-YAG, CO₂ and Semiconductor lasers (homo-junction and heterojunction) – Qualitative Industrial Applications: Lasers in welding, heat treatment and cutting – Medical applications – Holography (construction and reconstruction of images).

UNIT – III CRYSTAL PHYSICS [9]

Introduction to crystalline and amorphous solids – lattice and unit cell – seven crystal system and Bravais lattices – Miller indices(hkl) – d-spacing in cubic lattice – atomic radius – coordination number – packing factor calculation for sc, bcc, fcc and hcp– crystal defects – point, line and surface defects.

UNIT – IV QUANTUM PHYSICS [9]

Black body radiation – Planck's theory (derivation) – Deduction of Wien's displacement law and Rayleigh – Jeans' Law from Planck's theory – Compton effect - Theory and experimental verification – Matter waves – Schrödinger's wave equation – Time independent and time dependent equations – Physical significance of wave function – Particle in a one dimensional box.

UNIT – V OPTOELECTRONIC DEVICES [9]

Photoconductive materials – Light Dependent Resistor (LDR) – Working – Applications – Photovoltaic materials – Solar cell – Construction, working and applications – Light Emitting Diode (LED) – Principle, construction and working - Liquid crystal Display (LCD) – Types and applications.

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 SEMESTER – II

Prerequisite: No prerequisites are needed for enrolling into the course

Course (Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Identify the various methods used for the simplification of boolean functions.	Understand
CO2:	Design and analyze the combinational circuits.	Analyze
CO3:	Construct and analyze the sequential circuits.	Analyze
CO4:	Apply the knowledge to design the processor unit.	Apply
CO5:	Summarize the simple computer design and HDL.	Remember
UNIT – I	BOOLEAN ALGEBRA AND LOGIC GATES	[9]

Review of Number Systems - Arithmetic Operations - Binary Codes - Boolean Algebra and Theorems - Boolean

Functions – Simplification of Boolean Functions using Karnaugh Map and Tabulation Methods – Logic Gates.

UNIT – II COMBINATIONAL LOGIC [9]

Combinational Circuits – Analysis and Design Procedures – Adder and Subtractor – Magnitude Comparator – Code Conversions – Decoders and Encoders – Multiplexers and Demultiplexers.

UNIT – III SYNCHRONOUS SEQUENTIAL LOGIC [9]

Sequential Circuits – Latches and Flip Flops – Analysis and Design Procedures – State Reduction and State Assignment – Shift Registers – Counters.

UNIT – IV PROCESSOR DESIGN [9]

Processor Organization – Design of ALU: Arithmetic Circuits – Logic Circuits – Arithmetic Logic Unit –Status Register – Design of Shifter – Processor Unit.

UNIT – V SIMPLE COMPUTER DESIGN AND HDL [9]

Inter Register Transfer – Conditional Control Statements – Instruction Codes – Design of a Simple Computer – Hardware Description Language (HDL) for Combinational Circuits and Sequential Logic Circuits.

Total = 45 Periods

R 2020 K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER - II Т C 20CS211 **C PROGRAMMING** 3 0 N 3 Prerequisite: Fundamental knowledge in problem solving techniques. Course Outcomes: On Completion of this course, the student will be able to Cognitive level Choose the right data representation formats based on the requirements of the Understand CO1: problem Categorize and abstract the programming task involve for given computational Analyze CO2: problem. Use the comparison and limitations of the various programming construct and choose Evaluate CO3: the right one for the task in hand. Apply CO4: Identify the situation where the computational methods would be useful. Evaluate the task in which the file concepts are applicable and apply them to write Apply CO5: programs. UNIT - I **FUNDAMENTALS OF C PROGRAMMING** [9]

History of C: Middle level language – Structured language – Programmer's language – Compilers Vs. Interpreters – Library and Linking – Expressions: Basic Data Types – Variables – C scopes –Type qualifiers –Storage class specifiers – Variable initialization – Constants – Operators – Expressions.

UNIT – II STATEMENTS, ARRAY AND STRING

[9]

Statements: Selection Statements – Iteration statements – Jump statements – Expression statements – Block statements. Array: Single-Dimension arrays – Two-Dimensional arrays – Multidimensional arrays – String: Declaring and Initializing String Variables – String Handling Functions and Operations.

UNIT-III FUNCTIONS AND POINTERS

[9]

Function: General form of function – Understanding the scope of a function – Function arguments – Recursion. Pointers: Pointer variables – Pointer Operators – Pointer expressions – Pointers and Arrays – Indexing pointer – Multiple indirections – Initializing pointers – Pointers to functions.

UNIT – IV STRUCTURES, UNIONS AND CONSOLE I/O

[9]

Accessing Structure Members – Structure Assignments – Arrays of Structures – Passing Structures to Functions – Structure pointers – Arrays and Structures within structures. Unions – Console I/O: Reading and Writing Characters – Reading and Writing Strings – Formatted Console I/O: printf() and scanf().

UNIT - V FILES AND PREPROCESSORS

[9]

Files: Streams and Files – File System Basics – fread() and fwrite() – fseek() and Random-Access I/O – fprintf() and fscanf() – Command line arguments. Preprocessor: #define, #error, #include, Conditional Compilation Directives, #undef.

UNIT –	INTRODUCTION TO ENVIRONMENTAL STUDIES AND NATURAL RESOU	RCES			[9]
Environ	ment – definition – scope and importance – need for public awareness; Forest resources -	- use -	- over	exploi	tation

K S D COLLEGE OF ENGINEEDING (Autonomous)

1

- deforestation; Water resources - over-utilization of surface and ground water; Mineral resources - environmental effects of extracting and using mineral resources; Food resources - overgrazing - effects of modern agriculture - fertilizerpesticide problems - water logging - salinity; Role of an individual in conservation of natural resources. Activity: Slogan making event on conserving natural resources or plantation of trees.

UNIT - II **ECOSYSTEM AND BIODIVERSITY**

D 2020

Concept of an ecosystem - structure and function of an ecosystem - producers - consumers and decomposers - Food chain - food web - energy flow in the ecosystem - ecological pyramids - Ecological succession; Forest ecosystem and Aquatic ecosystems (Estuary and marine ecosystem); Biodiversity - introduction - definition - Values of biodiversity; Hotspots of biodiversity; Endangered and Endemic Species of India. Activity: Arrange a trip to visit different varieties of plants.

UNIT- III **ENVIRONMENTAL POLLUTION**

Pollution - introduction and different types of pollution; Causes - effects and control measures of air pollution and water pollution – water quality parameters – hardness – definition – types; Alkalinity – definition – types; BOD and COD (definition and significance); Noise pollution - solid waste management - hazardous waste - medical and e-wastes; Role of an individual in prevention of pollution. Activity: Drive for segregation of waste or cleanliness drive.

UNIT- IV **SOCIAL ISSUES AND ENVIRONMENT**

[9]

Water conservation - rain water harvesting and watershed management; Environmental ethics - Issues and possible solutions; Climate change – global warming and its effects on flora and fauna – acid rain – ozone layer depletion; Disaster Management – earth quake – cyclone – tsunami – disaster preparedness – response and recovery from disaster. Activity: Poster making event on water management or Climate change.

UNIT- V SUSTAINABILITY AND GREEN CHEMISTRY

Sustainable development – from unsustainable to sustainable development – Environmental Impact Assessment (EIA); Human rights: Value education: HIV/AIDS: Role of information technology in environment and human health: 12 Principles of Green Chemistry. Activity: Group discussion on Sustainability or Lecture from an expert on Green chemistry.

Understand CO2: Comprehend the construction technology, building materials in sangam Period and case Understand CO3: Infer the metal process, coin and beads manufacturing with relevant archeological Understand evidence

CO5: Apply the knowledge of scientific Tamil and Tamil computing. Apply
UNIT - I WEAVING AND CERAMIC TECHNOLOGY [03]

Realize the agriculture methods, irrigation technology and pearl diving.

Weaving Industry during Sangam Age - Ceramic technology - Black and Red Ware Potteries (BRW) - Graffiti on Potteries.

UNIT - II DESIGN AND CONSTRUCTION TECHNOLOGY

[03]

Understand

Designing and Structural construction House & Designs in household materials during Sangam Age – Building materials and Hero stones of Sangam age – Details of Stage Constructions in Silappathikaram – Sculptures and Temples of Mamallapuram – Great Temples of Cholas and other worship places – Temples of Nayaka Period – Type study (Madurai Meenakshi Temple) –ThirumalaiNayakar Mahal – Chetti Nadu Houses, Indo – Saracenic architecture at Madras during British Period.

UNIT - III MANUFACTURING TECHNOLOGY

[03]

Art of Ship Building – Metallurgical studies – Iron industry – Iron smelting, steel – Copper and gold – Coins as source of history – Minting of Coins – Beads making – industries Stone beads – Glass beads – Terracotta beads – Shell beads/ bone beats – Archeological evidences – Gem stone types described in Silappathikaram.

UNIT - IV AGRICULTURE AND IRRIGATION TECHNOLOGY

[03]

Dam, Tank, ponds, Sluice, Significance of KumizhiThoompu of Chola Period, Animal Husbandry – Wells designed for cattle use – Agriculture and Agro Processing – Knowledge of Sea – Fisheries – Pearl – Conche diving – Ancient Knowledge of Ocean – Knowledge Specific Society.

UNIT - V SCIENTIFIC TAMIL & TAMIL COMPUTING

[03

Development of Scientific Tamil – Tamil computing – Digitalization of Tamil Books – Development of Tamil Software – Tamil Virtual Academy – Tamil Digital Library – Online Tamil Dictionaries – Sorkuvai Project.

SEMESTER - II

20011020	PHYSICS LABORATORY	L	Τ	Р	С
20PH028	(Common to All Branches)	0	0	3	1

Prerequisite: Knowledge in Engineering Physics

Course	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Comprehend the different physical parameters of optics.	Analyze
CO2:	Perceive the production of ultrasonic waves through inverse piezoelectric effect and to determine the velocity of sound waves in the given liquid.	Remember
CO3:	Explore the principle of thermal conductivity thereby to calculate the thermal conductivity of various bad conductors like cardboard, mica, etc.	Apply
CO4:	Confer the experimental counterparts of materials properties such as modulus, solar cell, and energy gap.	Understand
CO5:	Imbibe the concept of capillary action in fluid dynamics and to compare the coefficient of viscosity of the given liquid.	Analyze

List of Experiments in Physics Laboratory

- 1. Determination of wavelength of Laser using grating and the Size of the Particles.
- 2. Determination of thickness of the given material by Air wedge method.
- 3. Determination of velocity of Ultrasonic waves and compressibility using Ultrasonic interferometer.
- 4. Spectrometer grating Determination of wavelength of mercury spectrum.
- 5. Determination of thermal conductivity of a bad conductor by Lee's disc method.
- 6. Determination of Young's modulus of the material of a uniform bar by Non Uniform bending method.
- 7. Determination of Band gap energy of a semiconductor.
- 8. Determination of Viscosity of a given liquid by Poiseuille's method.
- 9. Torsional pendulum Determination of rigidity modulus of a given wire.
- 10. V-I Characteristics of Solar Cell.

Prerequisite: No prerequisites are needed for enrolling into the course

Course	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Outline basic Boolean theorems and verify their functionalities.	Understand
CO2:	Implement combinational circuits using logic gates.	Understand
CO3:	Design combinational circuits using MSI devices.	Apply
CO4:	Construct sequential circuits using MSI devices.	Apply
CO5:	Develop HDL models for combinational and sequential circuits.	Understand

LIST OF EXPERIMENTS:

- 1. Verification of boolean theorems using logic gates.
- 2. Design and implementation of combinational circuits using logic gates for arbitrary functions, code converters.
- 3. Design and implementation of combinational circuits using MSI devices:
 - a) 4 bit binary adder / subtractor
 - b) Parity generator / checker
 - c) Multiplexers and De-Multiplexers
- 4. Design and implementation of sequential circuits:
 - a) Shift-registers
 - b) Synchronous counter
- 5. Coding combinational / sequential circuits using HDL.
- 6. Design and implementation of a simple digital system.

 NUMERICAL COMPUTATIONAL TECHNIQUES (Common To CS & IT)
 L
 T
 P
 C

 3
 1
 0
 4

Prerequisite: No prerequisites are needed for enrolling into the course.

Course	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Solve polynomial, transcendental equations, simultaneous linear equations numerically.	Understand
CO2:	Predict the unknown values by using Interpolation techniques.	Apply
CO3:	Evaluate the problems in differentiation and integration by using numerical techniques.	Evaluate
CO4:	Solving the initial value problems for ordinary differential equations.	Remember
CO5:	Determine the numerical solutions to boundary value problems.	Remember

UNIT – I SOLUTIONS OF EQUATIONS AND EIGEN VALUE PROBLEMS

[12]

R 2020

Solutions to polynomial and transcendental equations – Newton Raphson Method – Solutions to simultaneous linear system of equations by Gauss Elimination Method – Gauss Seidel Method - Inverse of a matrix by Gauss Jordan Method – Eigen value of a matrix by power method.

UNIT – II INTERPOLATION AND APPROXIMATION

[12]

Interpolation – Newton's Forward and Backward difference interpolation Techniques – Newton's divided difference method – Lagrange's interpolation and Inverse Lagrange's interpolation methods.

UNIT – III NUMERICAL DIFFERENTIATION AND INTEGRATION

[12]

Numerical differentiation using Newton's Forward and Backward difference interpolation methods – Numerical integration by Trapezoidal rule – Simpson's 1/3rd rule and 3/8th rule – Double integration using Trapezoidal and Simpson's rules.

UNIT – IV INITIAL VALUE PROBLEMS FOR ORDINARY DIFFERENTIAL EQUATIONS [12]

Solving ODE by Taylor's Series Method – Euler's Method for first order equation – Modified Euler's Method for first order equation – Fourth order Runge-Kutta method for solving first order equations – Adams and Milne's Predictor and Corrector Method.

UNIT – V BOUNDARY VALUE PROBLEMS IN PARTIAL DIFFERENTIAL EQUATIONS [12]

Classification of PDE – One dimension heat equation by Crank Nicolson method – One dimensional wave equation – Two Dimensional Laplace and Poisson equations.

Total (L: 45 T:15) = 60 Periods

SEMESTER - III				
PYTHON PROGRAMMING	L	T	Р	С

Prerequisite: Basic knowledge of C programming.

Course C	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Illustrate basic concepts of python programming.	Understand
CO2:	Apply the necessary data structures includes list, tuple and dictionary in the required fields and exception handling.	Apply
CO3:	Analyze, design and implement the problems using OOP concepts.	Analyze
CO4:	Demonstrate the simple file operations and data manipulation techniques.	Understand
CO5:	Design web site using python GUI.	Create

UNIT – I FUNDAMENTALS OF PYTHON

[9]

Introduction to Python – Advantages of Python programming – Variables and Data types – Comments – I/O function – Operators – Selection control structures – Looping control structures – Functions: Declaration – Types of arguments – Anonymous functions: Lambda.

UNIT – II HANDLING STRINGS AND EXCEPTIONS

9]

Strings – List – Tuples – Dictionaries – Sets – Exception Handling: Built-in Exceptions – User-defined exception – Modules and Packages.

UNIT – III OBJECT ORIENTED PROGRAMMING CONCEPTS

9

Object Oriented Programming basics –Inheritance and Polymorphism – Operator Overloading and Overriding – Get and Set Attribute Values – Name Mangling –Duck Typing – Relationships.

UNIT – IV FILES AND DATA BASES

[9]

File I/O operations – Directory Operations – Reading and Writing in Structured Files: CSV and JSON – Data manipulation using Oracle, MySQL and SQLite.

UNIT – V GUI AND WEB PROGRAMING USING PYTHON

٢9

UI design: Tkinter – Events – Socket Programming – Sending email – CGI: Introduction to CGI Programming, GET and POST Methods, File Upload.

SEMESTER - III

20CS312 DATA STRUCTURES L T P C 3 0 0 3

Prerequisite: Basic Knowledge of C programming

Course	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Construct the different linear data structure to solve simple problems.	Understand
CO2:	Build the various tree structures with its operations.	Create
CO3:	Analyze the concept of AVL tree, splay tree, B tree and B+ tree.	Analyze
CO4:	Apply graph data structure to solve real time problems.	Apply
CO5:	Evaluate various sorting, hashing and searching techniques.	Evaluate

UNIT- I LINEAR DATA STRUCTURES-ARRAY AND LINKED LIST

[9]

Abstract Data Types (ADT) – List ADT – Array Based Implementation – Linked List Implementation – Singly Linked Lists – Doubly Linked Lists – Circularly Linked Lists – Applications of Lists: Polynomial Manipulation – Radix sort.

UNIT- II LINEAR DATA STRUCTURES-STACK AND QUEUE

[9]

Stack ADT – Implementation of Stack using Array and Linked List – Applications of Stack: Evaluating arithmetic expressions – Conversion of Infix to postfix expression Recursion – Queue ADT – Implementation of Queue using Array and Linked List-Circular Queue – Applications of Queues

UNIT – III NON LINEAR DATA STRUCTURES-TREE STRUCTURES

[9]

Tree ADT – Binary Tree ADT – Binary Tree Traversal – Expression Trees – Applications of Trees – Binary Search Tree – AVL Trees – B Tree – B+ Tree – Binary Heaps – Applications of Priority Queues.

UNIT – IV NON LINEAR DATA STRUCTURES -GRAPHS

[9]

Introduction to Graphs and its Types – Breadth First Traversal – Depth First Traversal – Topological Sort – Biconnectivity – Minimum Spanning Tree: Prim's and Kruskal's algorithms – Shortest Path Algorithms: Dijkstra's Algorithm – Applications of Graphs.

UNIT – V SEARCHING, HASHING AND SORTING

гат

Searching: Linear and Binary Search – Hashing :Hash function– Separate Chaining – Open Addressing – Rehashing – Extendible Hashing – Sorting: Bubble Sort – Selection Sort – Insertion Sort – Heap Sort – Merge Sort – Quick Sort

R 2020

SEMESTER - III

20CS313	OPERATING SYSTEMS	L	ı	Р	C
2003313	OPERATING STSTEMS	3	0	0	3

Prerequisite: Basic knowledge of computer architecture.

Course (Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Identify the components and their functionalities in the operating system.	Remember
CO2:	Apply various CPU scheduling algorithms and synchronization Techniques.	Apply
CO3:	Examine the performance of various memory management techniques.	Understand
CO4:	Summarize the virtual memory concepts and file access methods.	Understand
CO5:	Study the performance of disk management and file system.	Analyze

UNIT- I OPERATING SYSTEMS CONCEPTS

[9]

Introduction to Operating Systems – Time sharing systems – Multiprocessor systems – Distributed systems – Real-Time systems – Operating System Structures: Operating System Services – System Calls- System Programs – Process: Process Concept – Process Scheduling – Operation on Processes – Cooperating Process – Inter Process Communication.

UNIT- II PROCESS SCHEDULING

[9

Threads: Overview – Multithreading Models. CPU Scheduling: Basic Concepts – Scheduling Criteria – Scheduling Algorithms: FCFS – SJF – Priority – Round Robin – Algorithm Evaluation. Process Synchronization: The critical Section Problem – Synchronization Hardware – Semaphores – Classic Problems of Synchronization.

UNIT – III DEADLOCK AND MEMORY MANAGEMENT

[9]

Deadlock: Deadlock Characterization – Methods for Handling Deadlocks – Deadlock Prevention – Deadlock Avoidance – Deadlock Detection – Recovery from Deadlock – Memory Management: Swapping – Contiguous memory Allocation – Segmentation – Paging – Structure of the Page Table.

UNIT – IV VIRTUAL MEMORY AND FILE SHARING INTERFACE

[9]

Virtual Memory: Demand Paging – Copy-on-Write – Page Replacement – Allocation of Frames – Thrashing – File Concepts: Access Methods – Directory Structure – File System Mounting – File Sharing – Protection.

UNIT – V FILE SYSTEM STRUCTURE AND STORAGE STRUCTURE

[9]

File System Structure – File System Implementation: Directory Implementation – Allocation Methods – Free space Management – Mass Storage Structure : Disk Structure – Disk Scheduling – Disk Management – Swap-Space Management – RAID structure – I/O Systems: I/O Hardware – Kernel I/O Subsystem – Case Study: The Linux System.

Total = 45 Periods

COLLEGE OF ENGINEERING (Autonomous) SEMESTER - III С 20CS314 **COMPUTER ORGANIZATION AND ARCHITECTURE** 3 Prerequisite: Basic knowledge of digital computer operations Course Outcomes: On Completion of this course, the student will be able to Cognitive level Identify the basics structure of computers, operations and instructions. Remember CO2: Outline the arithmetic operations and working of hardwired micro programmed control. Understand CO3: Comprehend pipelined execution and design control unit. Apply

CO3: Comprehend pipelined execution and design control unit.

Recognize the hierarchical memory system including cache memory and virtual memory

Understand

CO5: Analyze the different ways of communicating with I/O devices and standard I/O Analyze interfaces.

UNIT – I BASIC STRUCTURE AND ARITHMETIC OPERATIONS

[9]

Functional Units – Basic Operational Concepts – Performance – Instruction Set Architecture: Instructions and Instruction sequencing – Addressing Modes – RISC and CISC – Fixed Point and Floating Point Operations.

UNIT – II BASIC PROCESSING UNIT

[9]

Fundamental Concepts – Instruction Execution – Hardware Components – Instruction Fetch and Execution Steps – Hardwired Control – Micro Programmed Control – Nano Programming.

UNIT – III PIPELINING EXECUTION

[9]

Basic Concepts – Pipeline Organization – Pipelining Issues – Data Dependencies – Memory Delays – Branch Delays – Resource Limitations – Performance Evaluation – Superscalar Operation.

UNIT – IV MEMORY SYSTEM AND STORAGES

[9]

Basic Concepts – Semiconductor RAM Memories – Read Only Memories – Memory Hierarchy – Cache Memories – Performance Considerations – Virtual Memory – Memory Management Requirements – Secondary Storage Devices.

UNIT – V I/O ORGANIZATION

[9]

Accessing I/O Devices – Programmed I/O – Interrupt Initiated I/O – Direct Memory Access – Buses – Bus Arbitration – Interconnection Standards: SCSI – USB – SATA – I/O Devices and Processors.

20CS315 SOFTWARE ENGINEERINGL T P C
3 0 0 3

Prerequisite: Fundamental knowledge in problem solving techniques

Course	Cognitive level	
CO1:	Outline the concepts behind SDLC software engineering practices.	Understand
CO2:	Identify the customer requirement and determine the appropriate life cycle model.	Understand
CO3:	Apply the design methods for software development.	Apply
CO4:	Evaluate the various testing techniques.	Analyze
CO5:	Ensure the quality of software product.	Understand

UNIT – I FUNDAMENTALS OF SOFTWARE ENGINEERING

[9]

The nature of Software – Software Engineering – Software Process – Software Engineering Practice – Generic Process Model – Process Assessment and Improvement – Prescriptive Process models – Specialized Process Model – Process Technology – Product and Process – Agile Development

UNIT – II REQUIREMENT ENGINEERING

[9]

Requirement Engineering – Establishing Groundwork – Eliciting Requirements – Developing Use cases – Building the Requirements Model – Requirements Analysis – Requirements Modeling Strategies – Flow Oriented Modeling – Creating a Behavioral Model.

UNIT – III DESIGN CONCEPTS AND ARCHITECTURAL DESIGN

[9]

Design within the context of Software Engineering – Design Process – Design Concepts – Design Model – Architectural Design: Software Architecture – Architectural Genres – Architectural Styles – Architectural Design – Architecture Mapping using Dataflow

UNIT – IV TESTING TECHNIQUES

[91

A strategic Approach for Software Testing – Test Strategies for Conventional Software – Validation Testing – System Testing – Art of Debugging – Testing Conventional Applications : Software testing Fundamentals – Internal and External Views Testing – White Box Testing – Basis Path Testing – Control Structure Testing – Black Box Testing – Model Based Testing – Testing for Specialized Environments – Architectures and Applications – Patterns for Software Testing.

UNIT – V PROJECT AND QUALITY MANAGEMENT

[9]

Quality Concepts: Software Quality – The Software Quality Dilemma – Achieving Software Quality – Formal Technical Review – Software Quality Assurance – Process and Project Metrics – Emerging Trends in Software Engineering.

K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER – III PYTHON PROGRAMMING LABORATORY R 2020 L T P C

Prerequisite: Basic knowledge of C programming.

Course	e Outcomes: On Completion of this course , the student will be able to	Cognitive level			
CO1:	Design simple programs using conditional statements and loops.	Apply			
CO2:	Using python list, tuples and dictionaries.	Apply			
CO3:	Detecting the exception handling mechanism in python.	Analyze			
CO4:	Construct GUI applications using python programming.	Create			
CO5:	Demonstrate the use of files in python.	Create			

LIST OF EXPERIMENTS:

20CS321

- 1. Write a simple program to display a single level and multilevel string.
- 2. Write a function to compute the GCD of two numbers
- 3. Write a program to display the largest number among three numbers.
- 4. Create a program to change, delete, add and remove elements in Dictionary.
- 5. Develop a program to perform operations on list.
- 6. Write a program to display the Fibonacci series and multiplication table by using looping constructs.
- 7. Create a Python program to demonstrate inheritance.
- 8. Write a python program to implement polymorphism with inheritance.
- 9. Display a simple calendar in python program without using the calendar module using string array or list.
- 10. Write a program to demonstrate the user-defined exception handling mechanism in Python.
- 11. Design and implement a graphical user interface to perform any arithmetic operation.
- 12. Write a python program to insert and retrieve data using MySQL.

R 2020

20CS322 DATA STRUCTURES LABORATORY L T P C 0 0 3 1

Prerequisite: Basic knowledge of C programming

Course	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Apply the concepts of singly and doubly linked lists.	Apply
CO2:	Implement the applications of stack and queue.	Create
CO3:	Design the balanced tree concepts.	Create
CO4:	Demonstrate the sorting algorithm techniques.	Create
CO5:	Construct the minimum spanning tree.	Create

LIST OF EXPERIMENTS:

- 1. Implementation of Singly Linked List.
- 2. Implementation of Doubly linked list
- 3. Develop a program for Polynomial manipulation.
- 4. Array implementation of Stack and Queue
- 5. Linked list implementation of Stack and Queue
- 6. Write a program that uses stack operations to convert a given infix expression into its postfix equivalent and Evaluation of Arithmetic expression, implement the stack using an array.
- 7. Design and develop a program for applications of Queue.
- 8. Develop a program to generate expression tree and display it in the following order: i) Preorder ii) Postorder iii) Inorder
- 9. Implementation of Binary Search Tree.
- 10. Implementation of AVL Tree.
- 11. Write programs for implementing the following graph traversal and MST algorithms:
 - a) DFS Algorithm b) Prims Algorithm.
- 12. Write programs for implementing the following sorting methods to arrange a list of integers in ascending order: a) Insertion sort b) Merge sort
- 13. Implementation of Hashing.

20MA441	PROBABILITY AND DECISION MODELS (Common To CS & IT)	_	•	P 0	•

K.S.R. COLLEGE OF ENGINEERING (Autonomous)

Prerequisite: No prerequisites are needed for enrolling into the course.

Course O	utcomes : On successful completion of the course , the student will be able to	Cognitive Level
CO1:	Explain the importance of one dimensional random variables discrete and continuous distribution.	Understand
CO2:	Develop their skills in joint, marginal and conditional distributions and knowing the concept of covariance correlation & regression.	Apply
CO3:	Analyze the theory of stationary process, Markov Process and transition probabilities, and Poisson Process.	Analyze
CO4:	Illustrate the basic concept of single server and multi-server queuing models.	Understand
CO5: UNIT – I	Estimate Critical Path in PERT and CPM. ONE DIMENSIONAL RANDOM VARIABLE	Evaluate [12]

Discrete and Continuous Random Variable – Moments – Moment Generating Functions and their Properties– Standard Distributions: Binomial, Poisson, Exponential and Normal Distributions.

UNIT – II TWO DIMENSIONAL RANDOM VARIABLES [12]

Joint Distributions – Marginal and Conditional Distributions – Covariance – Correlation and Regression analysis and their Properties.

UNIT – III RANDOM PROCESSES [12]

Classification – Stationary Process – Markov Process – Markov Chain – Transition Probabilities – Limiting Distributions – Poisson Process and their Properties.

UNIT – IV QUEUEING MODELS [12]

Markovian Queues – Little's formula – Single Server Models : (M/M/1): $(\infty/FIFO)$ and (M/M/1):(N/FIFO) – Multi Server Models : (M/M/C): $(\infty/FIFO)$ and (M/M/C):(N/FIFO).

UNIT – V NETWORK MODELS [12]

Network Construction – Critical Path Method (CPM) – Computations of total, free and independent floats – PERT Analysis–Computation of expected time and standard deviation.

Total (L: 45 T:15) =60 Periods

K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER – IV

Prerequisite: Basic concepts of discrete mathematics.

Course	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Compare and analyze various finite automata and convert NFA to DFA.	Evaluate
CO2:	Construct finite automata to regular expression and identify the properties of regular language.	Analyze
CO3:	Construct context free grammars to generate strings from a context free language and convert them into normal forms.	Evaluate
CO4:	Construct pushdown automata and convert pushdown automata to context-free grammar.	Apply
CO5:	Design turing machines for various problems and analyze the undecidability of languages.	Apply

UNIT- I INTRODUCTION TO AUTOMATA THEORY

[12]

R 2020

Mathematical preliminaries Finite Automata (FA) – Central Concepts of Automata Theory – Deterministic Finite Automata (DFA) – Non Deterministic Finite Automata (NFA) – Equivalence of NFA and DFA – Finite Automata with Epsilon Transition – Applications of Finite Automata.

UNIT- II REGULAR EXPRESSIONS AND LANGUAGES

[12]

Regular Expressions: Definitions – Equivalence of Regular Expression and Finite Automata: Thomson Method – Basic Method (R_{ij}* method) – State Elimination Method – Arden's Theorem. Proving languages not to be regular – Closure Properties of Regular Language – Equivalence and Minimization of Automata (DFA).

UNIT – III CONTEXT-FREE GRAMMAR AND LANGUAGES

12

Context-Free Grammar (CFG): Definition – Derivations – Parse Trees – Ambiguity – Simplification of Grammars – Conversion to Normal Forms: Chomsky (CNF) – Greibach (GNF). Pumping Lemma for Context –Free Languages – Applications of Pumping Lemma – Closure Properties of CFL.

UNIT – IV PUSHDOWN AUTOMATA

[12]

Pushdown Automata (PDA): Introduction – Definition – Instantaneous Description of Pushdown Automata – Design Examples – The Languages of Pushdown Automata – The Language acceptance by Final State and Empty Stack .Equivalence of PDA and CFG: Construction of PDA from CFG – Construction of CFG from PDA – Deterministic Pushdown Automata.

UNIT-V TURING MACHINE AND UNDECIDABLITY

[12]

Definition – Notation – Instantaneous Description and Languages – Design of TM – Programming Techniques for TM: Storage in State – Multiple Tracks – Subroutines. Variants of TM: Multitape – Nondeterministic – Enumerators. Universal Turing Machine – A language that is not Recursively Enumerable (RE) – Undecidable problems about Turing machine – Rice Theorem-Post's correspondence problem.

Total (L: 45 T:15) = 60 Periods

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 <u>SEMESTER – IV</u> Τ C

20CS412 **JAVA PROGRAMMING** 3 3

Prerequisite: Fundamentals of C programming and object oriented concepts

Course Outcomes: On Completion of this course, the student will be able to Cognitive level Apply java programming fundamentals to solve real world problem. Apply CO1: Implement the concept of overloading and inheritances. CO2: **Apply** Examine important features of java like packages, interfaces and exception Understand CO3: handling. Illustrate the features of multithreaded programming and I/O operations. Understand CO4: Demonstrate the concepts of string manipulations and database connectivity. Analyze

UNIT - I JAVA FUNDAMENTALS

[9]

The Java Buzzwords - Data Types - Variables - Arrays - Operators - Control Statements - Class Fundamentals -Declaring Objects - Methods - Method Overloading - Objects as Parameters - Returning Objects - Recursion - this keyword – Garbage Collection.

UNIT - II **CONSTRUCTORS AND INHERITANCE**

[9]

Constructors - Constructor Overloading - Access Control - static - final - Nested and Inner Class - Inheritance : Basics -Super - Multilevel - Hierarchical - Method Overriding - Abstract class - Final with Inheritance.

UNIT-III PACKAGES, INTERFACES AND EXCEPTION HANDLING

[9]

Packages - Access Protection - Importing Packages - Interfaces - Default Interface Methods - Static Methods in Interface - Exception Handling Fundamentals - Types - Uncaught Exceptions -Try and Catch - Multiple Catch - Nested Try -Throw - Throws - Finally - Array List-Wrapper Classes.

MULTITHREADED PROGRAMMING AND I/O OPERATIONS

[9]

Java Thread Model - Main Thread - Creating a Thread - Creating Multiple Threads - isAlive and join Methods - Thread Priorities - Synchronization - Interthread Communication - Suspending, Resuming, and Stopping Threads - Obtaining a Thread's State - Using Multithreading - I/O Basics - Reading Console Input - Writing Console Output - The PrintWriter Class – Reading and Writing Files – Automatically Closing a File – Scanner class.

UNIT - V STRING AND DATABASE CONNECTIVITY

[9]

The String Constructors - String Length - Character Extraction - String Comparison - Searching Strings - Modifying a String - Data Conversion using valueOf method - Methods in StringBuffer - JDBC Product Components - JDBC API -JDBC Driver Manager - JDBC Test Suite - JDBC-ODBC Bridge - JDBC Architecture - Establishing Connection - Handling SQL Exceptions.

R 2020

SEMESTER - IV

20CS413 DATABASE MANAGEMENT SYSTEMSL T P C
3 0 0 3

Prerequisite: Basic Knowledge about data structures and computer systems.

Course	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Be aware of database architecture and the relational algebra.	Understand
CO2:	Apply Structured query language to create and manipulate a relational database.	Apply
CO3:	Create functions, triggers, recursive queries and indexing.	Apply
CO4:	Demonstrate the purpose of ER Model and normalization.	Analyze
CO5:	Discover about transaction, query processing and advanced database concepts.	Understand

UNIT – I BASIC CONCEPTS AND RELATIONAL MODEL

[9]

Database System Applications – Purpose of Database Systems – Views of Data – Database Languages – Database and Application Architecture. Introduction to Relational Model: Structure of Relational Databases – Database Schema – Keys – Schema Diagrams – Relational Algebra.

UNIT – II SQL FUNDAMENTALS AND INTERMEDIATE SQL

[9]

Overview of the SQL Query Language – SQL Data Definition – Basic Structure of SQL Queries – Additional Basic Operations – Set operations – Null values – Aggregate functions – Nested Sub Queries – Modification of the Database – Join Expressions – Views – Transactions – Integrity Constraints – Authorization.

UNIT- III ADVANCED SQL, INDEXING AND HASHING

[9]

Accessing SQL from Programming Language – Functions and Procedures – Triggers – Recursive Queries – Indexing: Basic Concepts – Ordered Indices – B+ Tree Index Files – Hash Indices – Multiple-Key Access – Creation of Indices – Bitmap Indices.

UNIT – IV DATABASE DESIGN

[9]

Overview of the Design Process – The Entity-Relationship model – Complex Attributes – Mapping Cardinalities – Primary key – Functional Dependencies – Non-loss Decomposition – First, Second and Third Normal Forms, Dependency Preservation – Boyce/Codd Normal Form – Multi-valued Dependencies and Fourth Normal Form – Join Dependencies and Fifth Normal Form.

UNIT – V TRANSACTIONS, QUERY PROCESSING AND ADVANCED DATABASE CONCEPTS [9]

Transaction Concept – A Simple Transaction Model – Storage Structure – Transaction Atomicity and Durability – Transaction Isolation – Serializability – Concurrency Control – Lock-Based protocols – Query Processing overview – Spatial Database Concepts – Multimedia Database Concepts – Introduction to Deductive Databases.

Total = 45 Periods

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 SEMESTER – IV

Prerequisite: Basic Knowledge about data structures

Course	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Analyze the efficiency of algorithms.	Analyze
CO2:	Design and analyze problems using decrease, transform and conquer techniques.	Understand
CO3:	Identify optimal solution by applying dynamic techniques.	Understand
CO4:	Evaluate various backtracking, branch and bound techniques.	Evaluate
CO5:	Summarize the knowledge about P and NP problems.	Understand

UNIT – I DIVIDE AND CONQUER TECHNIQUE

[12]

Algorithm Analysis Framework – Asymptotic Notations and Basic Efficiency Classes – Analysis of Non-recursive and Recursive Algorithms – Divide and Conquer: Merge Sort – Quick Sort – Strassen's Matrix Multiplication.

UNIT – II DECREASE AND CONQUER TECHNIQUE

[12]

Depth First Search and Breadth First Search – Decrease and Conquer: Insertion sort – Binary Search – Selection Problem – Transform and Conquer: Presorting – Balanced Search Trees: AVL tree – 2-3 Tree.

UNIT- III DYNAMIC PROGRAMMING AND GREEDY TECHNIQUE

[12

Dynamic Programming: Knapsack Problem – Optimal Binary Search Trees – Warshall's Algorithm – Floyd's Algorithm – Greedy Technique: Prim's Algorithm – Kruskal's Algorithm – Dijkstra's Algorithm – Huffman Trees and Codes.

UNIT – IV BACKTRACKING, BRANCH AND BOUND TECHNIQUES

[12]

Backtracking: 8-Queens – Hamiltonian Circuit – Sum of Subset – Graph Coloring – Branch and Bound: Assignment Problem – Knapsack Problem – Traveling Salesman Problem.

UNIT – V NP PROBLEMS AND APPROXIMATION ALGORITHMS

[12

P and NP Problems – NP Complete Problems – Approximation Algorithms for NP Hard Problems – Travelling Salesman Problem: Nearest Neighbor Algorithm – Multifragment Heuristic Algorithm – Knapsack Problem.

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 SEMESTER - IV

Prerequisite: Basic knowledge in Digital Electronics

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level	
CO1:	Explain the programs based on 8085 microprocessor.	Understand	
CO2:	Practice the use of 8086 microprocessor for simple applications.	Understand	
CO3:	Illustrate the concepts of multiprocessors.	Understand	
CO4:	Design and interface devices with microprocessors.	Understand	
CO5:	Design and implement 8051 microcontroller based systems.	Understand	

UNIT - I 8085 MICROPROCESSOR [9]

Introduction – Address, data and control bus – 8085: Hardware architecture, pin diagram, addressing modes, instruction set, assembly language programming.

UNIT - II 8086 MICROPROCESSOR [9]

.8086: Hardware architecture, Pin diagram, Addressing modes, Instruction set, Interrupts and Interrupt service routines, Assembly language programming – Assembler directives – Procedures – Macros – BIOS DOS function calls.

UNIT - III MULTIPROCESSOR CONFIGURATIONS [9]

Coprocessor configuration – Closely coupled configuration – Loosely coupled configuration – Numeric data processor (8087) architecture and data types – I/O processor architecture (8089).

UNIT - IV PERIPHERAL INTERFACING [9]

Memory and I/O interfacing – Parallel communication interface (8255) – Serial communication interface (8251) – Programmable interval timer (8253) – Keyboard / display controller (8279) – Interrupt controller (8259) – DMA controller (8237) – ADC and DAC.

UNIT - V 8051 MICROCONTROLLER [9]

8051: Hardware architecture, special function register, I/O ports, external memory, addressing modes, instruction set, timers and counters, serial data I/O, interrupts – Interfacing: Keyboard, LCD, stepper motor.

K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER – IV L T P C

20CS421 JAVA PROGRAMMING LABORATORY 0 0 3

Prerequisite: Basic knowledge of object oriented concepts

Course C	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Apply the features of java to find optimal solution for the real world problems.	Apply
CO2:	Practically implement the concept of arrays, constructors, inheritance and overloading.	Apply
CO3:	Recall interface, abstract class and packages concepts.	Understand
CO4:	Outline the features of exception handling, string handling, threads and command line arguments practically.	Understand
CO5:	Examine the concept of database connectivity and to implement.	Analyze

List of Experiments:

- 1. Write a program to get n numbers in an array. Display the elements in ascending and descending order.
- 2. Write a program for student management system. Initialize the register number of the student through constructors.
- 3. Write a program for the following using inheritances
 - a) Finding area of sphere using single inheritance
 - b) Calculating performance of the students using multi-level inheritance
 - c) Students information manipulation using hierarchical inheritance
- 4. Write a program for calculating area of rectangle and triangle using interface
- 5. Write a program for employee management using packages.
- 6. Write a program for calculator operations and handle the exceptions
- 7. Write a program for manipulating strings.
- 8. Write a program using the concept of command line arguments
- 9. Write a program for threads (extending Threads class and implementing runnable interface)
- 10. Write a program to read and display the student details from the database using database connectivity

	SEMESTER - IV				
20CS422 DATABASE MANAGEMENT SYSTEMS LABORATORY			T	P	С

Prerequisite: Basic Knowledge in Data Structures.

Course	Outcomes: On Completion of this course , the student will be able to	Cognitive level
CO1:	Design and implement a database schema for real time applications.	Apply
CO2:	Populate and query a database.	Apply
CO3:	Create and maintain tables using PL/SQL.	Apply
CO4:	Utilize function and procedures on any application.	Apply
CO5:	Apply trigger and generate report.	Apply

List of Experiments:

- 1. Create and apply DDL (SQL) statements for employee /student /bank /online shopping detail sets.
- 2. Perform data manipulation using DML (SQL) statements for employee /student /bank /online shopping detail sets.
- 3. Verify DCL and TCL (SQL) statements for employee /student /bank /online shopping detail sets.
- 4. Perform all the nested, join queries and set oriented operations for employee /student /bank /online shopping detail sets.
- 5. Create and apply view for employee /student /bank /online shopping detail sets.(create, insert, update and drop)
- 6. Write PL/SQL code to display employee details using explicit cursors, implicit cursors and cursor loop.
- 7. Write a PL/SQL function to find the sum, average, minimum and maximum salary of the employee and count the number of employees in a given company name.
- 8. Write a PL/SQL procedure to calculate for the following i) factorial ii) prime or not iii) biggest of three number.
- 9. Write and implement before and after insert, update and delete triggers for employee details.
- 10. Design and implement employee payroll system form design using visual basic and generate report.

^{2:} Moderate (Medium)

^{3:} Substantial (High)

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 <u>SEMESTER - V</u>

Prerequisite: Basic knowledge about Theory of Computation.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Infer the knowledge about how to implement system software like assembler, loader and	Understand
	linker.	
CO2:	Analyze the output generated in each phase of the compiler and Construct Finite	Analyze
	Automata and apply minimization techniques.	
CO3:	Develop and analyze various top down and bottom up parsers.	Apply
CO4:	Construct intermediate code for programming constructs.	Apply
CO5:	Design and analyze code generation schemes and optimized compilers.	Create

UNIT – I ASSEMBLER, LINKER AND LOADER

[12]

Overview of Language Processors – SIC architecture – Assemblers: Functions – Data Structures – Design of Two Pass Assembler. Loaders and Linkers: Basic Loader Functions – Types of Loaders – Design of Absolute Loader – Simple Bootstrap Loader – Design of Dynamic Linking Loader.

UNIT – II COMPILER AND LEXICAL ANALYSIS

[12

The Phases of Compiler – Cousins of Compiler – The Grouping of Phases – Compiler Construction Tools – Need and Role of Lexical Analyzer – Specification and Recognition of Tokens – Lex – Converting Regular Expression to DFA(Direct and Indirect method) – Minimization of DFA.

UNIT – III SYNTAX ANALYSIS

[12]

Need and Role of the Parser – Context Free Grammar – Top Down Parsing: Recursive Descent Parser – Predictive Parser – LL(1) Parser – Bottom up parsing: Shift Reduce Parser – Operator Precedence Parser – LR Parser – Construction of SLR Parsing Table – CLR Parser – LALR Parser – Error Handling and Recovery in Syntax Analyzer – YACC.

UNIT – IV INTERMEDIATE CODE AND RUN TIME ENVIRONMENT

[12]

Intermediate Languages: Postfix Notation – Syntax tree –Three Address Code. Implementation of Three Address Code – Declarations – Assignment statements – Boolean Expressions – Case statements – Back patching – Procedure Calls. Run time environment: Source Language Issues –Storage Organizations – Storage Allocation Strategies.

UNIT – V CODE OPTIMIZATION AND CODE GENERATION

[12]

Principal Sources of Optimization – Peephole Optimization – Basic Blocks and Flow Graphs – DAG Representation of Basic Blocks – Optimization of Basic Blocks – Global Data Flow Analysis – Code Improving Transformations – Issues in a Design of Code Generator – Simple Code Generator Algorithm.

Total (L: 45 T:15) = 60 Periods

SEMESTER - V

2222512	WED DOOD AMMINO	L	- 1	Р	С
20CS512	WEB PROGRAMMING	3	0	0	3

Prerequisite: Basic knowledge about problem solving techniques.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Outline the technologies around the internet.	Understand
CO2:	Construct the idea of web designing at user interface.	Apply
CO3:	Inference the knowledge of data processing on client and server side.	Analyze
CO4:	Create the web oriented response at server side.	Create
CO5:	Design and handle the online database and web service.	Create
UNIT-I	INTRODUCTION TO WEB	[9]

Web Essentials: Clients, Servers, and Communications. The Internet – History – Basic Internet Protocols: TCP and IP – DNS – URL. The World Wide Web – HTTP: Request Message – Response Message – Web Clients – Web Servers – Case Study.

UNIT – II BASICS OF HTML AND CSS

[9]

HTML: An Introduction to HTML History and Version - Structure of HTML Page - HTML tags for data formatting - Tables - Links - Images - List - Frames - Forms - Media - HTML 5 Tags and Validation. Style Sheets: CSS Syntax and Structure - CSS Rules for Backgrounds, Colours, and Properties - Manipulating Texts, Fonts, borders and Boxes - Margin - Padding Lists - CSS Positioning. Animations - Tool tips - Wildcard Selectors in CSS - Basics of frameworks like Bootstrap.

UNIT – III CLIENT SIDE SCRIPTING

[9]

JavaScript: Syntax and Execution – Internal, embedded and External JavaScript: Variables – Arrays – Functions – Conditions – Loops – Type Conversion – Objects and DOM – Inbuilt Functions – Validation and Regular Expressions – Event Handling. JQuery: Introduction – Syntax – Selectors – Events – Effects.

UNIT-IV SERVER SIDE SCRIPTING

[9]

NODE: Getting Started – Modules – File System – Debugger – Automation and Deployment. Servlet: Servlet API – Interface – Classes – Life Cycle – Servlet Request – Request Dispatcher – ServletConfig – ServletContext – Attribute – Session Tracking. JSP: Introduction – Life Cycle – Scriptlet – Expression – Declaration – Implicit Objects – Directive Elements – JSP Exceptions – Action Elements.

UNIT –V WEB SERVICE AND DATABASE

[9]

AJAX: Introduction – XMLHttp: Request – Response – AJAX XML File. JSON: Introduction – Syntax – JSON Vs XML – JDBC: Introduction – Drivers – Driver Manager – Connection – Statement – Result Set. MongoDB: Introduction – Advantages – Database – Collection – Data Types.

Total = 45 Periods

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 SEMESTER- V

Prerequisite: Basic knowledge about Software Engineering.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Aware of the object model for System development.	Understand
CO2:	Express software design with UML diagrams.	Understand
CO3:	Identify the concept of Relationships.	Understand
CO4:	Acquire knowledge in object oriented design and protocols.	Create
CO5:	Obtain information about software quality assurance and system usability.	Apply

UNIT – I OVERVIEW OF OBJECT ORIENTED ANALYSIS AND DESIGN [9]

An Overview of Object Oriented Systems Development – Object Basics – Object Oriented System Development Life Cycle – The software development process – Building high quality software and Reusability.

UNIT – II OBJECT ORIENTED METHODOLOGIES AND MODELLING [9]

Rum Baugh Methodology – Booch Methodology – Jacobson Methodology – Patterns – Frameworks – Unified Approach – Unified Modelling Language – Class diagram – Use case diagram – Interaction Diagram – State chart Diagram – Activity diagram – Package Diagram – Implementation Diagram.

UNIT – III OBJECT ORIENTED ANALYSIS [9]

Identifying use cases – Use case model – Classification – Approaches for Identifying Classes: Noun Phrase Approach – Common Class Patterns Approach – Use case Driven approach – Classes, Responsibilities and Collaborators – Identifying Object Relationships, Attributes and Methods.

Object Oriented Design Axioms – Designing Classes – Refining attributes – Designing methods and protocols – Access Layer – Object Storage and Object Interoperability.

UNIT – V SOFTWARE QUALITY AND SYSTEM USABILITY [9]

Designing Interface Objects - Software Quality Assurance - System usability - Measuring User Satisfaction.

Total = 45 Periods

<u>SEMESTER - V</u> L Т C 20CS514 **COMPUTER NETWORKS** 3 0 3 **Prerequisite:** Basic knowledge about computer organization and architecture. Course Outcomes: On successful completion of the course, the student will be able to Cognitive Level CO1: Demonstrate the key concepts and functions of physical layer. Remember CO2: Analyze the various flow and error control techniques and identify the best method for Analyze data transmission. CO3: Design the network layer packet delivery using appropriate routing algorithms. Create CO4: Apply transport layer services using TCP or UDP protocols. Apply CO5: Identify the suitable network services for the given network applications. Analyze UNIT - I **DATA COMMUNICATIONS** [9] Data Communication: Data Representation – Data Flow-Networks: Topology – Types – Protocols and Standards – Network Models: TCP/IP - OSI Model - Transmission Media - Wired LANs: Ethernet - Standard Ethernet - Fast Ethernet - Gigabit Ethernet – Wireless LAN – IEEE 802.11 – Connecting Devices. UNIT - II **DATA LINK LAYER** [9] Introduction - Link Layer Addressing - Error Detection and Correction - Block Coding - Cyclic Codes - Checksum -Hamming Code - Data Link Control - Stop and Wait Protocol - Go Back N Protocol - Selective Repeat Protocol -Piggybacking – Medium Access Control. UNIT - III **NETWORK LAYER** [9]

K.S.R. COLLEGE OF ENGINEERING (Autonomous)

UNIT – IV TRANSPORT LAYER

[9]

R 2020

Process to Process Communication – Transport layer Protocols: User Datagram Protocol: Datagram – Services – Applications – Transmission Control Protocol: Services – Features – Segment – Connections – Congestion control – Timers.

Network Layer Services - Packet Switching - Internet Protocol - Forwarding of IP Packets - Logical Addressing: IPv4

UNIT – V APPLICATION LAYER AND NETWORK MANAGEMENT

[9]

DNS - FTP - E-MAIL: SMTP, MIME, POP3, IMAP, Web Mail - TELNET - SSH - WWW and HTTP - SNMP.

Addressing - IPv6 Addressing - Unicast Routing: RIP,OSPF and BGP - Multicast Routing: IGMP

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 SEMESTER -V L Τ C 20CS515 ENTREPRENEURSHIP DEVELOPMENT 3 0 3 **Prerequisite:** No prerequisites are needed for enrolling into the course Course Outcomes: On successful completion of the course, the student will be able to Cognitive Level CO1: Explain the fundamentals of entrepreneurial activities. Understand CO2: Describe the various practical exposure about the preparation of the business plan Analyze

CO3: Discuss the various supports from Government and other non-governmental organizations while starting an enterprise.
 CO4: Explain the fundamental concepts in the management of small Enterprises.
 Understand
 CO5: Illustrate various Entrepreneurial Development Strategies

Apply

UNIT – I INTRODUCTION [9]

Entrepreneur – Entrepreneurship – Women Entrepreneurs, Social Entrepreneurship – Family Business – Entrepreneurial Motivation – Entrepreneurial Competencies – Entrepreneurship Development programs

UNIT – II STARTUP ENTREPRENEURSHIP [9]

Micro and Small Enterprises – Opportunity Identification and Selection – Formulations of Business Plans – Project Appraisal – Financing of Enterprise – Forms of Business Ownership.

UNIT – III SUPPORT TO ENTREPRENEURS [9]

Institutional Finance to Entrepreneurs – Lease Financing and Hire Purchase – Institutional Support to Entrepreneurs – Taxation Benefits to Small-Scale Enterprises – Government Policy for Small-Scale Enterprises.

UNIT – IV ENTRPRENUERSHIP MANAGEMENT [9]

Fundamentals of Management – Working Capital Management – Inventory Management – Production Management – Marketing Management – Human Resources Management – Total Quality Management for Small-Scale Enterprises.

UNIT – V DEVELOPMENT OF ENTERPRISES [9]

Intellectual Property Rights – Growth Strategies – Sickness in Small Enterprise – E-commerce – Franchising – Social Responsibility of Business – Case Studies.

K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER – V WEB PROGRAMMING LABORATORY R 2020 L T P C 0 0 3 1

Prerequisite: Basic knowledge about problem solving techniques.

Cours	e Outcomes: On Completion of this course, the student will be able to	Cognitive level
CO1:	Design simple web pages using markup languages like HTML and XHTML.	Create
CO2:	Create dynamic web pages using DHTML and java script that is easy to navigate and use.	Create
CO3:	Program Server side web pages that have to process request from client web pages.	Create
CO4:	Represent web data using XML and develop web pages using JSP.	Create
CO5:	Deploy various web services and how these web services interact,	Analyze

LIST OF EXPERIMENTS:

20CS521

- 1. Create a web page with the following using HTML.
 - a. To embed an image in a web page.
 - b. To fix the hot spot.
 - c. Show all the related information when the hot spots are clicked.
- 2. Create a web page with all types of cascading style sheets.
- 3. Develop Client Side Scripts for Validating Web Form Controls using DHTML.
- 4. Installation of Apache Tomcat Web Server.
- 5. Write Programs in Java using Servlets.
 - a. To invoke servlets from HTML forms.
 - b. Session Tracking.
- 6. Write programs in java to create three-tier applications using JSP and Databases
 - a. For conducting on-line examination.
 - b. For displaying mark list. Assume that student information is available in a database which has been stored in a database server.
- 7. Program using XML Schema XSLT/XSL.
- 8. Program using DOM and SX Parsers.
- 9. Program using AJAX.
- 10. Consider a case where we have two web services an airline service and a travel agent. The travel agent is searching for an airline. Implement this scenario using Web Service and Database.

R 2020 K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER - VI С Т 20HS051 UNIVERSAL HUMAN VALUES AND UNDERSTANDING HARMONY **Prerequisite:** Basic knowledge about operating systems Course Outcomes: On successful completion of the course, the student will be able to Cognitive Level CO1: Explain the basic concepts of value education. Understanding Distinguish between the self and the body, implement the meaning of harmony in the Co-CO2: Understanding existence of Self and the Body. Explain the value of harmonious relationship based on trust, respect and other naturally CO3: Understanding acceptable feelings in human-human relationships. Describe the harmony in nature and existence, and work out their mutually fulfilling CO4: Understanding participation in the nature. CO5: Explain the ethical and unethical practices in work environment. Understanding UNIT - I INTRODUCTION TO VALUE EDUCATION [9] Need and Basic Guidelines of Value Education - Content and Process of Value Education - Self Exploration - purpose of

Need and Basic Guidelines of Value Education – Content and Process of Value Education – Self Exploration – purpose of self-Exploration – Content and Process of Self exploration – Natural Acceptance – Realization and Understanding – Basic Human Aspirations – Continuous Happiness and Prosperity – Exploring Happiness and Prosperity – Basic Requirement for Fulfillment of Human Aspirations – Relationships – Physical Facilities – Right Understanding.

UNIT – II HARMONY IN THE HUMAN BEING [9]

Human Begin and Body – Understanding Myself as Co-existence of Self ('I') and Body, Needs of the Self and Body, Activities in the Self and Body, Self ('I') as the Conscious Entity, the Body as the Material Entity – Exercise – Body as an Instrument – Harmony in the Self ('I) – Understanding Myself – Harmony with Body.

UNIT – III HARMONY IN THE FAMILY AND SOCIETY [9]

Harmony in the Family – Justice – Feelings (Values) in Human Relationships – Relationship from Family to Society – Identification of Human Goal – Five dimensions of Human Endeavour.

UNIT – IV HARMONY IN NATURE AND EXISTENCE [9]

Order of Nature – Interconnectedness – Understanding the Four order – Innateness – Natural Characteristic – Basic Activity – Conformance – Introduction to Space – Co-existence of units of Space – Limited and unlimited – Active and No–activity – Existence is Co-existence.

UNIT-V PROFESSIONAL ETHICS [9]

Values in different dimensions of Human Living – Definitiveness of Ethical Human Conduct –Implications of Value based Living – Identification of Comprehensive Human Goal – Humanistic Education – Universal Human Order – Competence and Issues in Professional Ethics.

Total = 45 Periods

	C# AND .NET FRAMEWORK	SEMESTER – VI C# AND .NET FRAMEWORK (Common To CS & EC)	SEMESTER – VI C# AND .NET FRAMEWORK (Common To CS & EC)	SEMESTER – VI C# AND .NET FRAMEWORK L T P

Prerequisite: Basic Knowledge of object oriented programming

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Solve the basic problems using object and classes in C#.	Understand
CO2:	Explain the concepts of OOPs.	Understand
CO3:	Design application programs using .Net Components.	Apply
CO4:	Design website using ASP .Net.	Apply
CO5:	Build a server and client with an interface.	Apply
UNIT – I	.NET FRAMEWORK	[9]

.NET Overview – The Common Language Runtime – .NET Programming – Working with .NET Components – Data and XML – Web Services – Web Forms.

UNIT – II BASICS OF C# [9]

Overview of C# – Literals, Variables and Datatypes – Operators and Expressions – Decision Making and Branching – Decision Making and Looping – Methods in C# – Handling Arrays – Manipulating Strings – Structures and Enumerations

UNIT –III OOPs in C# [9]

Classes and Objects – Inheritance and Polymorphism – Interface: Multiple Inheritance – Operator Overloading – Delegates and Events – Managing Console I/O Operations – Managing Errors and Exceptions

UNIT – IV WEB BASED APPLICATION DEVELOPMENT ON .NET [9]

Introducing ASP.NET and the .NET Platform – ASP.NET Basics – Constructing ASP.NET Web Pages – Building Web Applications – Using the Validation Controls

UNIT – V .NET WITH DATABASE CONNECTIVITY [9]

Database Design and Development – Speaking SQL – ADO.NET – Displaying Content Using Data Lists – Managing Content Using Grid view and Details View – Advanced Data Access – Security and User Authentication.

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 <u>SEMESTER – VI</u>

Prerequisite: Basics of computer Networks and Mathematical Function

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Interpret OSI security architecture and classical encryption techniques.	Understand
CO2:	Illustrate fundamental knowledge on the concepts of finite fields and number theory.	Understand
CO3:	Identify various block cipher and stream cipher models.	Apply
CO4:	Inspect public key cryptosystems, hash functions and digital signature.	Understand
CO5:	Prioritize system security, e-mail, IP and web security.	Understand

UNIT - I ENCRYPTION TECHNIQUES AND NUMBER THEORY

[9]

Services, Mechanisms and Attacks – OSI Security Architecture - Network Security Model – Classical Encryption Techniques. Finite Fields and Number Theory: Groups – Rings – Fields – Modular Arithmetic – Euclid's Algorithm – Finite Fields – Prime Numbers – Fermat's and Euler's Theorem –Testing for Primarily – Chinese Remainder Theorem.

UNIT - II BLOCK CIPHERS AND PUBLIC KEY CRYPTOGRAPHY

[9]

Data Encryption Standard – Block Cipher Principles – Block Cipher Modes of Operation – Advanced Encryption Standard (AES) – Triple DES – Blowfish – RC5 Algorithm. Public Key Cryptography: Principles of Public Key Cryptosystems – RSA Algorithm – Key Management – Diffie Hellman Key Exchange – Elliptic Curve Arithmetic – Elliptic Curve Cryptography.

UNIT - III HASH FUNCTIONS AND DIGITAL SIGNATURES

[9]

Authentication Requirement – Authentication Function – MAC – Hash Function – Security of Hash Function and MAC – MD5 – SHA – HMAC – CMAC – Digital Signature and Authentication Protocols – DSS.

UNIT - IV SECURITY PRACTICE AND SYSTEM SECURITY

[9]

Kerberos – X.509 Authentication Services – Internet Firewalls for Trusted System: Roles of Firewalls – Firewall Related Terminology – Types of Firewalls – Firewall Designs – Intruder – Intrusion Detection System – Virus and Related Threats – Countermeasures – Firewalls Design Principles – Trusted Systems.

UNIT - V WEB SECURITY SERVICES

[9]

E-mail Security: Pretty Good Privacy - S/MIME - IP Security: Overview of IPSec - IP Security Policy - Encapsulating Security Payload - Internet Key Exchange - Transport - Level Security - Web Security Considerations - Secure Socket Layer - Transport Layer Security - HTTPS - DNS

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 SEMESTER – VI

20CS612 SOFTWARE TESTING

L T P C
3 0 0 3

Prerequisite: Basic knowledge about Software Engineering.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Design test cases suitable for a software development for different domains.	Understand
CO2:	Identify suitable tests to be carried out.	Understand
CO3:	Prepare test planning based on the document.	Understand
CO4:	Document test plans and test cases designed.	Understand
CO5:	Use automated testing tools and Selenium.	Apply

UNIT – I BASIC CONCEPTS OF SOFTWARE TESTING

[9]

Testing as an Engineering Activity – Testing as a Process – Testing Maturity Model –Testing Axioms – Basic Definitions – Software Testing Principles – Tester's Role in a Software Development Organization – Origins of Defects – Cost of defects – Defect Classes .

UNIT – II TEST CASE DESIGN STRATEGIES

[9

Test case Design Strategies – Using Black Box Approach to Test Case Design – Boundary Value Analysis – Equivalence Class Partitioning – State Based Testing – Cause-Effect Graphing – Compatibility Testing – User Documentation Testing – Requirements Based Testing – Using White Box Approach to Test Design – Test Adequacy Criteria – Static Testing vs. Structural Testing – Code Functional Testing – Coverage and Control Flow Graphs – Covering Code Logic – Paths – Code Complexity Testing.

UNIT – III LEVELS OF TESTING

[9]

Need for Levels of Testing – Unit Test – Unit Test Planning – Designing the Unit Tests – The Test Harness – Running the Unit tests and Recording Results – Integration Tests – Designing Integration Tests – Integration Test Planning – Scenario Testing – Defect Bash Elimination System Testing – Acceptance Testing – Performance Testing – Regression Testing – Internationalization Testing – Alpha, Beta Tests – Usability and Accessibility Testing – Configuration Testing.

UNIT – IV TEST MANAGEMENT

[9]

People and Organizational Issues in Testing – Organization Structures for Testing Teams – Testing Services – Test Planning – Test Plan Components – Test Plan Attachments – Locating Test Items – Test Management – Test Process – Reporting Test Results – Introducing the Test Specialist – Skills Needed by a Test Specialist – Building a Testing Group – Structure of Testing Group.

UNIT- V TEST AUTOMATION AND SELENIUM

[9]

Software Test Automation – Skills Needed for Automation – Scope of Automation – Design and Architecture for Automation – Requirements for a Test Tool – Challenges in Automation – Test Metrics and Measurements – Project, Progress and Productivity Metrics – Introduction to Selenium – Using Selenium IDE for Automation Testing – Using Selenium Web Driver for Automation Testing – Understanding Testing Framework with Selenium Web Driver for Automation Testing.

SEMESTER - VI

Prerequisite: Basic knowledge of Java programming.

Course	Outcomes: On Completion of this course, the student will be able to	Cognitive level
CO1:	Recognize the use of C#.	Understand
CO2:	Build simple programming concepts using .Net.	Understand
CO3:	Demonstrate the use of various controls in .Net.	Apply
CO4:	Develop simple applications using ASP.Net.	Apply
CO5:	Create and deploy a simple online application.	Apply

LIST OF EXPERIMENTS:

- 1. Write a C# Program for the Following in Console Application
 - a. Inheritance
 - b. Interface
 - c. Polymorphism
- 2. Write a C # for String Handling in Console Application
- 3. Implement a C# Program to Find Volume of Cube and Cuboid Using Delegates.
- 4. Write a Program in C# to demonstrate Operator overloading.
- 5. Write a program in C# to demonstrate the usage of object and class.
- 6. Create a webpage to implement all validation controls in ASP.Net.
- 7. Program with ASP.Net by Connecting With SQL.
 - a. Create Login Form to Enter Into Website.
 - b. Building Web Form that Displays Data from a Database.
- 8. Create a Website Using Master Page Concept in ASP.Net.
- 9. Create a Webpage to implement Application and Session States in ASP.Net.
- 10. Create a Website for Online Movie Ticket Reservation System Using Session Concept.

SEMESTER - VI

		L		Р	С
20CS622	MINI PROJECT				
		Λ	Λ	6	2

Prerequisite: Basic knowledge of Java programming.

Course (Outcomes: On Completion of this course, the student will be able to	Cognitive level
CO1:	Formulate a real world problem, identify the requirement and develop the design solutions.	Understand
CO2:	Identify technical ideas, strategies and methodologies.	Understand
CO3:	Utilize the new tools, algorithms, techniques that contribute to obtain the solution of the project.	Analyze
CO4:	Test and validate through conformance of the developed prototype and analysis the cost effectiveness.	Apply
CO5:	Prepare report and present oral demonstrations.	Create

GUIDELINES:

- 1. Each Student can undergo project work, either Individual / Group, based on Society, Application, Software, Hardware, Research, Innovation, Industry, etc., with the guidance of reputed Journals and Articles.
- 2. Project Team will be supervised by subject / industrial experts based on their Area of specialization
- 3. Each student will undertake a sizeable project involving survey of literature.
- 4. Contact Hours shall be allotted in the timetable and this time shall be utilized by the students to receive the directions from the guide, on library reading, laboratory work, and computer analysis of field work as assigned by the guide and also to presenting periodical seminars on the progress made in the project.
- 5. The aim of the project work is to deepen comprehension of principles by applying them to a new problem which may be the design and manufacture of a device, a research investigation, a computer or management project or a design problem.
- 6. The student should implement and develop systems by selecting appropriate techniques based on its performance.
- 7. The progress of the project is evaluated based on a minimum of three reviews.
- 8. The student should have to write the reports under respective regulation along with the guidance of faculty members / industry experts.
- 9. Project Report + Number of Project report to be submitted = No. of Students in the Batch + Guide + Department Library + College Library

R 2020 K.S.R. COLLEGE OF ENGINEERING (Autonomous) <u>SEMESTER – VI</u>

L Τ C 20HR634 **CAREER DEVELOPMENT SKILLS – IV** 2 0 n

Prerequisite: No prerequisites are needed for enrolling into the course

Course	Cognitive Level	
CO1:	Employ critical thinking in personal interviews type situations.	Apply
CO2:	Understand the Quantitative Aptitude problems in geometry.	Understand
CO3:	Understand the data interpretation and analysis by using various graphs.	Understand
CO4:	Enhance the skills in resume writing and presentation.	Create
CO5:	Enhance the comprehension Skills in core subjects.	Apply

UNIT - I WRITTEN AND ORAL COMMUNICATION - PART 2

[6]

Self-Introduction - GD - Personal Interview Skills Practices on Reading Comprehension Level 2 - Paragraph Writing -Newspaper and Book Review Writing - Skimming and Scanning - Interpretation of Pictorial Representations - Sentence Completion - Sentence Correction - Jumbled Sentences - Synonyms & Antonyms - Using the Same Word as Different Parts of Speech – Editing.

UNIT - II **QUANTITATIVE APTITUDE**

[6]

Geometry - Straight Line - Triangles - Quadrilaterals - Circles - Co-ordinate Geometry - Cube - Cone - Sphere.

UNIT - III DATA INTERPRETATION AND ANALYSIS

[6]

Data Interpretation based on Text – Data Interpretation based on Graphs and Tables. Graphs Column Graphs, Bar Graphs, Line Charts, Pie Chart, Graphs representing Area, Venn Diagram & Flow Charts.

UNIT - IV RESUME WRITING & PRESENTATION SKILLS

[6]

An Introduction to the Resume – Types of Resumes – Common Resume Errors – Anatomy of a Resume – What is a Cover Letter? - Types of Cover Letters - Enhancing the Language and Style of Your Resume and Cover Letter - Assessment.

Presentation Skills: Oral presentation and public speaking skills; business presentations. - Understand the Situation -Know Your Tools – Know Yourself – Organize it, Write the Script – Practice – Delivering a Presentation.

DOMAIN PROFICIENCY

[6]

JAVA: Java Buzzwords - Access Control - Inheritance - Packages - Exceptions - String - Threads.

SEMESTER - VII

20CS711 MOBILE COMPUTING L T P C 3 0 0 3

Prerequisite: Basic knowledge of Computer Networks.

Course	Outcomes: Upon Completion of the course, the students should be able to	Cognitive Level
CO1:	Explain the basics of mobile telecommunication system.	Understand
CO2:	Illustrate the generation of telecommunication systems in wireless network.	Understand
CO3:	Determine the functionality of MAC, network layer and Identify a routing protocol for a given Ad hoc network.	Apply
CO4:	Explain the functionality of mobile adhoc wireless networks.	Understand
CO5:	Develop a mobile application using android, blackberry, iOS and Windows.	Apply

UNIT – I FUNDAMENTALS OF MOBILE COMPUTING

[9]

R 2020

Introduction to Mobile Computing – Mobile Computing Vs Wireless Networking – Mobile Computing Applications – Characteristics of Mobile computing – Structure of Mobile Computing Application – Mobile Wireless Transmission – MAC: SDMA – FDMA – TDMA – CDMA.

UNIT – II MOBILE TELECOMMUNICATION SYSTEM

[9]

Introduction to Cellular Systems – GSM – Services and Architecture – Protocols – Connection Establishment – Frequency Allocation – Routing – Mobility Management – Security – GPRS – UMTS – Architecture – Handover – Security – 3G wireless systems

UNIT- III MOBILE NETWORK AND TRANSPORT LAYER

[9]

Infra-Red Vs. Radio Transmission – Infrastructure and Adhoc Network – Mobile IP – Mobile Adhoc Networks – Traditional TCP and classical TCP improvements.

UNIT – IV MOBILE ADHOC WIRELESS NETWORKS

[9]

Adhoc Basic Concepts – Characteristics – Applications – Design Issues – Routing – Essential of Traditional Routing Protocols – Popular Routing Protocols – Vehicular Ad Hoc networks (VANET) – MANET Vs VANET – Security.4G Vision – 4G Features and Challenges – Applications of 4G. 4G Technologies – LTE FDD Vs TDD comparison – 5G wireless systems.

UNIT – V MOBILE PLATFORMS AND APPLICATIONS

[9

Mobile Device Operating Systems – Special Constrains and Requirements – Commercial Mobile Operating Systems – Software Development Kit: Android, BlackBerry, Windows Phone – M-Commerce – Structure – Pros and Cons – Mobile Payment System – Security Issues.

Total = 45 Periods

Text Books:

- Prasant Kumar Pattnaik, Rajib Mall, Fundamentals of Mobile Computing, PHI Learning Pvt. Ltd, New Delhi, Second Edition, 2016.
- 2 Jochen H. Schller, Mobile Communications, Pearson Education, New Delhi, Second Edition, 2012.

- 1 Hassan & Mahbub, wireless and mobile networking, Taylor and Francis Ltd, Oxford shire, United Kingdom, First Edition, 2022.
- 2 Samson Colon, Wireless Networks and Communications, Willford Press, USA, First Edition, 2019
- 3 Iti Saha Misra, Wireless Communication and Networks 3G and Beyond, Mc Graw Hill Education, New Delhi, Second Edition, 2013.
- 4 http://developer.android.com/index.html.

Regulation: R 2020

Course Code: 20CS711 Course Name: MOBILE COMPUTING

СО	Course Outcomes						Prog	ramm	e Outo	comes	3				
CO	Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	Explain the basics of mobile telecommunication system.	3	3	3	3	3	ı	ı	ı	2	-	2	3	3	3
CO2	Illustrate the generation of telecommunication systems in wireless network.	3	2	2	3	3	ı	ı	ı	2	-	2	3	3	3
CO3	Determine the functionality of MAC, network layer and Identify a routing protocol for a given Ad hoc network.	3	3	2	3	3	ı	ı	ı	1	-	3	3	3	3
CO4	Explain the functionality of mobile adhoc wireless networks.	3	3	3	2	3	ı	ı	ı	2	-	2	3	3	3
CO5	Develop a mobile application using android, blackberry, iOS and Windows.	3	3	3	3	3		1	1	2	-	2	3	3	3

R 2020

SEMESTER-VII

20.00742	ODADUJOS AND MULTIMEDIA	L	T	Ρ	С
20CS712	GRAPHICS AND MULTIMEDIA	3	0	0	3

Prerequisite: Basic C language, linear algebra, geometry and calculus.

Course	Course Outcomes : On successful completion of the course, the student will be able to							
CO1:	Comprehend the basic about graphics and different display systems	Remember						
CO2:	Examine algorithms for generating different 2-D graphical objects like circle, line, ellipse and polygon filling.	Understand						
CO3:	Apply two dimensional transformations and clipping techniques.	Apply						
CO4:	Apply three dimensional transformations and surface detection and rendering methods.	Apply						
CO5:	Analyze about overview of multimedia systems.	Understand						

UNIT - I OVERVIEW OF GRAPHICS SYSTEMS

[9]

Introduction of Computer Graphics and its Applications – Video Display Devices: Refresh Cathode – Ray Tubes – Raster Scan Displays – Random Scan Displays – Color CRT Monitor – Direct-View Storage Tubes – Flat Panel Displays – Raster Scan Systems – Random-Scan Systems – Input Devices – Hard-Copy Devices – Graphics Software.

UNIT - II GEOMETRIC DISPLAY PRIMITIVES AND ATTRIBUTES

[9]

Points and Lines - Line Drawing Algorithms: Line Equations - DDA Algorithm - Bresenham's Line Algorithm - Loading the Frame Buffer - Line Function - Circle Generating Algorithms: Properties of Circles - Mid-Point Circle Algorithm - Ellipse Generating Algorithms: Properties of Ellipses - Midpoint Ellipse Algorithm - Filled-Area Primitives.

UNIT - III 2D TRANSFORMATION AND CLIPPING

[9]

Two-Dimensional Geometric Transformations – Basic Transformations – Matrix Representations and Homogeneous Coordinates – Composite Transformations: Translations – Rotations – Scalings – General Pivot-Point Rotation – General Fixed-Point Scaling. Two Dimensional Viewing: The Viewing Pipeline – Clipping Operations: Point Clipping – Line Clipping: Cohen-Sutherland Line Clipping – Liang-Barsky Line Clipping – Polygon Clipping: Sutherland – Hodgman Polygon Clipping – Curve Clipping.

UNIT - IV 3D TRANSFORMATION AND RENDERING

[9]

Three-Dimensional Transformation: Translation – Rotation: Coordinate – Axis Rotations – Scaling. Three-Dimensional Viewing: The Viewing Pipeline. Visible Surface Detection Methods: Classification of Visible – Surface Detection Algorithms – Back Face Detection, Depth Buffer Method. Illumination Models: Light Sources – Basic Illumination Models: Ambient Light – Diffuse Reflection – Specular Reflection and the Phong Model – Polygon Rendering Methods.

UNIT - V MULTIMEDIA SYSTEMS

[9]

Multimedia Elements – Multimedia Applications – Multimedia System Architecture – Evolving Technologies for Multimedia Systems – Defining Objects for Multimedia Systems – Multimedia Databases – Multimedia input/output technologies – Digital voice and Audio – Video images and animation.

Total = 45 Periods

SEMESTER - VII

Τ С 20CS713 **CLOUD AND BIG DATA ANALYTICS** 3 0 3 U

Prerequisite: Basic knowledge in database management and distributed systems.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Infer about Cloud Basics	Remember
CO2:	Brief roughly cloud programming and security	Understand
CO3:	Summarize about big data and its concepts	Remember
CO4:	Capable to sum-up Big data analytics	Apply
CO5:	Identify the concept of clustering	Understand
UNIT – I	ERA OF CLOUD COMPUTING	[9]

Motivations for Cloud - Elastic Computing - Cloud Types - Cloud infrastructure and Virtualization - Data centre Infrastructure and Equipment

UNIT - II **CLOUD PROGRAMMING PARADIGMS**

Map Reduce Paradigm - Microservices - Controller-Based Management Software - DevOps - Cloud Security and Privacy.

UNIT - III **OVERVIEW OF BIG DATA AND ITS CONCEPTS**

Understanding Big Data - 3Vs of Big Data - Big Data Infrastructure - Big Data Storage Concepts - NoSQL Database -Big Data Processing and Management Concepts - Apache Hadoop - HBASE - SQOOP - Hive Architecture - Hadoop Distributions

UNIT - IV **BIG DATA ANALYTICS**

[9]

Terminology of Big Data Analytics - Big Data Analytics Techniques - Big Data Real-Time Analytics Processing - Big Data Analytics with Machine Learning – Mining Data Streams and Frequent Itemset.

UNIT - V **CLUSTER ANALYSIS AND VISUALIZATION**

[9]

Clustering - Expectation Maximization Clustering Algorithm - Optimization Algorithm - Fuzzy Clustering - Big Data Visualization - Tableau - R.

Total = 45 Periods

SEMESTER - VII

2000724	CDADUICE AND MULTIMEDIA LADODATORY	L	I	Р	C
20CS721	GRAPHICS AND MULTIMEDIA LABORATORY	0	0	3	1

Prerequisite: : Basic C language, linear algebra, geometry and calculus.

Course	Cognitive Level	
CO1:	Apply geometric, mathematical and algorithmic concepts necessary for programming computer graphics.	Apply
CO2:	Apply various line Drawing and clipping algorithms.	Apply
CO3:	Identify the Concepts of 2D and 3D object representation.	Understand
CO4:	Apply different realizations of multimedia tools.	Apply
CO5:	Develop interactive animations using multimedia tools.	Apply

List of Experiments:

- 1. Implementation of line drawing algorithm. a) DDA b) Bresenham's Line Algorithm.
- 2. Implementation of Mid-Point Circle Algorithm for drawing circle.
- 3. Implementation of Mid-Point Ellipse Algorithm for drawing ellipse.
- 4. Implementation of 2D transformations: Translation, Rotation and Scaling.
- 5. Implementation of Cohen Sutherland line clipping algorithm.
- 6. Implementation of Liang Barsky Line Clipping.
- 7. Implementation of 3D transformations: Translation, Rotation and Scaling.
- 8. Create a UI design using Adobe Photoshop.
- 9. Create a logo design using Adobe Illustrator.
- 10. Create a Bouncing Ball using Key frame animation and path Animation.

K.S.R. COLLEGE OF ENGINEERING (Autonomous) R 2020 SEMESTER - VII

Prerequisite: Basic knowledge of database management system, data warehousing and data mining.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Identify the working of various working environment and web applications.	Apply
CO2:	Work on cluster concepts.	Apply
CO3:	Write program on Hadoop concepts.	Create
CO4:	Compose file management tasks.	Create
CO5:	Create database using HIVE and working of R packages.	Create

List of Experiments

- 1. Install Virtual box/VMware Workstation with different flavors of Linux or windows OS on top of windows 10.
- 2. Install Google App Engine. Create hello world app and other simple web applications using python/java.
- 3. Find a procedure to transfer the files from one virtual machine to another virtual machine.
- 4. Install Hadoop single node cluster and run simple applications like word count.
- 5. Word Count Map Reduce program to understand Map Reduce Paradigm.
- 6. Implementing Matrix Multiplication with Hadoop Map Reduce.
- 7. a. Run the Pig Latin Scripts to find Word Count
 - b. Run the Pig Latin Scripts to find a max temp for each and every year.
- 8. Implement the following file management tasks in Hadoop:
 - i. Adding files and directories
 - ii. Retrieving files
 - iii. Deleting files

Hint: A typical Hadoop workflow creates data files (such as log files) elsewhere and copies them into HDFS using one of the above command line utilities.

- 9. a. Installation of HIVE
 - b. Use Hive to create, alter, and drop databases, tables, views, functions, and indexes.
- 10. a. Installing R and packages in R
 - b. Creating matrix and manipulating matrix in R.

DISTRIBUTED SYSTEMS
20CS561 (PROFESSIONAL ELECTIVE - I)

L T P C 3 0 0 3

R 2020

Prerequisite: Basic knowledge about operating systems

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Identify the problems in developing distributed applications.	Understand
CO2:	Discover feasibilities and impossibilities in managing resources.	Apply
CO3:	Analyze the necessity of consistency and replication.	Analyze
CO4:	Attain information about transactions concurrency control and distributed transactions	Understand
CO5:	Acquire knowledge about distributed object and file systems.	Understand

UNIT – I OVERVIEW OF DISTRIBUTED SYSTEMS

[9]

Introduction – Examples of Distributed Systems – Resource Sharing and Web – Challenges – API for Internet Protocol – External Data Representation and Marshalling – Remote Procedure Call – Communication Between Distributed Objects – Client Server Communication – Group Communication.

UNIT – II PROCESS AND SYNCHRONIZATION

[9]

Processes – Threads – Communication and Invocation – Clocks, Events and Process States – Synchronization : Physical Clocks – Logical Time and Logical Clocks – Global States – Distributed Mutual Exclusion – Elections – Distributed Transactions.

UNIT – III CONSISTENCY AND REPLICATION

[9]

Introduction – Data Centric Consistency Models – Client Centric Consistency Models – Distribution Protocols – Consistency Protocols – Casually Consistent – Lazy Replication.

UNIT – IV CONCURRENCY CONTROL AND DISTRUBUTED TRANSACTIONS

[9]

Transactions and Concurrency Control: Introduction – Transactions – Nested Transactions – Locks – Optimistic Concurrency Control – Timestamp Ordering – Comparison of Methods for Concurrency Control. Distributed Transactions: Introduction – Flat and Nested Distributed Transactions – Atomic Commit Protocols – Concurrency Control in Distributed Transactions – Distributed Deadlocks – Transaction Recovery.

UNIT – V DISTRIBUTED OBJECT AND FILE SYSTEMS

[9]

Distributed Object Based System – CORBA – COM+ – Distributed File System – Sun NFS – Andrew File System – Distributed Coordination Based System – JINI.

Total = 45 Periods

CO2:	Apply the procedures to achieve a safe working environment in line with health and safety regulation.	Apply	
CO3:	Outline the Key Concepts of Service Management of IT-enabled services	Understand	
CO4:	Recognize an IT Infrastructure and Security mechanism	Understand	
CO5:	Implement the policies in Microsoft 365.	Apply	
UNIT – I	IT OPERATIONS	[9]	

Evolution of Technologies – IT Operations Introduction – Policies – Roles – Support – Procedures for Managing Problems and Incidents

UNIT- II SECURE WORKING ENVIRONMENT AND ETIQUETTE [9]

Introduction – Safety Enforcement – National Standards – Safety Compliance – Health and Safety Awareness – Components of Etiquette – Professionalism and Ethics – Etiquette Standards – Email Communication – Business Meetings, Grooming and Personal Attire – Dining Etiquette.

UNIT- III ITIL [9]

Introduction – Understanding ITIL Guiding Principles in an Organization – Optimize and Automate – Four Dimensions of Service Management – Key Activities of the Service Value Chain.

UNIT – IV IT INFRASTRUCTURE AND INFORMATION SECURITY [9]

IT Infrastructure – Hardware, Software, Network – IT Infrastructure Types – Designing, Maintenance – Risks faced by Computer Systems and Networks – Analyzing Security Problems – Standard Security Mechanism

UNIT – V AMS AND TOOLS [9]

Introduction – Support Models – Activities Type – Audits – Microsoft 365 – Domain Management – Licensing – Managing Teams – Meeting Policies – Messaging Policies.

<u>SEMESTER – V</u>

20CS563

DATA WAREHOUSING AND DATA MINING
L T P C
(PROFESSIONAL ELECTIVE - I)
3 0 0 3

Prerequisite: Basic knowledge of Database Management Systems.

Course	Cognitive Level	
CO1:	Demonstrate a Data warehouse system to perform business analysis with OLAP tools	Understand
CO2:	Decide suitable pre-processing and visualization techniques for data analysis	Evaluate
CO3:	Apply frequent pattern and association rule mining techniques for data analysis	Apply
CO4:	Apply appropriate classification and clustering techniques for data analysis	Apply
CO5:	Design a real-time application using recent data mining software	Create

UNIT – I BASICS OF DATA WAREHOUSE

[9]

Basic Concepts – Data Warehouse Modeling – Data Warehouse Design and Usage – Data Warehouse Implementation – Data Generalization by Attribute Oriented Induction.

UNIT- II DATA MINING AND DATA PREPROCESSING

[9]

Data Mining: Introduction – Kinds of Data – Data Mining Functionalities – Classification of Data Mining Systems – Data Mining Task Primitives – Data Mining Applications – Major Issues in Data Mining – Data Preprocessing – Data Cleaning – Data Integration – Data Reduction – Data Transformation and Data Discretization.

UNIT-III ASSOCIATION RULE MINING

[9]

Mining Frequent Patterns, Associations and Correlations: Basic Concepts – Frequent Item set Mining Methods – Pattern Evaluation Methods – Pattern Mining in Multilevel – Multidimensional Space – Constraint Based Frequent Pattern Mining – Mining High Dimensional Data and Colossal Patterns.

UNIT – IV CLASSIFICATION TECHNIQUES

[9

Basic Concepts – Decision Tree Induction – Bayes Classification Methods – Rule Based Classification – Techniques to Improve Classification Accuracy – Classification by Backpropagation – Support Vector Machine – Classification Using Frequent Patterns – Lazy Learners – Other Classification Methods.

UNIT- V CLUSTER ANALYSIS AND DATA MINING TOOLS

[9]

Cluster Analysis – Requirements for Cluster Analysis – Clustering Methods – Partitioning Methods – Hierarchical Methods – Density Based Methods – Grid Based Methods – Model Based Clustering Methods – Machine Learning with Open Source and Commercial Software – Machine Learning with WEKA – XLMiner.

 20CS564
 OPEN SOURCE TECHNOLOGIES
 L
 T
 P
 C

 (PROFESSIONAL ELECTIVE - I)
 3
 0
 0
 3

Prerequisite: Basic knowledge of Operating Systems and Database management systems.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Comprehend the need of open source software's.	Understand
CO2:	Develop skills in analyzing the usability of My SQL.	Create
CO3:	Generate an application based upon the concepts of PHP.	Apply
CO4:	Implement python programming to construct small to large scale applications.	Create
CO5:	Develop hands on experience using Perl concepts.	Apply

UNIT – I INTRODUCTION TO OPEN SOURCES

[9]

Introduction to Open Sources – Need of Open Sources – Advantages of Open Sources – Application of Open Sources – Open Source Operating Systems: LINUX: Introduction – General Overview – Kernel Mode and User Mode – Development with Linux.

UNIT – II MYSQL TECHNIQUES

[9]

Introduction – Setting up Account – Record Selection Technology – Working with Strings – Date and Time – Sorting Query Results – Generating Summary – Working with Metadata – Using Sequences.

UNIT – III WORKING WITH PHP

[9]

Introduction – Programming in Web Environment – Variables – Constants –Data; Types – Operators – Statements – Functions – Arrays – OOP – String Manipulation and Regular Expression – File Handling and Data Storage – PHP and SQL Database – PHP and LDAP – PHP Connectivity – Sending and Receiving E-mails.

UNIT – IV PYTHON CONDITIONS AND FUNCTIONS

[9]

Syntax and Style – Python Objects – Numbers – Sequences – Strings – Lists and Tuples – Dictionaries – Conditionals and Loops – Files – Input and Output – Errors and Exceptions – Functions – Modules – Classes and OOP – Execution Environment.

UNIT – V PERL STRUCTURES AND MODULES

[9]

Perl Backgrounder – Perl Overview – Perl Parsing Rules – Variables and Data – Statements and Control Structures – Subroutines – Packages and Modules – Working with Files – Data Manipulation.

SEMESTER -V

20CS565 ADVANCED DATABASE TECHNOLOGY L T P C (PROFESSIONAL ELECTIVE - I) 3 0 0 3

Prerequisite: Basic knowledge of database management systems.

Course	Outcomes: On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Design relational database systems using ER and normalization.	Analyze
CO2:	Apply the concepts of parallel and distributed databases.	Apply
CO3:	Use object-oriented technologies and XML to design relational databases.	Analyze
CO4:	Design relational databases using advanced models.	Analyze
CO5:	Acquire the knowledge in advanced indexing, application development and Blockchain	Understand
	databases.	

UNIT - I RELATIONAL MODEL ISSUES

[09]

ER Model: overview of database design process – Entity-Relationship model – Complex Attributes – Mapping Cardinalities – Primary key – Removing Redundant Attributes in Entity Sets Reducing E-R diagrams to Relation Schemas – Extended E-R Feature. Normalization: Features of Good Relational Designs –Decomposition using Functional dependencies – Functional Dependency Theory – INF, 2NF, 3NF & BCNF– Decomposition Using Multivalued Dependencies.

UNIT - II PARALLEL AND DISTRIBUTED DATABASES

[09]

Database System Architectures: Centralized and Client-Server Architectures – Server System Architectures – Parallel Systems– Distributed Systems – Transaction processing in parallel and Distributed Systems. Parallel and Distributed Storage: Overview – Data partitioning – Dealing with skew in partitioning – Replication. Parallel and Distributed Transaction Processing: Distributed Transactions – Commit protocols.

UNIT - III OBJECT-RELATIONAL AND XML

[09

Overview of Object Database Concepts – Object Database Extensions to SQL – The ODMG Object Model and the Object Definition Language ODL – Object Database Conceptual Design – The Object Query Language OQL. XML and Internet Databases: Structured, Semi structured, and Unstructured Data – XML Hierarchical (Tree) Data Model – XML Documents, DTD, and XML Schema – Storing and Extracting XML Documents from Databases – XML Languages – Extracting XML Documents from Relational Databases.

UNIT - IV ADVANCED DATABASE MODELS AND APPLICATIONS

[09]

Enhanced Data Models for Advanced Applications: Active Database Concepts and Triggers –Temporal Database Concepts – Spatial Database Concepts – Multimedia Database Concepts – Introduction to Deductive Databases. Overview of Data Mining Technology – Applications of Data Mining – Commercial Data Mining Tools – Overview of Data Warehousing – Introduction, Definitions and Terminology – Characteristics of Data Warehouses – Mobile Databases.

UNIT - V ADVANCED INDEXING AND BLOCKCHAIN

[09]

Advanced Indexing Techniques: Bloom Filter – Log-Structured Merge Tree and Variants – Bitmap Indices – Indexing of Spatial Data. Advanced Application Development: Performance Tuning – Performance Benchmarks. Blockchain Databases: Overview – Blockchain Properties – Achieving Blockchain Properties via Cryptographic Hash Functions – Consensus – Data Management in a Blockchain – Smart Contracts – Performance Enhancement – Emerging Applications.

K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER – V 20CS566 ARTIFICIAL INTELLIGENCE AND EXPERT SYSTEMS (PROFESSIONAL ELECTIVE - I) Rever equivalent to Pagin Imposed of a relation to charging as

Prerequisite: Basic knowledge of problem solving techniques.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Describe agents structure and predict appropriate uninformed search algorithms for any Al problem	Understand
CO2:	Illustrate appropriate AI methods to solve a given problem.	Apply
CO3:	Explain a problem using first order and predicate logic.	Analyze
CO4:	Use planning algorithms and illustrate about learning	Apply
CO5:	Describe about expert systems.	Understand

UNIT – I FUNDAMENTALS OF ARTIFICIAL INTELLIGENCE

[9]

Intelligent Agents – Agents and environments – Good behavior – Nature of environments – Structure of agents – Problem Solving: Problem solving agents – Example problems – Searching for solutions – Un-informed search strategies – Avoiding repeated states – Searching with partial information

UNIT – II INFORMED SEARCHING TECHNIQUES

[9]

Informed search and exploration – Informed search strategies – Heuristic function – Local search algorithms and optimistic problems – Constraint Satisfaction Problems – Backtracking search – Structure of problems – Adversarial Search – Games – Optimal decisions in games – Alpha-Beta Pruning.

UNIT – III LOGICAL REASONING

[9]

First order logic – Representation revisited – Syntax and semantics for first order logic – Using first order logic – Knowledge engineering in first order logic – Inference in First order logic – Prepositional versus first order logic – Unification and lifting – Forward chaining – Backward chaining – Resolution – Knowledge representation.

UNIT- IV PLANNING AND LEARNING

[9]

Planning Problem – Planning with state – space search – Partial-order planning – Planning graphs – Planning and acting in the real world: Time schedules and resources – Learning from observation – Inductive learning – Decision trees – Explanation based learning.

UNIT – V EXPERT SYSTEMS

[9]

Expert Systems – Architecture of Expert Systems – Roles of Expert Systems – Knowledge Acquisition – Typical Expert Systems – MYCIN – Expert Systems Shells.

Total = 45 Periods

R 2020

SEMESTER - VI

GREEN COMPUTING
20CS661 (PROFESSIONAL ELECTIVE - II)

L T P C 3 0 0 3

Prerequisite: Basics of Environmental Science and Engineering and Computer Networks.

Course	Cognitive Level	
CO1:	Identify Green IT with its different dimensions and Strategies.	Understand
CO2:	Describe Green data centres and storage along with its green software methodologies.	Understand
CO3:	Describe the concepts o to manage the green IT with necessary components.	Understand
CO4:	Recognize various green enterprise activities, functions and their role with IT.	Understand
CO5:	Identify various laws, standards and protocols for regulating green IT.	Apply

UNIT - I BASICS OF GREEN IT

[9]

Environmental Concerns and Sustainable Development – Environmental Impacts of IT – Green IT – Holistic Approach to Greening IT – Greening IT – Applying IT for enhancing Environmental sustainability – Green IT Standards and Eco-Labelling of IT – Enterprise Green IT strategy – Life Cycle of a device or hardware – Reuse, Recycle and Dispose.

UNIT - II SUSTAINABLE SOFTWARE DEVELOPMENT AND GREEN DATA CENTRES [9]

Current Practices – Sustainable Software – Attributes – Metrics – Methodology – Defining Actions – Data Centres: Associated Energy Challenges – IT Infrastructure – Implications for Energy Efficiency – Management – Green Data Centre Metrics – Green Data Storage – Storage Media Power Characteristics – Energy Management Techniques for Hard Disks.

UNIT - III ENTERPRISE GREEN IT STRATEGY

[9]

Approaching Green IT Strategies – Business Drivers – Business Dimensions for Green IT Transformation – Organizational Considerations – Steps to Develop Green IT Strategy – Metrics and Measurements – Multilevel Sustainable Information – Sustainability Hierarchy Models – Product, Individual and Functional Level Information – Organizational and Regional/City Level Information.

UNIT - IV GREEN ENTERPRISE READINESS AND THE ROLE OF IT

[9]

Readiness and Capability – Development and Measuring of an Organization's G-Readiness Framework – Organizational and Enterprise Greening – Information Systems in Greening Enterprises – IT Usage and Hardware – Inter-Organizational Enterprise activities and Green Issues – Enablers and making the case for IT and Green Enterprise.

UNIT - V REGULATING THE GREEN IT: LAWS, STANDARDS AND PROTOCOLS [9]

The regulatory environment and IT manufacturers – Non Regulatory Government Initiatives – Industry Associations and Standards Bodies – Green Building Standards – Green Data Centres – Social Movements and Greenpeace – Cloud Computing – Energy Usage Model – Case Study: laaS Provider.

SEMESTER - VI

INTERNET OF THINGS L T P C
20CS663 (PROFESSIONAL ELECTIVE - II)
3 0 0 3

Prerequisite: Basic knowledge of Microprocessors and Microcontrollers

Course	Outcomes : On Completion of this course, the student will be able to	Cognitive Level
CO1:	Identify the technologies of IoT and applications of IoT.	Understand
CO2:	Construct IoT platform using design methodology.	Apply
CO3:	Develop IoT device using Raspberry Pi Board.	Apply
CO4:	Build up IoT device using Arduino Board.	Apply
CO5:	Explore IoT infrastructure for industrial applications	Understand

UNIT - I BASICS OF INTERNET OF THINGS

[9]

Definition – Characteristics – Physical Design of IoT – Logical Design of IoT – IoT Enabling Technologies – IoT Levels and Deployment Templates – Domain Specific IoT: Home Automation, Cities, Environment, Energy, Retail, Logistics, Agriculture, Industry, Health and Life style

UNIT - II IOT ARCHITECTURE AND DESIGN METHODOLOGY

[9]

M2M high-level ETSI architecture – IETF architecture for IoT – IoT and M2M:M2M – Difference between IoT AND M2M – SDN and NFV for IoT. IoT System Management – Need for System Management – SNMP – Network Operator Requirements – NETCONF – YANG – IoT Systems Management with NETCONF-YANG – IoT Design Methodology.

UNIT - III IOT WITH RASPBERRY Pi

[9]

IoT Device – Raspberry Pi Board – Linux on Raspberry Pi – Raspberry Pi interfaces – Programming Raspberry Pi with python – Other IoT devices – Cloud Storage Models and Communication APIs: WAMP – Xively Cloud for IoT – Django – Designing RESTful Web API

UNIT - IV IOT WITH ARDUINO

[9]

Arduino Basics: Hardware Requirements – Software Requirements – Arduino Programming. Internet Connectivity: Arduino Uno Wired Connectivity – Arduino Uno Wireless Connectivity – Arduino Yun Wireless Connectivity. Communication Protocols: HTTP – MQTT

UNIT - V INDUSTRIAL APPLICATIONS

[9]

Cisco IoT system – IBM Watson IoT Platform – Manufacturing – Converged Plantwide Ethernet Model (CPwE) – Power Utility Industry – GridBlocks Reference Model – Smart and Connected Cities: Layered Architecture, Smart Lighting, Smart Parking Architecture and Smart Traffic Control.

K.S.R. COLLEGE OF ENGINEERING (Autonomous) SEMESTER - VI ANDROID APPLICATION DEVELOPMENT (PROFESSIONAL ELECTIVE - II)

Prerequisite: Basics of Java Programming.

20CS664

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Comprehend the mobile application development trends and Android platform	Understand
CO2:	Implement adaptive, responsive user interfaces that work across a wide range of devices.	Apply
CO3:	Demonstrate methods in storing, sharing and retrieving data in Android applications.	Apply
CO4:	Infer long running tasks and background work in Android applications.	Understand
CO5:	Analyze the performance of android applications and understand the role of permissions	Understand
	and security.	

UNIT – I ANDROID FUNDAMENTALS

[9]

3

0

Mobile Application Development and Trends – Android Overview and Versions – Android Open Stack, Features – Setting Up Android Environment (Eclipse, SDK, AVD) – Simple Android Application Development – Anatomy of Android Applications – Activity and Life Cycle – Intents, Services and Content Providers.

UNIT – II ANDROID USER INTERFACE

[9]

Layouts: Linear, Absolute, Table, Relative, Frame, Scrollview, Resize and Reposition – Screen Orientation – Views: Textview, EditText, Button, ImageButton, Checkbox, ToggleButton, RadioButton, RadioGroup, ProgressBar, Autocomplete Text, Picker, Listviews and Webview – Displaying Pictures with Views: Gallery and ImageView, ImageSwitcher, Gridview – Displaying Menus: Helper Methods, Option and Context.

UNIT – III DATA PERSISTENCE

[9]

Shared User Preferences – File Handling: File System, System Partition, SDcard Partition, User Partition, Security, Internal and External Storage – Managing Data using SQLite – User Defined Content Providers.

UNIT – IV MESSAGING, NETWORKING AND SERVICES

[9]

SMS Messaging: Sending and Receiving – Sending Email and Networking – Downloading Binary and Text Data Files – Access Web Services – Developing Android Services: Create your own services – Performing Long Running tAsk in a Service – Performing Repeated Task in a Service.

UNIT – V LOCATION ACCESS AND PUBLISH ANDROID APPLICATION

[9]

Location Based Services: Display Map – Zoom Control – View and Change – Marking – Get Coding – Get Location – Publish Android Applications and Deployment.

HIGH SPEED NETWORKS	L	T	Р	С
(PROFESSIONAL ELECTIVE - II)	3	Λ	Λ	3

Prerequisite: Basic knowledge of Computer Networks.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Explain the basics of high speed networks.	Understand
CO2:	Determine the functionality of congestion control and identify traffic management.	Understand
CO3:	Explain the functionality of QoS in IP Networks.	Understand
CO4:	Illustrate fundamentals of wireless communications.	Understand
CO5:	Summarize fundamentals of network management and Its applications.	Understand

UNIT - I BASICS OF HIGH SPEED NETWORKS

[9]

Introduction – Frame Relay Networks – ATM Protocol ARCHITECTURE – ATM Logical Connection – ATM Cells – ATM Service Categories – AAL – High Speed LANs: Emergence of High Speed LANs – Ethernets – Fibre Channel – Wireless LANs.

UNIT - II CONGESTION AND TRAFFIC MANAGEMENT

[9]

Congestion Control in Data Networks and Internets – Link Level Flow and Error Control – TCP Traffic – Congestion Control in ATM Networks – Interior Routing Protocols.

UNIT - III QoS IN IP NETWORKS

[9]

Integrated Service Architecture – Queuing Discipline – Random Early Detection – Differentiated Services Protocol for QoS Support – RSVP– Multiprotocol Label Switching – Real Time Transport Protocol – IP Version 6.

UNIT - IV PRINCIPLES OF WIRELESS NETWORK OPERATIONS

[9]

Local Broad Band and Ad hoc Networks – Introduction to Wireless LANS – IEEE 802.11 WLAN – WATM – HIPERLAN – Ad hoc Networking and WPAN.

UNIT - V NETWORK MANAGEMENT AND APPLICATIONS

[9]

Network Management - Firewalls - MIB - SNMP - COPS VPNS - Mobile IP - Voice over IP.

Total = 45 Periods

Text Books:

- Williams Stallings., High Speed networks and Internet Performance and Quality of Service, Pearson, New Delhi, Second Edition, Last Impression 2010.

K.S.R. COLLEGE OF ENGINEERING (Autonomous)		R 2	2020	
SEMESTER - VII				
INFORMATION SECURITY	L	Τ	Р	С
(PROFESSIONAL ELECTIVE - III)	3	0	0	3

Prerequisite: Basic Knowledge of Network Security.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Summarize the principal concepts, major issues and basic approaches	Remember
CO2:	Identify the threats, attacks, legal professional and ethical issues.	Understand
CO3:	Discover the process of identifying, assessing and treating risks.	Understand
CO4:	Design the appropriate standards and practices in the Information Security System.	Apply
CO5:	Utilize the appropriate security technologies to prevent security breach.	Apply

UNIT - I BASICS OF INFORMATION SECURITY

[9]

History, Definition – Information Security, Critical Characteristics of Information – CNSS Security Model – Components of an Information Systems – Securing the Components – Balancing Security and Access – The SDLC – The Security SDLC – Security Professional and the Organization – Communities of Interest.

UNIT - II SECURITY INVESTIGATION

[9]

Need for Security – Business Needs – Threats – Attacks – Legal, Ethical and Professional Issues – An Overview of Computer Security – Access Control Matrix. Policy: Security policies, Confidentiality policies, Integrity policies and Hybrid policies.

UNIT-III SECURITY ANALYSIS

[9]

Introduction – An Overview of Risk Management – Risk Identification – Risk Assessment – Risk Control strategies – Selecting a Risk Control Strategy – Quantitative versus Qualitative Risk Management.

UNIT-IV LOGICAL DESIGN

[9]

Blueprint for Security – Information Security Policy – Standards and Practices – ISO 17799/BS 7799 – NIST Models – VISA International Security Model – Design of Security Architecture – Planning for Continuity

UNIT-V PHYSICAL SECURITY AND MAINTENANCE

[9]

Security Technology – Intrusion Detection System – Scanning and Analysis Tools – Access Control Devices – Physical Security – Security and Personnel – Information Security Maintenance – Digital Forensics.

SEMESTER - VII

20CS762 SOCIAL NETWORK ANALYSIS L T P C (PROFESSIONAL ELECTIVE - III) 3 0 0 3

Prerequisite: Basic knowledge of networks and data mining concepts.

Course Outcomes: On successful completion of the course, the student will be able to Cognitive Level CO1: Develop semantic web related applications. Understand CO2: Represent knowledge using ontology. Understand CO3: Predict human behaviour in social web and related communities. vlaaA CO4: Evaluate social networks. Understand CO5: Comprehend the various social networks Applications Understand

UNIT – I BASIC CONCEPT OF SEMANTIC WEB

[9]

Introduction to Semantic Web: Limitations of Current Web – Development of Semantic Web – Emergence of the social Web – Social Network Analysis: Development of Social Network Analysis – Electronic Sources for Network Analysis: Electronic Discussion Networks – Blogs and Online Communities – Web Based Networks – Applications of Social Network Analysis.

UNIT – II MODELING AND VISUALIZATION

[9]

Visualizing Online Social Networks – A Taxonomy of Visualizations – Graph Representation – Centrality – Clustering – Node-Edge Diagrams – Visualizing Social Networks with Matrix– Based Representations – Node-Link Diagrams – Hybrid Representations – Modelling and aggregating social network data – Random Walks and their Applications – Use of Hadoop and Map Reduce.

UNIT - III MINING COMMUNITIES

[9]

Aggregating and reasoning with social network data, Advanced Representations – Extracting evolution of Web Community from a Series of Web Archive – Detecting Communities in Social Networks – Evaluating Communities – Core Methods for Community Detection and Mining – Applications of Community Mining Algorithms – Node Classification in Social Networks.

UNIT – IV EVOLUTION OF SOCIAL NETWORKS

[6

Evolution in Social Networks – Framework – Tracing Smoothly Evolving Communities – Models and Algorithms for Social Influence Analysis – Influence Related Statistics – Social Similarity and Influence – Influence Maximization in Viral Marketing – Algorithms and Systems for Expert Location in Social Networks – Expert Location without Graph Constraints – with Score Propagation – Expert Team Formation.

UNIT – V APPLICATIONS OF SOCIAL NETWORKS

[9

Graph Theory – Centrality – Clustering – Node Edge Diagrams – Matrix Representation – Visualizing Online Social Networks – Co-Citation Networks. A New Linguistic Approach to Assess the Opinion of Users in Social Network Environments – Explaining Scientific and Technical Emergence Forecasting – Social Network Analysis for Biometric Template Protection

AGILE SOFTWARE DEVELOPMENT
L T P C
(PROFESSIONAL ELECTIVE - III)
3 0 0 3

Prerequisite: Basic concept of Software Engineering.

Course	Cognitive Level	
CO1:	Discern the background and driving forces for taking an Agile approach to software	Understand
	development.	
CO2:	Compare agile software development model with traditional development models	Understand
CO3:	Recognize the business value of adopting Agile approaches.	Analyze
CO4:	Apply practices of XP and Incremental design.	Apply
CO5:	Comprehend the Agile development practices.	Apply

UNIT - I FUNDAMENTALS OF AGILE PROCESS

[9]

R 2020

Introduction and background – Agile Manifesto and Principles –Stakeholders and Challenges – Overview of Agile Development Models: Scrum – Extreme Programming –Feature Driven Development – Crystal – Kanban – and Lean Software Development.

UNIT - II AGILE PROJECTS

[9]

Planning for Agile Teams: Scrum Teams – XP Teams – General Agile Teams – Team Distribution; Agile Project Lifecycles: Typical Agile Project Lifecycles – Phase Activities – Product Vision – Release Planning: Creating the Product Backlog – User Stories – Prioritizing and Estimating – Creating the Release Plan; Monitoring and Adapting: Managing Risks and Issues – Retrospectives.

UNIT - III AGILE SCRUM FRAMEWORK

[9]

Introduction to Scrum: Agile Scrum Framework – Scrum Artifacts – Meetings – Activities and Roles – Scrum Team Simulation – Scrum Planning Principles – Product and Release Planning – Sprinting: Planning – Execution – Review and Retrospective; User story definition and Characteristics – Acceptance tests and Verifying stories – Burn down chart – Daily scrum – Scrum Case Study.

UNIT - IV EXTREME PROGRAMMING

[9]

Introduction to Extreme Programming (XP): XP Lifecycle – The XP Team – XP Concepts: Refactoring – Technical Debt – Time boxing – Stories – Velocity; Adopting XP: Pre-requisites – Challenges; Applying XP: Thinking- Pair Programming – Collaborating – Release – Planning – Development; XP Case Study.

UNIT - V AGILE SOFTWARE DESIGN AND DEVELOPMENT

[9]

Agile design practices – Role of design Principles –Need and significance of Refactoring – Refactoring Techniques – Continuous Integration – Automated build tools – Version control; Agility and Quality Assurance: Agile Interaction Design – Agile approach to Quality Assurance – Test Driven Development – Pair programming: Issues and Challenges.

SEMESTER - VII

20CS764 USER INTERFACE DESIGN L T P C (PROFESSIONAL ELECTIVE - III) 3 0 0 3

Prerequisite: Basic knowledge of web programming

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Explain the importance and principles of User Interface Design.	Understand
CO2:	Develop knowledge in interaction and visual design.	Understand
CO3:	Integrate the concepts of Communication-based design process.	Remember
CO4:	Recall the basic concepts behind manipulation and virtual environment.	Understand
CO5:	Identify the functions of interaction devices.	Apply

UNIT – I PRINCIPLES OF UI DESIGN [9]

Introduction – importance of user interface – Characteristic of graphical and web interface – UI Is Communication Concept – Communication Design Principles – UI Design Situation – Core Principles of UI Communication – Effective Communication – Intuitive UI – Necessary and Unnecessary Consistency – Unintuitive UI – Inductive UI – Deductive UI.

UNIT – II INTERACTION AND VISUAL DESIGN [9

Interactions – Controls – Commands – Labels and Instructions – Feedback – Task Steps and Navigation — Surfaces – Errors and Notifications – Dynamic Elements – Importance of Visual Design – Graphic Designers – Layout -- Typography and Text – Color – Affordances – Icons and Glyphs – Animations and Transitions – Demanding Attention.

UNIT – III COMMUNICATION DESIGN PROCESS [9]

Communicating to People – Emotional Connection – Personality – Attributes – Good Tone – Motivating Users – Minimizing Effort – Forgiveness – Building Trustworthiness – Courageous Design-communication – Driven design process – Basic design process – Mistakes – Planning phase – Design phase – Refinement phase.

UNIT – IV MANIPULATION AND VIRTUAL ENVIRONMENTS [9]

Introduction – Examples of Direct Manipulation Systems – Discussion of Direct Manipulation – 3D Interfaces – Teleoperation – Virtual Augmented Reality – Command and Natural Languages: Command – Organization Functionality, Strategies, and Structure – Naming and Abbreviations – Natural Language in Computing.

UNIT – V INTERACTION DEVICES [9]

Introduction – Keyboards and Keypads – Pointing Devices – Speech and Auditory Interfaces – Small and Large Displays – Collaboration and Social Media Participation: Goals of Collaboration and Participation – Asynchronous Distributed Interfaces – Synchronous Distributed Interfaces – Face to Face Interfaces.

Total = 45 Periods

BUSINESS INTELLIGENCE
L T P C
(PROFESSIONAL ELECTIVE - III)
3 0 0 3

Prerequisite: Basic Knowledge of relational database management system concepts and data warehousing

Course	Outcomes: Upon Completion of the course, the students should be able to	Cognitive Level
CO1:	Recall about transaction processing and analytical applications and describe the need for business intelligence.	Remember
CO2:	Identify the technology and processes associated with data integration.	Understand
CO3:	Infer about data flow and transformations i.e., ETL using SSIS.	Understand
CO4:	Illustrate about multidimensional data modeling, life cycle and business scenario	Understand
CO5:	Demonstrate an enterprise dashboard that depicts the key performance indicators which helps in decision making.	Understand

UNIT – I BASICS OF BUSINESS INTELLIGENCE

[9]

R 2020

Introduction to Digital Data and its types – Structured, Semi Structured and Unstructured – Introduction to OLTP and OLAP, OLAP Architectures – Data Models. BI Definitions and Concepts – Business Intelligence Applications – BI Framework – BI Process – BI Technology – BI Roles and Responsibilities – BI Best Practices.

UNIT – II DATA INTEGRATION

9.

Data Warehouse – Need and Goals of Data Warehouse – Data Integration – Need and Advantages of Data Integration – Common Data Integration Approaches – Data Integration Technologies – Data Quality – Data Profiling Concepts and Applications – Introduction to ETL using SSIS.

UNIT - III DATA FLOW AND TRANSFORMATIONS

[9]

Introduction to SSIS Architecture – Introduction to ETL using SSIS – Integration Services Objects – Data Flow Components – Sources, Transformations and Destinations – Working with Transformations, Containers, Tasks, Precedence Constraints and Event Handlers.

UNIT - IV MULTIDIMENSIONAL DATA MODELING

[9]

Introduction to Data and Dimension Modeling –Types of Data Model – Data Modeling Techniques – Fact Table – Dimension Table – Typical Dimensional Models – Dimensional Model Life Cycle – Introduction to Business Metrics and KPIs – Creating Cubes using SSAS.

UNIT – V ENTERPRISE REPORTING

[9]

Introduction to Enterprise Reporting – Reporting Perspectives Common to all Levels of Enterprise – Report Standardization and Presentation Practices – Enterprise Reporting Characteristics in OLAP – Concepts of Balanced Scorecards, Dashboards – Create Dashboards – Scorecards vs Dashboards – Introduction to SSRS Architecture – Enterprise Reporting using SSRS.

20CS766 SOFT COMPUTING L T P C (PROFESSIONAL ELECTIVE - III) 3 0 0 3

Prerequisite: Basics of Data mining algorithms.

Course Outcomes: Upon Completion of the course, the students should be able to Cognitive Level CO1: Summarize the basic concepts of Soft Computing Remember CO2: Examine various Artificial neural networks. Understand CO3: Classify Fuzzy set and solving fuzzy problems. Understand CO4: Describe the basics of Genetic algorithms. Understand CO5: Identify the various Soft computing algorithms to solve the problems. **Apply**

UNIT – I BASICS OF SOFT COMPUTING

[9]

Neural Networks – Application Scope of Neural Networks – Fuzzy Logic – Genetic Algorithm – Hybrid Systems – Soft Computing – Artificial Neural Network – Evolution of Neural Networks – Basic Models of ANN – Weights – Bias – Threshold – Learning Rate – Momentum Factor – Vigilance Parameter – McCulloch – Pitts Neuron – Linear Separability – Hebb Network.

UNIT – II ARTIFICIAL NEURAL NETWORKS

[9]

Perceptron Networks – Adaptive Linear Neuron – Multiple Adaptive Linear Neurons – Back-Propagation Network – Radial Basis Function Network – Pattern Association – Auto associative and Hetero associative Memory Networks – Bidirectional Associative Memory (BAM) – Hopfield Networks – Fixed Weight Competitive Nets – Kohonen Self-Organizing Feature Maps.

UNIT – III FUZZY SYSTEMS

[9

Fuzzy Logic – Classical Sets (Crisp Sets) – Fuzzy Sets – Fuzzy Relation - Features of the Membership Functions – Fuzzification – Methods of Membership Value Assignments – Defuzzification – Lambda – Cuts for Fuzzy Sets (Alpha-Cuts) – Lambda – Cuts for Fuzzy Relations – Defuzzification Methods – Fuzzy Reasoning – Fuzzy Inference Systems.

UNIT – IV GENETIC ALGORITHMS

[9]

Biological Background – Traditional Optimization and Search Techniques – Genetic Algorithm and Search Space – Simple GA – General Genetic Algorithm – Operators – Stopping Condition – Constraints.

UNIT – V HYBRID SOFT COMPUTING AND SWARM INTELLIGENCE ALGORITHMS

[9]

Neuro-Fuzzy Hybrid Systems – Genetic Neuro-Hybrid Systems – Genetic Fuzzy Hybrid and Fuzzy Genetic Hybrid Systems – Simplified Fuzzy ARTMAP – Swarm Intelligence Algorithms – Ant Colony Optimization – Artificial Bee Colony – Particle Swarm Optimization – Firefly Algorithm.

SEMESTER-VII

20CS767 SERVICE ORIENTED ARCHITECTURE L T P C (PROFESSIONAL ELECTIVE - IV) 3 0 0 3

Prerequisite: Basic Knowledge of XML and Web service

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Relate web services with service oriented architecture.	Understand
CO2:	Examine the issues related to SOA.	Understand
CO3:	Apply the tools and technique for service oriented architecture	Apply
CO4:	Develop service design using WSDL and XML schema languages.	Apply
CO5:	Evaluate SOA platform supported by J2EE and .NET	Evaluate

UNIT – I BASICS OF SOA

[9]

Basic Definition – Fundamentals of SOA – Characteristics about SOA – Benefits and Pitfalls of SOA. Evolution of SOA – Web Service and Primitive SOA – Extension of SOA – Web Service Extension.

UNIT – II WEB SERVICE AND CONTEMPORARY SOA

[9]

Message Exchange Pattern – Service Activity – Coordination – Atomic Transaction Business Activity – Orchestration – Choreography – Addressing Reliable Messaging Correlation and Policies – Meta data Exchange – Security Notification and Eventing.

UNIT-III PRINCIPLES OF SERVICE ORIENTATION

[9]

Principles of Service Orientation – Building SOA – Planning and Analysis – SOA Delivery Strategies – Service Oriented Analysis: Introduction – Service Modelling of Service Oriented Analysis.

UNIT – IV SERVICE ORIENTED DESIGN

[9]

Introduction to Service Oriented Design – WSDL related XML Schema Language – WSDL Language Basics – SOAP Language Basics – Service Interface Design Tools – Steps to Composing SOA – Consideration for Choosing Service Layers – SOA Extension – Service Design and Business Process Design.

UNIT- V WEB SERVICE EXTENSION AND SOA PLATFORM

[9]

WS-Addressing Language Basics – WS-Reliable Messaging Language Basics – WS-Policy Language Basics – WS Metadata Exchange Language Basics – WS-Security Language Basics – SOA Platform Basics – SOA Support in J2EE, SOA Support in .NET – Case Studies.

SEMESTER - VII

20CS768 CYBER SECURITY L T P C (PROFESSIONAL ELECTIVE - IV) 3 0 0 3

Prerequisite: Basics of Computer Networks and Security.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Have an overview of cyber crime scenario and legal perspective on cyber crime.	Understand
CO2:	Comprehend different types of cyber attacks	Understand
CO3:	Realize about tools and methods used in cyber crime	Remember
CO4:	Identify the need of cyber laws	Understand
CO5:	Outline and know how cyber forensics is used in cyber crime investigations.	Understand
UNIT- I	FUNDAMENTALS OF CYBER CRIME AND CYBER OFFENCES	[9]

Cybercrime definition and origins of the word – Cyber crime and information security – Classifications of cybercrimes, Cybercrime and the Indian ITA 2000 – A global Perspective on cybercrimes – How criminal plan the attacks – Social Engineering – Cyberstalking – Cybercafe and Cybercrimes – Botnets – Attack vector – Cloud computing

UNIT – II TOOLS AND METHODS USED IN CYBER CRIME [9]

Proxy Servers and Anonymizers – Password Cracking – Keyloggers and Spywares – Virus and Worms – Steganography – DoS and DDoS Attacks – SQL Injection – Buffer Overflow – Attacks on Wireless Networks – Phishing – Identity Theft (ID Theft)

UNIT – III CYBER CRIME AND IT ACT [9]

The Legal Perspectives – Need of Cyber law: The Indian Context – The Indian IT Act – Challenges - Digital Signature and the Indian IT Act – Amendments to the Indian IT Act – Cybercrime and Punishment – Cyber law, Technology and Students: Indian Scenario.

UNIT – IV COMPUTER FORENSICS [9

Historical Background of Cyber forensics – Digital Forensics Science – The Need for Computer Forensics – Cyber forensics and Digital Evidence – Forensics Analysis of Email – Digital Forensics Lifecycle – Chain of Custody Concept – Network Forensics – Approaching a Computer Forensics Investigation – Computer Forensics and Steganography – Relevance of the OSI 7 Layer Model – Computer Forensics and Social Networking Sites: The Security/Privacy Threats – Forensics Auditing – Anti Forensics.

UNIT – V CYBER SECURITY [9]

Organizational Implications – Cost of Cybercrimes and IPR Issues: Lesson for Organizations – Web Treats for Organizations: The Evils and Perils – Security and Privacy Implications from Cloud Computing – Social Media Marketing: Security Risk and Perils for Organization – Social Computing and the Associated Challenges for Organizations – Protecting People's Privacy in the Organization – Organizational Guidelines for Internet Usage – Safe Computing Guidelines and Computer Usage Policy – Incident Handling – Best Practices.

oly
r

UNIT – I FUNDAMENTALS OF SOFTWARE DEFINED NETWORKS

[9]

R 2020

History of Software Defined Networking (SDN) – Modern Data Center – Traditional Switch Architecture – Why SDN – Evolution of SDN – How SDN Works – Centralized and Distributed Control and Date Planes.

UNIT – II OPEN FLOW AND SDN CONTROLLERS

[9]

Open Flow Specification – Drawbacks of Open SDN, SDN via APIs, SDN Via Hypervisor– Based Overlays – SDN via Opening up the Device – SDN Controllers – General Concepts

UNIT-III DATA CENTERS

[9]

Multitenant and Virtualized Multitenant Data Center – SDN Solutions for the Data Center Network – VLANs – EVPN – VxLAN – NVGRE

UNIT – IV SDN PROGRAMMING

[9]

Programming SDNs: Northbound Application Programming Interface – Current Languages and Tools – Composition of SDNs – Network Functions Virtualization (NFV) and Software Defined Networks: Concepts – Implementation and Applications

UNIT- V SDN FRAMEWORK

[9]

Juniper SDN Framework – IETF SDN Framework – Open Daylight Controller – Floodlight Controller – Bandwidth Calendaring – Data Center Orchestration

Total = 45 Periods

SEMESTER - VII				
INFORMATION STORAGE MANAGEMENT	L	T	Р	С
(PROFESSIONAL ELECTIVE - IV)	3	0	0	3

Prerequisite: Basic Knowledge of Database Management Systems.

Cours	e Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Elucidate logical and physical components of a storage infrastructure and RAID.	Understand
CO2:	Depict different storage networking technologies.	Understand
CO3:	Demonstrate the need of backup, archive and replication	Apply
CO4:	Confer cloud computing characteristics and benefits.	Understand
CO5:	Summarize the security and monitoring aspects of data center components.	Apply
LIMIT	L OVEDVIEW OF STORAGE SYSTEM	[0]

K S D COLLEGE OF ENGINEEDING (Autonomous)

UNIT – I OVERVIEW OF STORAGE SYSTEM

[9]

D 2020

Introduction to Information Storage, Virtualization and Cloud Computing – Key Data Center Elements – Compute, Application and Storage Virtualization – Disk Drive and Flash Drive Components and Performance – RAID – Intelligent Storage System and Storage Provisioning.

UNIT – II STORAGE NETWORKING TECHNOLOGIES AND VIRTUALIZATION

[9]

Fiber Channel SAN components, FC Protocol and Operations – Block Level Storage Virtualization – iSCSI and FCIP as an IP–SAN Solutions – Converged Networking Option – FCoE – Network Attached Storage (NAS) – Components, Protocol and Operations – File Level Storage Virtualization – Object Based Storage and Unified Storage Platform.

UNIT-III BACKUP, ARCHIVE AND REPLICATION

[9]

Business Continuity Terminologies, Planning and Solutions – Clustering and Multi-pathing Architecture to Avoid Single Points of Failure – Backup and Recovery – Methods, Targets and Topologies – Data Deduplication and Backup in Virtualized Environment – Fixed Content and Data Archive – Local and Remote Replications in Classic and Virtual Environments – Three site Remote Replication and Continuous Data Protection.

UNIT- IV INFORMATION AVAILABILITY, MONITORING AND MANAGING DATACENTER

[9]

Reason for planned/unplanned outages and the impact of downtime – Impact of Downtime – Differentiate between Business Continuity and Disaster Recovery – RTO and RPO – Identify single points of failure in a storage infrastructure and solutions to mitigate these failures – Architecture of backup/recovery – Different backup / recovery topologies – Replication technologies – Role in ensuring information availability and business continuity.

UNIT- V SECURING AND MANAGING STORAGE INFRASTRUCTURE

[9

Security Threats and Counter Measures in Various Domains – Security Solutions for FCSAN, IP-SAN and NAS environments – Security in Virtualized and Cloud Environments – Monitoring and Managing Various Information Infrastructure Components in Classic and Virtual Environments – Information Lifecycle Management (ILM) and Storage Tiering.

Total = 45 Periods

SEMESTER - VII

20CS772 MACHINE LEARNING TECHNIQUES L T P C (PROFESSIONAL ELECTIVE - IV) 3 0 0 3

Prerequisite: Basic knowledge of Data Mining and Artificial Intelligence.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Distinguish between supervised, unsupervised and semi-supervised learning	Understand
CO2:	Apply the appropriate Machine learning strategy for any given problem	Apply
CO3:	Design a neural network for an application of your choice	Understand
CO4:	Outline existing machine learning algorithms to improve classification efficiency	Understand
CO5:	Design systems that uses the appropriate graph models of machine learning	Apply
UNIT – I	FUNDAMENTALS OF MACHINE LEARNING AND SUPERVISED LEARNING	[9]

Introduction to Machine Learning – Examples of machine learning applications – Types of Machine Learning: Supervised Learning – Machine Learning Process – The Curse of Dimensionality, Overfitting – Training, Testing, and Validation Sets – The Confusion Matrix and Basic Statistics – Bias – Variance Trade off.

UNIT-II PARAMETRIC AND SEMI-PARAMETRIC METHODS

[9]

Introduction – Neural Network representation – Appropriate problems for Neural Network Learning Parametric Classification – Regression – Tuning Model Complexity – Model Selection Procedures. Multivariate Methods: Data – Parameter Estimation – Estimation of Missing Values – Multivariate Normal Distribution – Multivariate Classification and Regression. Semi parametric method: Clustering k-Means Clustering – Hierarchical Clustering.

UNIT – III DIMENSIONALITY REDUCTION AND EVOLUTIONARY MODELS

[9]

Linear Discriminant Analysis (LDA) – Principal Component Analysis (PCA) – Factor Analysis – Independent Component Analysis – Probabilistic Model – Gaussian Mixture Models: EM Algorithm – Nearest Neighbour Methods – Support Vector Machines.

UNIT-IV INSTANCE BASED LEARNING

[9]

Evolutionary Learning – The Genetic Algorithm (GA) – Reinforcement Learning – Decision Trees – Classification and Regression Trees (CART) – Ensemble Learning: Boosting – Bagging – Random Forests – Unsupervised Learning: K-Means Algorithm – Vector Quantization.

UNIT- V GRAPHICAL MODELS

[9]

Graphical model: Canonical cases for conditional independence -Bayesian Networks – Markov Random Fields – Hidden Markov Model (HMMS) – Markov Chain Monte Carlo (MCMC) Methods – Deep Belief Networks (DBN).

20CS773 DATA SCIENCE L T P C (PROFESSIONAL ELECTIVE - IV) 3 0 0 3

Prerequisite: Basic knowledge of Data warehousing and data Mining.

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Identify and Present an overview data science and applications.	Understand
CO2:	Examine the methods of data collection.	Understand
CO3:	Examine the various statistical methods in EDA	Understand
CO4:	Apply statistical methods to develop and evaluate the models.	Apply
CO5:	Construct decision making for complex projects.	Apply

UNIT – I OVERVIEW OF DATA SCIENCE

Introduction to Data Science – Evolution of Data Science – Data Science Roles – Stages in a Data Science Project – Applications of Data Science in various fields – Data Security Issues.

UNIT – II DATA COLLECTION AND DATA PRE-PROCESSING [9]

Data Collection Strategies – Data Pre-Processing Overview – Data Cleaning – Data Integration and Transformation – Data Reduction – Data Discretization.

UNIT – III EXPLORATORY DATA ANALYTICS [9]

Descriptive Statistics – Mean, Standard Deviation, Skewness and Kurtosis – Box Plots – Pivot Table – Heat Map – Correlation Statistics – ANOVA.

UNIT- IV MODEL DEVELOPMENT [9]

Simple and Multiple Regression – Model Evaluation using Visualization – Residual Plot – Distribution Plot – Polynomial Regression and Pipelines – Measures for In-sample Evaluation – Prediction and Decision Making.

UNIT – V MODEL EVALUATION [9]

Generalization Error – Out-of-Sample Evaluation Metrics – Cross Validation – Overfitting – Under Fitting and Model Selection – Prediction by using Ridge Regression – Testing Multiple Parameters by using Grid Search.

CO1:	Provide basic platform knowledge of automobile engineering	Understand
CO2:	Explain the working principal of petrol and diesel engines	Understand
CO3:	Interpret the method of power transmission unit	Understand
CO4:	Built knowledge of steering and brake	Understand
CO5:	Illustrate the knowledge of automotive electrical systems and functioning	Understand
UNIT - I	INTRODUCTION	1 00 1

Automobile – Components of an automobile – Classification of automobiles – Layout of chassis – Types of drives front wheel – rear wheel – four wheel.

UNIT - II IC ENGINES [09]

Classification – ignition system – firing order – Otto/ Diesel cycles – Two stroke and four stroke engines – scavenging – Cooling and Lubrication systems – Fuel Supply system – air fuel ratio – Carburetor – types.

UNIT - III TRANSMISSION SYSTEM [09]

Clutch – Function – single plate – multi plate – friction clutches – Centrifugal and semi centrifugal clutch – Gear Box – slidemesh – constant mesh and synchromesh gear box –Torque convertor – overdrive – Propeller shaft and rear axle – Universal joint – Differential – Rear axle drives – Wheels and Tyres.

UNIT - IV STEERING AND BRAKE [09

Steering system – function and principle – Ackerman and Davis steering principles – wheel alignment – steering gear boxes.Brakes – Mechanical – hydraulic and vacuum brake – master cylinder – wheel cylinder -Bleeding of brakes.

UNIT - V ELECTRICAL SYSTEMS [09]

Battery – types – Dynamo and Alternator – Cut-out relay - Diagram of Wiring system – Lighting System and Accessories - Headlight - switches - Windscreen Wipers – Horn – Speedometer – Heater and Air conditioning.

UNIT – I CONSTRUCTION AND OPERATION

[09]

[09]

Constructional details of spark ignition (SI) and compression ignition (CI) engines. Working principles. Two stroke SI and CI engines. Comparison of SI and CI engines and four stroke and two stroke engines. Engine classification, firing order. Otto, diesel and dual cycles. Introduction to Lean burn engine technologies.

UNIT – II SI ENGINES [09]

Air fuel ratio requirements - Carburetion - Throttle body injection, Multi point injection. Function of Components, Spark plug, Ignition System - battery coil, magneto coil, Electronic. Combustion in SI Engines - Combustion Chambers, Stages of Combustion - factors affecting flame propagation, Knock in SI engines, variables affecting knocking. Pollution from SI engines.

UNIT – III CI ENGINES [09]

Diesel fuel injection system, Function of Components, Jerk type pump, Distributor pump, Mechanical and pneumatic Governor, Fuel Injector, Types of nozzles, importance of Swirl, Squish, Turbulence air motion, Combustion in CI Engines - Combustion Chambers, Stages of Combustion, Factors affecting Ignition Delay, Knock in CI engines. Pollution from CI engines.

UNIT - IV EMISSION CONTROL TECHNIQUES

Design of engine, optimum selection of operating variables for control of emissions, EGR, charge stratification, SCR, DPF, Lean NOX catalyst technology. Thermal reactors, secondary air injection, catalytic converters, catalysts, fuel modifications, fuel cells, Two stroke engine pollution and control.

UNIT - V MEASUREMENT TECHNIQUES, EMISSION STANDARDS AND TEST [09]

NDIR, FID, Chemiluminescent analyzers, Gas Chromatograph, smoke meters, emission standards, driving cycles - USA, Japan, Euro and India. Test procedures - ECE, FTP Tests. SHED Test - Chassis dynamometers, dilution tunnels.

Prerequisite: -

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Identify the construction and working of various types of automobile engines.	Understand
CO2:	Evaluate the significance of clutch and transmission system.	Understand
CO3:	Illustrate the types of axle, suspension and classification of steering system.	Understand
CO4:	Discuss the various vehicle control systems.	Understand
CO5:	Demonstrate the various new generation vehicles.	Understand
UNIT - I	AUTOMOBILE ENGINE	[09]

Construction layout, types and components of engines, SI – CI – Wankel engine, working of engines, lubrication system, coolant system, power supply, alternate and dynamo, flywheel and damper.

UNIT - II CLUTCH AND TRANSMISSION

Types of clutches, construction and working procedure of single plate clutch, multi-plate clutch, cone clutch, gears – types of gears, terminology of spur gear, gear trains, construction and working of manual and automatic gear box.

UNIT - III AXLE, SUSPENSION AND STEERING [09]

Types of axles, necessity of axle for an automobile, suspension system, types and construction of suspension system, significance of suspension system, steering system and vehicle handling, classification of steering system, merits and demerits of power steering.

UNIT - IV VEHICLE CONTROL SYSTEM [09]

Cruise control, antilock braking system, tyre slip controller, electronic steering control, global positioning system, autonomous navigation system.

UNIT - V NEW GENERATION VEHICLES [09]

Electric vehicles, hybrid vehicles, flexible fuel vehicles, solar powered vehicles, high energy and power density batteries, regenerative braking, safety air bags.

Total = 45 Periods

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Explain the automotive safety and its importance.	Understand
CO2:	Analyze the safety concepts.	Understand
CO3:	Illustrate the various safety equipment functions and importance	Understand
CO4:	Identify the various crash test and impact test mechanics.	Understand
CO5:	Examine the function of warning and avoidance systems.	Understand
UNIT - I	INTRODUCTION	[09]

Evolution of automotive safety - Active safety: driving safety, conditional safety, perceptibility safety, operating safety - passive safety: exterior safety, interior safety, safety sandwich construction – NCAP.

UNIT - II SAFETY CONCEPTS [09]

Design of the body for safety - Energy equation - engine location - deceleration of vehicle inside passenger compartment - deceleration on impact with stationary and movable obstacle.

UNIT - III SAFETY EQUIPMENTS [09]

Seat belt - regulations, automatic seat belt tightener system - collapsible steering column - tiltable steering wheel - air bags - electronic system for activating air bags - bumper design for safety - Collision warning system - Central Locking system - Child safety.

UNIT - IV CRASH AND IMPACT MECHANICS

Design of crash crumple zones - Behavior of specific body structures in crash testing - Roll over crash tests - Regulatory requirements for crash testing & testing procedure - vehicle impacts- Side and Frontal Pole Impact.

UNIT - V COMFORT AND CONVENIENCE SYSTEM [09]

Steering and mirror adjustment - central locking system - Garage door opening system - tyre pressure control system - rain sensor system - environment information system.

CO4:	Model and simulate the vehicle characteristics, operating modes, and performance parameters of the vehicle	Understand
CO5:	Design and develop the systems of hybrid and electric vehicles	Understand
LINIT	NEED FOR ALTERNATIVE SYSTEM	1 00 1

UNIT - I NEED FOR ALTERNATIVE SYSTEM

[09]

Need for hybrid and electric vehicles – main components and working principles of a hybrid and electric vehicles, Different configurations of hybrid and electric vehicles. Comparative study of diesel, petrol, hybrid and electric Vehicles. Advantages and Limitations of hybrid and electric Vehicles.

UNIT - II SUBSYSTEMS OF HYBRID AND ELECTRIC VEHICLES

[09]

Basics – Types, Parameters – Capacity, Discharge rate, State of charge, state of Discharge, Depth of Discharge, Technical characteristics, Battery pack Design, Properties of Batteries.

UNIT - III ENERGY SOURCES

[09]

Battery Parameters- - Different types of batteries – Lead Acid- Nickel Metal Hydride – Lithium ion- Sodium based- Metal Air. Battery Modeling- Equivalent circuits, Battery charging- Quick Charging devices. Fuel Cell- Fuel cell Characteristics- Fuel cell types-Half reactions of fuel cell. Ultra capacitors. Battery Management System.

UNIT - IV MOTORS AND CONTROLLERS

[09]

Types of Motors, Characteristic of DC motors, AC single phase and 3-phase motor, PM motors, Switched reluctance motors, Motor Drives and speed controllers, Torque Vectoring, Regenerative Braking. Rectifiers, Inverters, DC/DC converters.

UNIT - V DESIGN CONSIDERATIONS FOR ELECTRIC VEHICLES

[09]

Design requirement for electric vehicles- Range, maximum velocity, acceleration, power requirement, mass of the vehicle. Various Resistance- Transmission efficiency- Electric vehicle chassis and Body Design, Electric Vehicle Recharging and Refueling Systems, performance of electrical vehicles.

UNIT - I FUNCTIONAL PLANNING OF BUILDINGS

[09]

Types of Buildings, Aspects and Principles of Building Planning, Building By - laws and Regulations, Site Selection criteria, Orientation of Building and its relation to surrounding environment, Sustainability and Green Buildings - Building Bye - laws and Building code of India 2016.

UNIT - II BUILDING COMPONENTS AND FOUNDATIONS

[09]

Lintels, arches, different types of floors-concrete, mosaic, terrazzo floors, pitched, flat and curved roofs, lean-to roof, coupled roofs, trussed roofs, king and queen post trusses; RCC roofs, madras terrace/shell roofs. Foundations: Shallow foundations, spread, combined, strap and mat footings.

UNIT - III ALTERNATIVE MATERIALS AND MASONRY

[09]

Structure, properties, seasoning of timber; Classification of various types of woods used in buildings, defects in timber; Alternative materials for wood, galvanized iron, fibre-reinforced plastics, steel, aluminum and glass; Types of masonry, English and Flemish bonds, rubble and ashlars masonry, cavity and partition walls - Lightweight concrete blocks – merits and demerits.

UNIT - IV FLOORS, ROOFS AND STAIRCASES

[09]

Components of a floor, materials used for floor construction, Different types of flooring, Ground floor and upper floors, Types of roofs, Basic roofing elements and Roof coverings. Functional requirements of a good stair, type of stairs, planning a stair case.

UNIT - V DAMP PROOFING AND FIRE PROTECTION

I 09

Damp proofing and Fire protection: Causes and effect of dampness on buildings, Materials and methods used for damp proofing, Fire hazards, Grading of buildings according to fire resistance, Fire resisting properties of common building materials, Fire resistant construction.

Total (L= 45, T = 0) = 45 Periods

Prerequisite: No prerequisites are needed for enrolling into the course

Course	e Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Provide an overview of civil engineering	Understand
CO2:	Explain the basics of surveying, modern tools of surveying and mapping	Understand
CO3:	Summarize the fundamentals of building materials in civil engineering	Understand
CO4:	Explain the components of building structures.	Understand
CO5:	Interpret various infrastructures of civil engineering in construction	Understand
UNIT -	I OVERVIEW OF CIVIL ENGINEERING	[09]

History of Civil Engineering - Role and Functions of Civil Engineer - Fields of Civil Engineering - Importance of Civil Engineering

UNIT - II BASICS OF SURVEYING

[09]

Introduction - Basic Definitions (Surveying, leveling, Plans, Maps, Scales) - Introduction to divisions of surveying - Classification of surveying - Fundamental principles of surveying - Measurement in Surveying - Phases of Surveying

MODERN TOOLS OF SURVEYING AND MAPPING:

Introduction to Global Positioning System - Remote Sensing and Geographic Information System

UNIT - III FUNDAMENTALS OF BUILDING MATERIALS

[09]

Bricks - stones - sand - M-sand - cement - fly ash - silica fume - mortar- concrete - steel - glass - wood -plastics - ceramics

UNIT - IV COMPONENTS OF BUILDING

[09]

Foundations – stone masonry – brick masonry – beams – columns – lintels – roofing – flooring – plastering- damp proofing weathering course

UNIT - V STRUCTURES

[09]

Introduction to dams, weirs, barrages and check dams - Role of transportation in national development - Modes of transportation - Introduction to road traffic and traffic control - Introduction to mass transportation system

CO2:	Infer the atmospheric issues related to the chemistry, greenhouse gases	Understand
CO3:	Summarize the role of the terrestrial energy-environment-climate system	Understand
CO4:	Interpret the Possible effects of Global Warming and climate change.	Understand
CO5:	Outline the Natural and Anthropogenic and Green House Gas theory	Understand

UNIT - I INTRODUCTION [09]

Overview on the Earth's energy requirements-Climate Change-Origins of the terrestrial atmosphere-Earth's early atmosphere-Introduction to Climate-Layers of the atmosphere.

UNIT - II GLOBAL ATMOSPHERIC ISSUES [09]

Composition of the present day atmosphere-Introduction to Atmospheric chemistry-Green House Gases, and the O3 - depletion problem-Post Industrial Revolution Scenario

UNIT - III ENERGY BALANCE [09]

Earth Atmosphere System- Solar and Terrestrial Radiation- Absorption of Radiation by gases.-Energy balance- Solar variability and the Earth's Energy Balance.

UNIT - IV ATMOSPHERIC CHEMISTRY AND CLIMATE [09]

The Global Temperature Record - Possible effects of Global Warming. – Indian Context. Atmospheric Chemistry and Climate Change- Atmospheric Aerosol and Cloud Effects on Climate.

UNIT - V ENVIRONMENTAL VARIABILITY [09]

Natural (volcanoes, forest fires) and Anthropogenic (Antarctic Ozone Hole, Global Warming).-Green House Gas theory.-Effects of urbanization- Landscape changes-Influence of Irrigation-Desertification and Deforestation

Course C	Cognitive Level	
CO1:	Summarize the basic concepts in environmental laws and its judicial activism	Understand
CO2:	Interpret different water acts and marine laws in India	Understand
CO3:	Summarize various Environment protection laws and acts in the framework of Mega projects	Understand
CO4:	Explain the management and handling of various hazardous waste management	Understand
CO5:	Summarize the International Environmental laws framed at various conferences.	Understand
LIMIT I	DASIC CONCERTS IN ENVIDONMENTAL LAW	1 00 1

UNIT - I BASIC CONCEPTS IN ENVIRONMENTAL LAW

[09]

An introduction to the legal system - Constitution - Acts - Rules - Regulations - Indian Judiciary - Doctrine of precedents judicial review - Writ petitions - PIL- liberalization of the rule of locus standi - Judicial activism - Introduction to environmental laws in India - Constitutional provisions - Stockholm conference - Bhopal gas tragedy - Rio conference - General principles in Environmental law - Precautionary principle - Polluter pays principle - Sustainable development- Public trust doctrine -Overview of legislations and basic concepts.

AIR- WATER - MARINE LAWS

National Water Policy and some state policies - Laws relating to prevention of pollution, access and management of water and institutional mechanism - Water Act, 1974 - Water Cess Act, 1977 - EPA, 1986 - Pollution Control Boards Ground water and law Judicial remedies and procedures Marine laws of India - Coastal zone regulations - Legal framework on Air pollution - Air Act, 1981 - EPA, 1986

UNIT - III **ENVIRONMENT PROTECTION LAWS - LARGE PROJECTS** [09]

protection - Environment Protection Act as the framework Legal framework on environment legislation - strength and weaknesses of EIA - National Green tribunal the courts infrastructure projects

HAZARDOUS SUBSTANCES AND ACTIVITIES

Legal framework - EPA and rules made there under PLI Act, 199 - Principles of strict and absolute liability - Hazardous Wastes (Management, Handling and Transboundary) Rules, 2008 - Biomedical Waste (Management and Handling) Rules, 1998 - Municipal Solid Wastes (Management and Handling) Rules, 2000 - E - Waste (Management and Handling) Rules, 2011 - Batteries (Management & Handling) Rules, 2001

UNIT - V INTERNATIONAL ENVIRONMENTAL LAW [09]

Development of international environmental law, nature and scope of key international environmental law principles and rights (substantive and procedural), Establishment of Environmental Institutions like UNEP, Ozone Protection - Montreal Protocol for the Protection of Ozone Layer, 1987 as amended; U.N. Convention on Climate Change1992, Kyoto Protocol, 1997; Public Participation in Decision-making and Access to Justice in Environmental Matters, 1998 (Aarhus Convention); Johannesburg Conference, 2002.

GLOBAL WARMING AND CLIMATE CHANGE 20CE906 (Open Elective) 0

Prerequisite: No prerequisites are needed for enrolling into the course

Course	Cognitive Level	
CO1:	Outline the concept of the causes and effects of global warming	Understand
CO2:	Summarize about physical and chemical characteristics of atmosphere	Understand
CO3:	Identify the causes and effects of climate change	Remember
CO4:	Infer the agreements took place among the countries regarding climate change	Understand
CO5:	Summarize about the concept of mitigation measures against climate change	Understand

UNIT - I **EARTH'S CLIMATE SYSTEM**

[09]

Ρ C

0

3

Role of ozone in environment - Ozone layer - Ozone depleting gases - Greenhouse gases and its sources - Green House Effect, Radiative Effects of Greenhouse Gases -The Hydrological Cycle - Green House Gases and Global Warming - Effects and causes of Global Warming, Carbon Cycle.

ATMOSPHERE AND ITS COMPONENTS

[09]

Importance of Atmosphere - Physical Chemical Characteristics of Atmosphere - Vertical structure of the atmosphere -Composition of the atmosphere - Atmospheric stability -Temperature profile of the atmosphere - Lapse rates-Temperature inversion - effects of inversion on pollution dispersion.

IMPACTS OF CLIMATE CHANGE UNIT - III

[09]

Causes of Climate change - Change of Temperature in the environment - Melting of ice Pole-sea level rise - Impacts of Climate Change on various sectors - Agriculture, Forestry and Ecosystem - Water Resources - Human Health - Industry, Settlement and Society - Methods and Scenarios - Projected Impacts for Different Regions - Uncertainties in the Projected Impacts of Climate Change – Risk of Irreversible Changes.

UNIT - IV OBSERVED CHANGES AND ITS CAUSES

[09]

Climate change and Carbon credits - CDM- Initiatives in India - Kyoto Protocol - Intergovernmental Panel on Climate change - Climate Sensitivity and Feedbacks - The Montreal Protocol - UNFCCC - IPCC - Evidences of Changes in Climate and Environment - on a Global Scale and in India .

UNIT - V CLIMATE CHANGE AND MITIGATION MEASURES

[09]

Clean Development Mechanism - Carbon Trading - Examples of future Clean Technology - Biodiesel - Natural Compost - Eco- Friendly Plastic - Alternate Energy - Hydrogen - Bio-fuels - Solar Energy - Wind - Hydroelectric Power -Mitigation Efforts in India and Adaptation funding - Key Mitigation Technologies and Practices - Energy Supply - Transport Buildings – Industry – Agriculture – Forestry - Carbon sequestration – Carbon capture and storage (CCS) - Waste(MSW & Bio waste, Biomedical, Industrial waste – International and Regional cooperation.

20CE907	INTRODUTION TO DISASTER MANAGEMENT AND MITIGATION	L	T	Р	С
	(Open Elective)	3	0	0	3

Prerequisite: Nil

Course Ou	Cognitive Level	
CO1:	Explain the concepts of disaster and its effect in Indian scenario.	Understand
CO2:	Elaborate the difference between natural and manmade disasters.	Understand
CO3:	Outline the disaster management cycle and its operation.	Understand
CO4:	Outline the disaster management in India and its profile.	Understand
CO5:	Propose the application of geo-informatics for disaster management and mitigation.	Apply

UNIT - I INTRODUCTION TO DISASTER

[09]

Definition of Disaster, hazard, global and Indian scenario, general perspective, importance of study in human life, Direct and indirect effects of disasters, long term effects of disasters. Introduction to global warming and climate change.

UNIT - II NATURAL DISASTER AND MANMADE DISASTERS

[09]

Natural Disaster: Meaning and nature of natural disaster, Flood, Flash flood, drought, cloud burst, Earthquake, Landslides, Avalanches, Volcanic eruptions, Mudflow, Cyclone, Storm, Storm Surge, climate change, global warming, sea level rise, ozone depletion.

Manmade Disasters: Chemical, Industrial, Nuclear and Fire Hazards. Role of growing population and subsequent industrialization, urbanization and changing lifestyle of human beings in frequent occurrences of manmade disasters.

UNIT - III DISASTER MANAGEMENT CYCLE AND FRAMEWORK

[09]

Disaster Management Cycle, Paradigm Shift in Disaster Management Pre-Disaster Risk Assessment and Analysis, Risk Mapping, zonation and Micro zonation, Prevention and Mitigation of Disasters, Early Warning System; Preparedness, Capacity Development, Awareness During Disaster Evacuation, Disaster Communication, Search and Rescue, Emergency Operation Centre, Incident Command System, Relief and Rehabilitation, Damage and Needs Assessment, Restoration of Critical Infrastructure, Early Recovery, Reconstruction and Redevelopment, IDNDR, Yokohama Strategy, Hyogo Framework of Action.

UNIT - IV DISASTER MANAGEMENT IN INDIA DISASTER PROFILE OF INDIA

[09]

[09]

Mega Disasters of India and Lessons Learnt, Disaster Management Act 2005, Institutional and Financial Mechanism, National Policy on Disaster Management, National Guidelines and Plans on Disaster Management, Role of Government, Non-Government and Inter-Governmental Agencies.

UNIT - V APPLICATIONS OF SCIENCE AND TECHNOLOGY FOR DISASTER MANAGEMENT & MITIGATION

Geo-informatics in Disaster Management, Disaster Communication System, Land Use Planning and Development Regulations, Structural and Non Structural Mitigation of Disasters, S&T Institutions for Disaster Management in India.

Total (L= 45, T = 0) = 45 Periods

Prerequisite: No prerequisites are needed for enrolling into the course

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Illustrate the causes and effects of earthquake.	Understand
CO2:	Explain the basic concepts in seismology and correlate to earthquake engineering.	Understand
CO3:	Summarize the theory of vibrations.	Understand
	Outline the design process for earthquake resisting structures	Understand
CO5:	Predict the performance of building and structures under the earthquake.	Understand
UNIT - I	CAUSES AND EFFECTS OF EARTHQUAKE	[09]

Causes of earthquake by natural sources and manmade sources - Earthquake effects on building structure - Liquefaction of soils, effects of liquefaction, methods to reduce liquefaction - Land and rock slides - tsunamis.

UNIT - II ELEMENTS OF ENGINEERING SEISMOLOGY [09]

Plate tectonics, Elastic rebound, seismic zoning map of India, Focus, epicenter, seismic waves, magnitude, intensity, intensity scale and its correlation with ground acceleration, characteristics of strong ground motions.

UNIT - III THEORY OF VIBRATIONS [09]

Basic concepts of vibration - Difference between static loading and dynamic loading - Types of vibration - Vibration measuring instruments - Degrees of freedom -Types of Damping.

UNIT - IV DESIGN METHODOLOGY [09]

Design methodology - Architectural consideration - Geotechnical consideration - Structural design consideration, earthquake design philosophy, importance of ductility - Capacity design - Techniques of aseismic design - Design spectrum.

UNIT - V PERFORMANCE OF BUILDING AND STRUCTURES [09]

Lessons learnt from the past earthquakes - Shear wall, types of shear wall ,function of shear wall - Concepts of seismic base isolation technique - Base isolation devices - Seismic dampers - Seismic active control.

20CE909	SOLID WASTE MANAGEMENT	L	T	Р	С
	(Open Elective)	3	0	0	3

Prerequisite: No prerequisites are needed for enrolling into the course

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Overview the concept of Solid waste and management.	Understand
CO2:	Summarize about on-site storage and processing of solid waste.	Understand
CO3:	Summarize about collection and transportation of waste.	Understand
CO4:	Summarize about off-Site Processing of solid waste.	Understand
CO5:	Interpret about safe disposal of solid waste.	Understand
	A 11 1111 / 11/1 B	

UNIT - I Solid Waste and its Perspectives

[09]

Sources – Types – Composition – Properties – Characteristics – Quantities – Generation rates – Types of Sampling – Functional elements – Legislative measures – 3R concept – Participatory waste management.

UNIT - II On-Site Storage and Processing

[09]

On-site storage methods - materials used for containers -on site segregation of solid wastes -public health & economic aspects of storage - options under Indian conditions - Critical Evaluation of Options.

UNIT - III Collection and Transfer

[09]

Collection services – Classification of container systems – Analysis of collection system – Collection routes – Guidelines – Transfer station – Site selection – Types – Manpower requirement.

UNIT - IV Off-Site Processing

[09

Processing techniques and Equipment; Resource recovery from solid wastes – composting – Factors affecting composting – Indore and Bangalore processes – Vermicomposting, Incineration, Pyrolysis - options under Indian conditions.

UNIT - V Disposal

[09]

Sanitary landfills – site selection – merits and demerits - methods and operation of sanitary landfills - Leachate collection and control methods – Incinerators - types – hazardous wastes and its effects on environment – case studies.

WATER AND AIR POLLUTION MANAGEMENT

(Open Elective)

R 2020

L T P C

3 0 0 3

Prerequisite: No prerequisites are needed for enrolling into the course

Course Outcomes: On successful completion of the course, the student will be able to Cognitive Level CO1: Explain water and air quality standards Understand CO2: Understand Discuss water treatment and fundamentals of air pollution CO3: Understand Demonstrate the particulate of air pollution. CO4: Understand Classify air pollution control technologies. CO5: Describe air pollution control equipment. Understand

UNIT - I INTRODUCTION [09]

Water effluent standards – water quality indices – physical – chemical and biological parameters of water – water quality requirement – potable water standards – Air pollutants – Sources – Classification of air pollutants – Particulates and gaseous pollutants – Effects of air pollutants on human health, vegetation and property – Global issues and air pollution – Global warming – Ozone layer depletion – Ambient air quality and emission standards – Air pollution indices – Air act.

UNIT - II WATER TREATMENT AND FUNDAMENDALS OF ATMOSPHERIC POLLUTANTS [09]

Water purification systems in natural systems- physical processes-chemical processes and biological processes primary, secondary and tertiary treatment-Unit operations-unit processes. Mixing, clarification - sedimentation; Types; aeration and gas transfer - coagulation and flocculation, coagulation processes - stability of colloids -Disinfection - Fundamentals of meteorology - Wind roses - Atmospheric stability - Atmospheric diffusion of pollutants - Transport, transformation and deposition of air contaminants - Plume behaviour - Atmospheric diffusion theories - Plume rise.

UNIT - III PARTICULATE AIR POLLUTION [09]

Control principles – Principles and equipment description of control technologies – Particulates control by Gravitation, centrifugal, filtration, scrubbing, electrostatic precipitation – Absorption, adsorption, condensation, incineration and biofiltration for control of gaseous air pollutants.

UNIT - IV AIR POLLUTION CONTROL TECHNOLOGIES [09]

Biological air pollution control technologies – Bioscrubbers, biofilters. Air pollutants in indoor environments – Levels of pollutants in indoor and outdoor air – Indoor air pollution from outdoor sources – Measurement methods – Control Technologies.

UNIT - V AIR POLLUTION CONTROL EQUIPMENT [09]

Introduction – Installation of Settling chambers, Inertial separators, Dust trap, Involute cyclone, Multiple cyclone, Filters, Electrostatic precipitators, Scrubbers, Separating devices – Efficiency of equipment.

Total (L= 45, T = 0) = 45 Periods

20CS901	PROGRAMMING IN JAVA	L	T	Р	С			
	(Open Elective)	3	0	0	3			

Course (Course Outcomes : On successful completion of the course, the student will be able to						
CO1:	Discover java programming fundamentals to solve real world problem.	Understand					
CO2:	Implement the concept of class and constructor.	Apply					
CO3:	Examine important features of java like inheritance and interfaces.	Understand					
CO4:	Illustrate the features of package and exception handling.	Understand					
CO5:	Apply the concepts of string manipulations.	Apply					

UNIT – I JAVA FUNDAMENTALS

[09]

The Java Buzzwords – Data Types – Variables – Local Variable – Instant Variable – Static variable – Array-Single Dimensional Array-Multi Dimensional Array – Operators – Control Statements – if – if else – nested if– else if– for – for each – while – do while – Switch – Break– Continue.

UNIT – II CLASS FUNDAMENTALS AND CONSTRUCTORS

[09]

Class Fundamentals – Declaring Objects – Methods – Instant Method – Static Method – Method Overloading – Recursion – this keyword – Garbage Collection – Constructors – Argument constructor – No-Argument Constructor – Constructor Overloading – Access Control.

UNIT – III INHERITANCE AND INTERFACES

[09]

Inheritance – Single – Multilevel – Hierarchical – Super keyword – Method Overriding – Abstract class – Final variable– Final class – Interfaces – Default Interface Methods – Static Methods in Interface.

UNIT – IV PACKAGES AND EXCEPTION HANDLING

[09]

Packages – User define Package – Predefine Package – Access Protection – Importing Packages – Array List– Wrapper Classes – Exception Handling Fundamentals – Exceptions Types –Try and Catch – Multiple Catch – Nested Try – Throw – Throws – Finally.

UNIT – V STRING AND STRING BUFFER

F 09

The String Constructors – String Length – Character Extraction – String Comparison – Searching Strings – Modifying a String – Data Conversion using valueOf method – Methods in String Buffer – append – delete – replace – insert – reverse – capacity.

CO1:	Elaborate the different linear data structure to solve simple problems.	Understand
CO2:	Build the various tree structures with its operations.	Understand
CO3:	Describe the concept of AVL tree, splay tree, B tree and B+ tree.	Understand
CO4:	Apply graph data structure to solve real time problems.	Apply
CO5:	Discover various sorting, hashing and searching techniques.	Apply
UNIT- I	ARRAY AND LINKED LIST	[09]

UNIT-I ARRAY AND LINKED LIST [09]

Abstract Data Types (ADT) – List ADT – Array Based Implementation – Linked List Implementation – Singly Linked Lists – Doubly Linked Lists – Circularly Linked Lists – Applications of Lists: Polynomial Manipulation – Radix sort.

UNIT-II STACK AND QUEUE [09]

Stack ADT – Implementation of Stack using Array and Linked List – Applications of Stack: Evaluating arithmetic expressions – Conversion of Infix to postfix expression Recursion – Queue ADT – Implementation of Queue using Array and Linked List – Applications of Queues

UNIT – III TREE STRUCTURES [09]

Tree ADT – Binary Tree ADT – Binary Tree Traversal – Expression Trees – Applications of Trees – Binary Search Tree – AVL Trees – B Tree – B+ Tree.

UNIT – IV GRAPHS [09]

Introduction to Graphs and its Types – Breadth First Traversal – Depth First Traversal – Topological Sorting – Minimum Spanning Tree: Prim's and Kruskal's algorithms — Shortest Path Algorithms: Dijkstra's Algorithm – Applications of Graphs.

UNIT – V SEARCHING, HASHING AND SORTING [09]

Searching: Linear and Binary Search – Hashing: Hash function – Separate Chaining – Open Addressing – Sorting: Bubble Sort – Selection Sort – Insertion Sort – Heap Sort – Merge Sort.

20CS903	(Open Elective)	3	0	0	3

Course (Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Outline database architecture and the E-R Model for Database design.	Understand
CO2:	Apply Structured query language to create and manipulate a relational database.	Apply
CO3:	Build functions, triggers and recursive queries.	Apply
CO4:	Demonstrate the purpose of normalization.	Understand
CO5:	Discover about transaction and query processing concepts.	Understand

UNIT – I BASIC CONCEPTS AND E-R MODEL

[09]

Database System Applications – Purpose of Database Systems – Views of Data – Database Languages –Database and Application Architecture. Overview of the Design Process – The Entity-Relationship model – Complex Attributes – Mapping Cardinalities and Keys.

UNIT – II RELATIONAL MODEL AND SQL FUNDAMENTALS

[09]

Introduction to Relational Model: Structure of Relational Databases – Database Schema –Keys – Schema Diagrams. Overview of the SQL Query Language – SQL Data Definition – Basic Structure of SQL Queries – Additional Basic Operations – Set operations – Null values – Aggregate functions – Modification of the Database.

UNIT - III INTERMEDIATE SQL AND ADVANCED SQL

[09]

Join Expressions – Views – Transactions – Integrity Constraints – Authorization –Accessing SQL from Programming Language – Functions and Procedures – Triggers – Recursive Queries.

UNIT - IV NORMALIZATION

[09]

Functional Dependencies – Non-loss Decomposition – First, Second and Third Normal Forms, Dependency Preservation – Boyce/Codd Normal Form – Multi-valued Dependencies and Fourth Normal Form – Join Dependencies and Fifth Normal Form.

UNIT - V TRANSACTIONS AND QUERY PROCESSING

[09]

Transaction Concept – A Simple Transaction Model – Storage Structure – Transaction Atomicity and Durability – Transaction Isolation – Serializability – Concurrency Control – Lock-Based protocols – Query Processing overview

CO4:	Construct the web oriented response at server side in PHP and XML format	Apply
CO5:	Illustrate the web service architecture and to enable rich client presentation using AJAX.	Understand

UNIT – I INTRODUCTION TO WEB

[09]

Web Essentials: Clients, Servers, and Communications. The Internet – History – Basic Internet Protocols: TCP and IP – DNS – URL. The World Wide Web – HTTP: Request Message – Response Message – Web Clients – Web Servers – Case Study.

UNIT – II BASICS OF HTML AND CSS

[09]

HTML. An Introduction to HTML History and Version - Structure of HTML Page - HTML tags for data formatting - Tables - Links - Images - List - Frames - Forms - HTML 5 Tags and Validation. Style Sheets: CSS Syntax and Structure - CSS Rules for Backgrounds, Colours, and Properties - Manipulating Texts, Fonts, borders and Boxes - Margin - Padding Lists - CSS Positioning.

UNIT- III CLIENT SIDE SCRIPTING

[09]

JavaScript: Syntax and Execution – Internal, embedded and External JavaScript: Variables – Arrays – Functions – Conditions – Loops – Type Conversion – Objects and DOM – Inbuilt Functions – Validation and Regular Expressions – Event Handling.

UNIT – IV SERVER SIDE SCRIPTING

L U0

PHP: Introduction – Using PHP – variables – Program Control. Built-in Functions: Connecting to Database – Using cookies – Regular Expression. XML: Basics – DTD – XML Scheme – DOM and Presenting XML – XML parsers and validation.

UNIT- V AJAX and WEB SERVICE

09

AJAX: Introduction – Ajax Client Server Architecture, XML http Request Object – Call Back Methods. Introduction to Web Services – Java web services: Basics – SOAP – WSDL: Creating, Publishing and Describing a web service – Consuming a web service – Database Driven Web Service from an application.

20.000.7	GREEN TECHNOLOGY	L	Т	Р	С
20CS907	(Open Elective)	3	0	0	3

Course C	outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Identify Green IT with its different dimensions and Strategies.	Understand
CO2:	Describe Green data centres and storage along with its green software methodologies.	Understand
CO3:	Outline the concepts o to manage the green IT with necessary components.	Understand
CO4:	Recognize various green enterprise activities, functions and their role with IT.	Understand
CO5:	Categorize various laws, standards and protocols for regulating green IT.	Understand

UNIT – I GREEN IT [09]

Environmental Concerns and Sustainable Development – Environmental Impacts of IT – Green IT – Holistic Approach to Greening IT – Greening IT – Applying IT for enhancing Environmental sustainability – Green IT Standards and Eco-Labelling of IT – Enterprise Green IT strategy – Life Cycle of a device or hardware – Reuse, Recycle and Dispose.

UNIT – II SUSTAINABLE SOFTWARE DEVELOPMENT AND GREEN DATA CENTRES [09]

Current Practices – Sustainable Software – Attributes – Metrics – Methodology – Defining Actions – Data Centres: Associated Energy Challenges – IT Infrastructure – Management – Green Data Centre Metrics – Green Data Storage – Storage Media Power Characteristics – Energy Management Techniques for Hard Disks.

UNIT – III ENTERPRISE GREEN IT STRATEGY [09]

Approaching Green IT Strategies – Business Drivers – Business Dimensions for Green IT Transformation – Organizational Considerations – Steps to Develop Green IT Strategy – Metrics and Measurements – Multilevel Sustainable Information – Sustainability Hierarchy Models.

UNIT – IV GREEN ENTERPRISE READINESS AND THE ROLE OF IT [09]

Readiness and Capability – Development and Measuring of an Organization's G-Readiness Framework – Organizational and Enterprise Greening – Information systems in Greening Enterprises – IT Usage and Hardware – Inter-Organizational Enterprise activities and Green Issues – Enablers and making the case for IT and Green Enterprise.

UNIT – V LAWS, STANDARDS AND PROTOCOLS [09]

The regulatory environment and IT manufacturers – Non regulatory government initiatives – Industry associations and standards bodies – Green building standards – Green data centres – Social movements and Greenpeace – Cloud Computing – Energy Usage Model.

Total (L= 45, T = 0) = 45 Periods

Course C	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Describe agents structure and predict uninformed search algorithms for any AI problem	Understand
CO2:	Illustrate appropriate AI methods to solve a given problem.	Apply
CO3:	Explain a problem using first order and predicate logic.	Understand
CO4:	Identify planning algorithms and illustrate about learning	Apply
CO5:	Infer about robotics concept.	Understand

UNIT – I FUNDAMENTALS OF ARTIFICIAL INTELLIGENCE

[9]

Intelligent Agents – Agents and environments – Good behavior – The Nature of Environments – The Structure of Agents – Solving Problems by Searching: Problem-Solving Agents – Example problems – Searching for solutions – Uninformed search strategies.

UNIT – II INFORMED SEARCHING TECHNIQUES

[9]

Informed (Heuristic) Search Strategies – Heuristic functions – Local Search and Optimization Problems – Adversarial Search – Games – Optimal decisions in games – Alpha-Beta Pruning – Constraint Satisfaction Problems – Defining Constraint Satisfaction Problems.

UNIT – III LOGICAL REASONING

[9]

First order logic – Representation revisited – Syntax and semantics for first order logic – Using first order logic – Knowledge engineering in first order logic – Inference in First order logic – Prepositional versus first order logic – Unification and lifting – Forward chaining – Backward chaining.

UNIT – IV PLANNING AND LEARNING

[9]

Classical Planning: Definition of Classical Planning – Algorithm for Planning as State – Space Search – Planning graphs – Analysis of Planning Approaches – Learning from Examples: Forms of Learning – Supervised learning – Learning Decision trees – Ensemble Learning – Explanation-Based Learning.

Introduction – Robot Hardware – Robot Perception – Planning to Move – Planning Uncertain Movements – Moving – Robotic Software Architectures – Application Domains.

CO3:	Summarize data by utilizing various statistical and data mining approaches	Understand
CO4:	Deploy and Perform analytics on real-time streaming data	Understand
CO5:	Comprehend the various NoSql alternative database models	Understand

UNIT – I INTRODUCTION TO BIG DATA

[9]

Big Data – Definition, Characteristic Features – Big Data Applications – Big Data vs Traditional Data – Risks of Big Data – Structure of Big Data – Web Data – Evolution of Analytic Scalability – Evolution of Analytic Processes, Tools and methods – Analysis Vs Reporting – Modern Data Analytic Tools.

UNIT – II HADOOP FRAMEWORK

[9]

Distributed File Systems – Large-Scale File System Organization – HDFS concepts – MapReduce Execution, Algorithms using MapReduce, Matrix-Vector Multiplication – Hadoop YARN.

UNIT - III DATA ANALYSIS [9]

Statistical Methods: Regression modelling – Multivariate Analysis – Classification: SVM & Kernel Methods – Rule Mining – Cluster Analysis – Types of Data in Cluster Analysis – Predictive Analysis – Data analysis using R.

UNIT – IV MINING DATA STREAMS

[9]

Streams: Concepts – Stream Data Model and Architecture – Sampling data in a stream – Mining Data Streams and Mining Time-series data – Real Time Analytics Platform Applications – Real Time Sentiment Analysis – Stock Market Predictions.

UNIT – V BIG DATA FRAMEWORKS

۲9

Introduction to NoSQL – Aggregate Data Models – Hbase: Data Model and Implementations – Hbase Clients – Examples – Cassandra: Data Model – Examples – Cassandra Clients – Hadoop Integration. Pig – Grunt – Pig Data Model – Pig Latin – developing and testing Pig Latin scripts.

UNIT – I INTRODUCTION

[9]

Introduction - Computer Organization - Number Systems and Codes - Memory - ALU - CU - Instruction prefetch - Interrupts - I/O Techniques - Device Controllers - Error Detection Techniques - Microprocessor - Personal Computer Concepts - Advanced System Concepts - Microcomputer Concepts - OS - Multitasking and Multiprogramming - Virtual Memory - Cache Memory - Modern PC and User.

UNIT - II PERIPHERAL DEVICES

[9]

Introduction – Keyboard – CRT Display Monitor – Printer – Magnetic Storage Devices –FDD – HDD – Special Types of Disk Drives – Mouse and Trackball – Modem – Fax Modem – CD ROM Drive – Scanner – Digital Camera – DVD – Special Peripherals.

UNIT – III PC HARDWARE OVERVIEW

[9]

Introduction – Hardware BIOS DOS Interaction – The PC family – PC hardware – Inside the System Box – Motherboard Logic – Memory Space – Peripheral Interfaces and Controllers – Keyboard Interface – CRT Display interface – FDC – HDC – Microprocessors in PC.

UNIT – IV INSTALLATION AND PREVENTIVE MAINTENANCE

[9]

Introduction – system configuration – pre installation planning – Installation practice – routine checks – PC Assembling and integration – BIOS setup – Engineering versions and compatibility – preventive maintenance – DOS – Virus – Data Recovery.

UNIT - V TROUBLESHOOTING

[9]

Introduction – computer faults – Nature of faults – Types of faults – Diagnostic programs and tools – Microprocessor and Firmware – Programmable LSI's – Bus Faults – Faults Elimination process – Systematic Troubleshooting – Symptoms observation and analysis – fault diagnosis – fault rectification – Troubleshooting levels – FDD, HDD, CD ROM Problems.

Prerequisite:

Course C	utcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Categorize and explain the operation of electrical drives	Understand
CO2:	Explain the characteristics of various electrical drives	Understand
CO3:	Interpret the operation of starting and braking methods of AC and DC machines	Understand
CO4:	Choose the appropriate speed control techniques for DC motor drives	Understand
CO5:	Choose the appropriate speed control techniques for AC motor drives	Understand

UNIT - I INTRODUCTION [09]

Electrical drives – Need – Advantage of electrical drives – Basic elements of electrical drives – Factors influencing the choice of electrical drives – Four quadrant operation of a motor driving a hoist load – Load torques – Selection of motors with regard to thermal overloading – Classes of motor duty.

UNIT - II CHARACTERISTICS OF ELECTRIC DRIVES [09]

DC Motors: DC shunt, DC series, DC compound and Permanent Magnet DC motors – AC Motors: Single phase and three phase Induction motors – Speed –Torque characteristics of various types of loads and drive motors.

UNIT - III MOTOR STARTING AND BRAKING METHODS [09]

Types of Starters: Two Point Starter, Three Point Starter, Four Point Starter, DOL Starter, Y-Δ Starter. Braking of Electrical Motors: Shunt Motor, Series Motor, Single Phase Induction Motor.

Speed control of DC series and shunt motors – Armature and field control – Ward-Leonard control system – Controlled Rectifiers Fed DC motor Drive – Chopper fed DC motor Drive: Buck, Boost and Buck-Boost – Applications.

Speed control of three phase induction motor – Voltage control, voltage / frequency control, slip power recovery scheme – Inverter and AC Voltage Controller Based Induction Drives – Applications.

Prerequis	ite:							
Course O	utcomes : On successful completion of the course, the student will be able to	Cognitive Level						
CO1:	Understand							

CO2: Infer the static and dynamic characteristics of current controlled power semiconductor Understand devices

CO3: Realize the static and dynamic characteristics of voltage controlled power Understand semiconductor devices

CO4: Examine the gate drive requirements for power devices and isolation techniques Understand between the gate and power circuits

CO5: Discuss the electrical analogy of thermal models and the methods for cooling power Understand devices

UNIT - I POWER SEMICONDUCTOR DIODES AND CIRCUITS [09]

Power diode: Structure, V-I and reverse recovery characteristics-types of power diodes - Series and parallel connected diodes - Diode rectifiers: Single phase half wave and full wave rectifiers with R,RL load.

UNIT - CURRENT CONTROLLED DEVICES [09]

BJT's: Construction, operation, static and switching characteristics, Negative temperature coefficient and secondary breakdown, on-state losses, safe operating area. Thyristors: Construction, working, Two transistor analogy, V–I and switching characteristics, series and parallel operation; comparison of BJT and Thyristor – Basics of TRIAC, RCT,GTO, MCT.

UNIT - III VOLTAGE CONTROLLED DEVICES [09]

Power MOSFETs and IGBTs – Principle of voltage controlled devices, construction, types, static and switching characteristics, Comparison of Power MOSFET and IGBTs – Applications.

UNIT - IV FIRING AND PROTECTING CIRCUITS [09]

Gate drives circuit: SCR, MOSFET, IGBTs and base driving for power BJT – Necessity of isolation, Isolation of gate and base drives: pulse transformer and optocoupler – Overvoltage and overcurrent protections for power devices – Design of snubber circuits.

UNIT - V THERMAL PROTECTION [09]

Heat transfer – conduction, convection and radiation; Cooling – liquid cooling, vapour and phase cooling; Guidance for heat sink selection – Thermal resistance and impedance – Electrical analogy of thermal components, heat sink types and design – Mounting types- switching loss calculation for power device.

20EE903	(Open Elective)	3	0	0	3				
Prerequi	site:								
Course (Outcomes : On successful completion of the course, the student will be able to	С	ognitiv	ve Le	vel				
CO1:	Describe the layout and function of various parts inside the thermal power plant.		Reme	ember					
CO2:	Outline the layout, construction, working of the components inside the hydro power plant.	Understand							
CO3:	Explain the principle of operation, layout and types of nuclear reactor in a nuclear power plant.		Under	rstano	1				
CO4:	Discuss about the types, performance and layout of gas and diesel power plants.		Under	rstand	!				
CO5:	Infer the basic concepts of different non-conventional energy sources.		Under	rstand	1				
UNIT - I	Thermal power plant			[09]				
Basic thermodynamic laws - various components of steam power plant – layout - pulverized coal burners - Fluidized bed combustion - coal handling and ash handling systems - Forced draft and induced draft fans – Boilers - feed pumps – superheater - regenerator – condenser – deaerators - cooling tower.									

UNIT - II Hydro power plant

[09]

Hydel power plant classifications- essential elements, selection of water turbines - selection of site for a hydel power plant - layout - dams - pumped storage power plants - micro hydel developments.

UNIT - III Nuclear power plant

[09]

Principles of nuclear energy - nuclear fission - nuclear reactor, types - pressurized water reactor, boiling water reactor, gas cooled reactor, liquid metal fast breeder reactor-nuclear power plants

UNIT - IV Gas and diesel power plant

[09]

Fuels - gas turbine material, open and closed cycle gas turbine, work output & thermal efficiency, methods to improve performance - advantages and disadvantages- types of diesel engine power plant- components and layout.

UNIT - V Renewable energy

[09]

Solar energy collectors – OTEC - wind power plants, tidal power plants and geothermal resources, fuel cell, MHD power generation principle.

K.S.R. COLLEGE OF ENGINEERING, TIRUCHENGODE – 637215 DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING CO-PO MAPPING

Regulation: R 2020

Course Code: 20EE903 Course Name: Electrical Power Generation Systems

СО	Course Outcomes					ı	Progr	amme	Outo	ome	s				
- 00	Course Outcomes	P01	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1:	Describe the layout and function of various parts inside the thermal power plant.	3	1	-	-	-	2	3	2	-	-	-	1	-	-
CO2:	Outline the layout, construction, working of the components inside the hydro power plant.	3	2	-	-	-	2	3	1	-	-	-	1	-	-
CO3:	Explain the principle of operation, layout and types of nuclear reactor in a nuclear power plant.	3	2	-	-	1	3	3	2	1	-	-	1	-	-
CO4:	Discuss about the types, performance and layout of gas and diesel power plants.	3	2	-	-	•	2	3	1	-	-	-	1	-	-
CO5:	Infer the basic concepts of different non-conventional energy sources.	3	1	-	-	-	3	3	2	-	-	-	1	-	-
	Average	3	2	-	-	-	2	3	2	-	-	-	1	-	-

^{1:} Slight (Low)

^{2:} Moderate (Medium)

^{3:} Substantial (High)

	K.S.R. COLLEGE OF ENGINEERING (Autonomous)								
2055004	CONTROL ENGINEERING	L	T	Р	С				
20EE904	(Open Elective)	3	0	0	3				

Prerequisite: Applied Mathematics

Course (Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Obtain the transfer function of electrical and mechanical systems.	Apply
CO2:	Determine the time-domain response of first and second order systems.	Apply
CO3:	Examine the stability of open loop system using bode / polar plot.	Apply
CO4:	Analyze the stability of the system by Root locus and Routh Hurwitz criterion.	Apply
CO5:	Design lag, lead, lag-lead compensator using bode plot.	Apply
UNIT - I	SYSTEM AND THEIR REPRESENTATION	[09]

Basic elements in control system – Classification of control systems: Open and closed loop systems– Electrical, Mechanical translational and rotational system – Block diagram reduction techniques – Signal flow graphs.

UNIT - II TIME RESPONSE ANALYSIS

[09]

Types and order of systems — Types of test signal — First and second order time response — Time domain specification of second order under damped systems — Generalized error series—Steady state error and error constants.

UNIT - III FREQUENCY RESPONSE ANALYSIS

[09]

Frequency response of the system – Bode plot – Polar plot – Constant M and N circles – Determination of closed loop response from open loop response.

UNIT - IV STABILITY OF CONTROL SYSTEM

[09]

Characteristics equation – Routh Hurwitz criterion – Root locus construction – Effect of pole, zero addition.

UNIT - V COMPENSATOR AND CONTROLLER

[09]

Lag, lead and lag-lead networks - Lag, lead and lag-lead compensator using bode plots - P, PI, PID controllers.

Total (L= 45, T = 0) = 45 Periods

			R 20	20	
2055005	INDUSTRIAL AUTOMATION	L	Т	Р	С
20EE905	(Open Elective)	3	0	0	3

Prerequisite:

Course Outcomes : On successful completion of the course, the student will be able to		Cognitive Level
CO1:	Explain the major components of Programmable Logic Controller and its applications.	Understand
CO2:	Summarize the logical functions, timers and counters of PLC	Understand
CO3:	Discuss the various instructions and modes of operation related to PLC.	Understand
CO4:	Realize the architecture and various interfacing techniques of Distributed Control Systems	Understand
CO5:	Examine the different applications of PLC and Distributed Control Systems (DCS).	Understand
UNIT - I	INTRODUCTION TO PROGRAMMABLE LOGIC CONTROLLER (PLC)	[09]

Introduction - PLC Evolution - PLC Vs Computers - Block Diagram of PLC - Parts of a PLC- Principles of Operation-Modifying the Operation- PLC Hardware Components: I/O modules, Power Supply, CPU - PLC size and Applications.

UNIT - II LOGIC FUNDAMENTALS, TIMER AND COUNTER [09]

Logic functions – Boolean instructions and functions – Hardwired logic Vs Programmed Logic - Developing circuits from Boolean instructions – PLC timer: classification and instructions – PLC counter: classification, instructions and applications

UNIT - III PLC PROGRAMMING [09]

PLC-memory map - Program scan - Relay type instructions - Instruction addressing - Branch instructions - Internal relay instructions - EXAMINE IF CLOSED and EXAMINE IF OPEN instructions - Modes of operation - Basic relay ladder logic and its control flow chart

UNIT - IV DISTRIBUTED CONTROL SYSTEM [09]

Distributed control system: Evolution – Architectures – Comparison – Local control unit – Process interfacing issues – Communication facilities – HMI Interface – Low and high level operator interfaces – Operator displays – Low and high level engineering interfaces – Introduction to SCADA.

UNIT - V APPLICATIONS OF PLC AND DCS [09]

PLC applications: Automatic Control of WareHouse Door – Automatic Lubricating Oil Supplier – Conveyor Belt motor Control – Automatic Car Washing Machine – DCS applications: Pulp and paper environment, Petroleum and refining environment.

Course O	utcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Explain the construction and calibration of moving coil and Moving iron meters	Understand
CO2:	Discuss the operation and error correction method of wattmeter and Energy meter.	Understand
CO3:	Describe the various types of potentiometer and their limitations	Understand
CO4:	Determine the values of resistor, inductor, capacitor and frequency using bridges.	Understand
CO5:	Explain the concepts of storage and display devices.	Understand

UNIT - I MEASUREMENT OF VOLTAGE AND CURRENT

[09]

Galvanometers – Ballistic, D'Arsonval galvanometer – Principle, construction, operation and comparison of moving coil, moving iron meter – Extension of range and calibration of voltmeter and ammeter – Errors and compensation.

UNIT - II MEASUREMENT OF POWER AND ENERGY

[09]

Wattmeters: Induction, Electro-dynamometer - Theory & its errors - Methods of correction - Calibration of wattmeter - Energy meter: Single Phase Energy Meter - Construction, Theory, Errors - Adjustment of Errors - Construction and principle of working of single phase dynamometer type power factor meter.

UNIT - III POTENTIOMETERS & INSTRUMENT TRANSFORMERS

[09]

DC potentiometer – Basic circuit, standardization – Laboratory type (Crompton's) – AC potentiometer – Drysdale (polar type) type – Gall-Tinsley (coordinate) type – Limitations & applications – C.T and P.T construction, theory, operation, phasor diagram – Applications.

UNIT - IV BRIDGE MEASUREMENT

[09]

Measurement of resistance: Wheatstone bridge, Kelvin double bridge, Megger – Measurement of Inductance: Maxwell Bridge, Anderson bridge – Measurement of Capacitance: Schering bridge, Desauty's Bridge – Determination of frequency using Wein Bridge.

UNIT - V STORAGE AND DISPLAY DEVICES

[09]

Recorders: Strip Chart, X-Y Recorders – Digital Plotters – Digital Storage Oscilloscope – Digital multimeters – LED – DLP – Dot Matrix Display – Data Loggers

Total (L= 45, T = 0) = 45 Periods

CO1:	Give the introduction about energy conservation principle and practices	Remember
CO2:	Describe the concept of energy efficiency in the building.	Understand
CO3:	Explain the concept of energy efficiency in the industry	Understand
CO4:	Illustrate the concept of energy efficiency in the power plant	Understand
CO5:	Describe the importance energy management and Demand Control Techniques	Understand
UNIT - I	ENERGY CONSERVATION PRINCIPLES AND PRACTICES	[09]

Energy scenario – Principles and imperatives of energy conservation – Energy consumption pattern – Resource availability – Need for energy saving – Overview of energy consumption and its effects – Energy Monitoring, targeting and reporting - Role of Bureau of Energy Efficiency - Standards and labeling.

UNIT - II ENERGY EFFICIENCY IN BUILDINGS [09]

Introduction, definition and concepts – Energy and water as a resource – Electrical energy conservation: Opportunities and techniques for energy conservation in buildings – Green buildings, Intelligent buildings, Rating of buildings, Efficient use of buildings – Solar passive architecture – Eco-housing concepts.

Potential areas for electrical energy conservation in various industries – Conservation methods – Energy management opportunities in electrical heating, cable selection – Energy efficient motors – Adjustable AC drives – Application and its use – Energy efficiency in lighting.

UNIT - IV ENERGY EFFICIENCY IN POWER PLANTS [09]

Captive power generation systems – Sequence operation of power plants – Gas Insulated Substation – Bus ducts – Types and working principle - Energy management opportunities in transformer – Power transformer – Types of switchgear (HT and LT switchgear) GCB and generator.

UNIT - V ENERGY MANAGEMENT AND AUDIT [09]

Energy Management: Definition, Objective, Importance of energy management, Load management: Demand control techniques - Utility monitoring control system. Energy Audit: definition, types of energy audit, Methodology, Need for energy Audit, Steps involved in energy auditing.

ELECTRICAL WIRING, ESTIMATION AND COSTING	L	T	Р	С
(Open Elective)	3	0	0	3

20EE908

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Describe the various wiring materials and protective devices.	Understand
CO2:	Discuss the internal wiring system and illumination.	Understand
CO3:	Outline the external wiring system and installations.	Understand
CO4:	Apply the knowledge to prepare electrical estimation for domestic installation.	Apply
CO5:	Apply the knowledge to prepare the electrical estimation details for industrial installation.	Apply

UNIT - I INTRODUCTION TO WIRING AND PROTECTIVE DEVICES

Wiring accessories – main switch – isolator and load break duty – classification of main switches – functional switches – one way, two way, intermediate switches – knife switches – specification of switches – function and specification of socket outlets, ceiling roses, fan regulators – Fuses, need, classification, Neutral link – Miniature circuit breaker, classification, function and specification – ELCB – RCCB.

UNIT - II INTERNAL WIRING SYSTEM [09]

Design and Drawing of Internal wiring system for various types of Residential, Commercial and Industrial buildings – Electrical layout – Clearance of line – Different types of circuits, Light circuit, Power circuit, Sub-main wiring, Main wiring, Single Line diagram – Different types of Lamps used in Residential, Commercial and Industrial buildings.

UNIT - III EXTERNAL WIRING SYSTEM AND EARTHING [09]

Different types of Under Ground (UG) Cables – Cable Laying – Electrical Control Panels – External Electrical Distribution System – Single Line Diagram – Load Calculations – General Specifications of Generating Set, Transformer – Street Lighting – Earthing, Different types of earthing system – Plate earthing, Pipe Earthing.

UNIT - IV ESTIMATION OF DOMESTIC INSTALLATION [09]

Selection of cables for internal wiring – Cable size calculation – Selection criteria for control switches – main switch – size of earth continuity conductor and earthing conductor – Preparation of schematic diagrams and wiring diagrams – Estimation problems regarding Electrification of domestic buildings – Relevant rules regarding electrification of high rise buildings.

UNIT - V ESTIMATION OF INDUSTRIAL INSTALLATIONS [09]

Installation of motor pump set – Estimation problem regarding domestic and irrigation pump sets – Estimation problems in small workshops below 50kW connected load – Service connection, definition, classification – use of weather proof cables – estimation problems for single phase and three phase overhead service connections.

Total (L= 45, T = 0) = 45 Periods

UNIT - I Introduction artificial neural network

[09]

Artificial neural networks - biological neurons, Basic models of artificial neural networks - Connections, Learning, Activation Functions, McCulloch and Pitts Neuron, Hebb network.

UNIT - II Neural network architecture and algorithms

[09]

Perceptron networks – Learning rule – Training and testing algorithm, Adaptive Linear Neuron, Back propagation Network – Architecture, Training algorithm.

UNIT - III Introduction to fuzzy logic

[09]

Fuzzy logic - fuzzy sets - properties - operations on fuzzy sets, fuzzy relations - operations on fuzzy relations.

UNIT - IV Fuzzy logic system

[09]

Fuzzy membership functions, fuzzification, Methods of membership value assignments – intuition – inference – rank ordering, Lambda –cuts for fuzzy sets, Defuzzification methods.

UNIT - V Genetic and hybrid algorithms

[09]

Introduction to genetic algorithm, operators in genetic algorithm - coding - selection - crossover - mutation, Stopping condition for genetic algorithm, Genetic neuro hybrid systems, Genetic-Fuzzy rule based system

CO4:	Describe the functions of real time operating systems	Understand
CO5:	Discuss the applications of real time embedded systems	Understand

UNIT – I INTRODUCTION TO EMBEDDED SYSTEMS

[09]

Embedded System Vs General Computing System – Classification of embedded systems – Functional building blocks of embedded systems – Structural units in embedded processor – Selection of processor & memory devices – Processor interfacing with memory and I/O units – Embedded hardware unit.

UNIT - II EMBEDDED NETWORKS

[09]

Introduction to I/O device ports & buses – Serial communication using I²C,CAN,SPI and USB bus – Parallel communication using PCI, PCI-X buses, ARM bus.

UNIT – III EMBEDDED FIRMWARE DEVELOPMENT ENVIRONMENT

[09]

Introduction to embedded software development process and tools – Host and target machines – linking and locating software – Embedded Product Development Life Cycle – objectives, different phases of EDLC, Modeling of EDLC.

UNIT – IV REAL TIME OPERATING SYSTEMS

[09]

Introduction to basic concepts of RTOS – Task, process & threads – Context switching – Multiprocessing and Multitasking – Preemptive and nonpreemptive scheduling – Round Robin scheduling – Task communication – shared memory, message passing – Interprocess communication – semaphores, Message queue, Mailbox, pipes.

UNIT – V RTOS BASED EMBEDDED SYSTEM DESIGN

[09]

Basic Functions and Types of RTOS – Interrupt routines in RTOS – Case Study of Washing Machine – Automotive Application – Smart card system – ATM machine – Digital camera.

UNIT – I ELECTRO-PHYSIOLOGY AND BIO-POTENTIAL RECORDING

[09]

[09]

The origin of bio-potentials - Bio-potential electrodes - Carrier, chopper and isolation amplifiers - Transducers for biomedical applications: Strain gauge, piezoelectric transducer, thermocouple, thermistor, biosensors - ECG, EEG, EMG, PCG, ERG and EOG: Lead systems, recording methods.

UNIT - II BIO-CHEMICAL AND NON ELECTRICAL PARAMETER MEASUREMENT [09]

Blood gas analyzers - Electrophoresis - Colorimeter & Photometer - Auto analyzer - Blood flow meter - Cardiac output - Respiratory measurement - Blood pressure measurement - Temperature measurement - Pulse measurement - Blood cell counters: Coulter counters.

UNIT - III THERAPEUTIC EQUIPMENTS

Cardiac pacemakers - DC defibrillator - Dialyzers - Surgical diathermy - Physiotherapy and electrotherapy equipment - Oxygenators - Heart lung machine.

UNIT - IV MEDICAL IMAGING [09]

X-Ray - Computer Axial Tomography - Positron Emission Tomography - MRI and NMR - Ultrasonic Imaging systems.

UNIT - V RECENT TRENDS IN MEDICAL INSTRUMENTATION - [09]

Thermograph - Endoscopy unit - LASER in medicine - Biomedical telemetry - Radio-pill - Cardiac catheterization laboratory - Electrical safety of medical equipment.

UNIT -	- I INTRODUCTION	[09]

Nano science - Evolution - Electron microscopes - Scanning probe microscopes - Optical microscopes for nanotechnology - X ray diffraction - Associated techniques.

UNIT – II DIVERSITY IN NANO SYSTEMS

Fullerenes - Synthesis and purification - Mass spectrometry and ion/molecule reactions - Chemistry of fullerenes - Endohedral chemistry - Conductivity and super conductivity in doped fullerenes - Carbon nanotubes - Synthesis and purification - Electronic structure - Transport - Mechanical - Physical properties applications - Semiconductor quantumdots - Synthesis and applications.

UNIT – III METAL NANO PARTICLES AND NANO SHELLS [09]

Method of preparation - Characterization - Functions and applications - Core shell nanoparticles: Types of system - Characterization - Functions and applications - Nano shells: Types, characterization, properties and applications.

UNIT – IV EVOLVING INTERFACES IN NANO [09]

Nano biology - Interaction between bio molecules and nano particle surfaces - Applications of nano in biology - Microprobes for medical diagnosis and biotechnology - Current status - Nano sensors - Order from chaos - Applications - Smart dust sensors - Nano medicines various kinds - Future directions.

UNIT – V IMPACT OF NANO TECHNOLOGY ON SOCIETY [09]

Introduction - Industrial revolution to Nano revolution - Implications of Nano sciences and Nano technology on society - Issues - Nano policies and institutions - Nanotech and war - Nano arms race - Harnessing nano technology for economic and social development.

UNIT – I SEMICONDUCTORS AND RECTIFIERS

[09]

Classification of solids based on energy band theory - Intrinsic semiconductors - Extrinsic semiconductors - PN junction diode: Characteristics - Half wave and full wave rectifiers - Zener diode: Characteristics - Voltage regulator.

UNIT – II TRANSISTORS AND AMPLIFIERS

[09]

Bipolar junction transistor: Construction and characteristics - CE configuration and characteristics - Transistor biasing: Fixed and voltage divider biasing - Construction and characteristics: FET, SCR and UJT - Concept of feedback: Negative feedback - Application in temperature and motor speed control - Common Emitter Amplifier (Qualitative treatment only).

UNIT – III DIGITAL ELECTRONICS

[09]

Number system: Binary, Octal, Hexadecimal - Boolean algebra - Logic gates - Half adder and full adder - Flip flops - Shift Registers: SISO, SIPO, PISO, PIPO - Counters: 3-bit Synchronous up & down, 3-bit Asynchronous up & down - A/D conversion: Single slope, Successive approximation - D/A conversion: Binary weighted resistor type.

UNIT – IV 8085 MICROPROCESSOR

[09]

Block diagram of Microcomputer – 8085: Architecture, Pin configuration, Addressing modes, Instruction set and Simple programs using arithmetic and logical operations.

UNIT – V INTERFACING AND APPLICATIONS OF MICROPROCESSOR

[09]

Basic interfacing concepts - Interfacing of Input and Output devices - Applications of microprocessor: Temperature control, Stepper motor control, Traffic light control - Case study: Mining problem, Turbine monitor using 8085.

UNIT – I ANALOG COMMUNICATION

[09]

Noise: Source of Noise – External Noise- Internal Noise- Noise Calculation. Introduction to Communication Systems: Modulation – Types – Need for Modulation. Theory of Amplitude Modulation – Evolution and Description of SSB Techniques – Theory of Frequency and Phase Modulation – Comparison of various Analog Communication System (AM – FM – PM).

UNIT – II DIGITAL COMMUNICATION

[09]

Amplitude Shift Keying (ASK) – Frequency Shift Keying (FSK) Minimum Shift Keying (MSK) –Phase Shift Keying (PSK) – BPSK – QPSK – 8 PSK – 16 PSK – Quadrature Amplitude Modulation (QAM) – 8 QAM – 16 QAM – Bandwidth Efficiency–Comparison of various Digital Communication System (ASK – FSK – PSK – QAM).

UNIT – III DATA AND PULSE COMMUNICATION

[09]

Data Communication: History of Data Communication – Standards Organizations for Data Communication- Data Communication Circuits – Data Communication Codes – Error Detection and Correction Techniques – Data communication Hardware – serial and parallel interfaces. Pulse Communication: Pulse Amplitude Modulation (PAM) – Pulse Time Modulation (PTM) – Pulse code Modulation (PCM) – Comparison of various Pulse Communication System (PAM – PTM – PCM).

UNIT – IV SOURCE AND ERROR CONTROL CODING

[09]

Entropy, Source encoding theorem, Shannon fano coding, Huffman coding, mutual information, channel capacity, channel coding theorem, Error Control Coding, linear block codes, cyclic codes, convolution codes, viterbi decoding algorithm.

UNIT – V MULTI-USER RADIO COMMUNICATION

[09]

Advanced Mobile Phone System (AMPS) – Global System for Mobile Communications (GSM) – Code division multiple access (CDMA) – Cellular Concept and Frequency Reuse – Channel Assignment and Hand – Overview of Multiple Access Schemes – Satellite Communication – Bluetooth.

K S D COLLEGE OF ENGINEEDING (Autonomous)

UNIT – I AMPLITUDE MODULATION

[09]

D 2020

Introduction, Amplitude Modulation: Time & Frequency – Domain description, switching modulator, Envelop detector. Time and Frequency – Domain description, Ring modulator, Coherent detection, Costas Receiver, Quadrature Carrier Multiplexing. SSB Modulation, VSB Modulation, Frequency Translation, Frequency- Division Multiplexing, Theme Example: VSB Transmission of Analog and Digital Television.

UNIT – II ANGLE MODULATION

[09]

Basic definitions, Frequency Modulation: Narrow Band FM, Wide Band FM, Transmission bandwidth of FM Signals, Generation of FM Signals, Demodulation of FM Signals, FM Stereo Multiplexing, Phase–Locked Loop: Nonlinear model of PLL, Linear model of PLL, Nonlinear Effects in FM Systems. The Superheterodyne Receiver

UNIT - III RANDOM VARIABLES & PROCESS

[09]

Introduction, Probability, Conditional Probability, Random variables, Several Random Variables. Statistical Averages: Function of a random variable, Moments, Random Processes, Mean, Correlation and Covariance function: Properties of autocorrelation function. Cross—correlation functions

UNIT – IV NOISE IN ANALOG MODULATION

[09]

Shot Noise, Thermal noise, White Noise, Noise Equivalent Bandwidth (refer Chapter 5 of Text), Noise Figure. Introduction, Receiver Model, Noise in DSB-SC receivers, Noise in AM receivers, Threshold effect, Noise in FM receivers, Capture effect, FM threshold effect, FM threshold reduction, Pre-emphasis and De-emphasis in FM.

UNIT – V DIGITAL REPRESENTATION OF ANALOG SIGNALS

[09]

Introduction, Why Digitize Analog Sources?, The Sampling process, Pulse Amplitude Modulation, Time Division Multiplexing, Pulse-Position Modulation, Generation of PPM Waves, Detection of PPM Waves, The Quantization Process, Quantization Noise, Pulse-Code Modulation: Sampling, Quantization, Encoding, Regeneration, Decoding, Filtering, Multiplexing.

2000900	(Open Elective)	3	0	0	3

Prerequisite:

Cours	se Outcomes: On completion of this course, the students will be able to	Cognitive Level
CO1	Describe the basis of Robotics	Understand
CO2	Describe the technologies applicable for Robotics in computer based vision	Understand
CO3	Interpret the different sensing elements of robot	Understand
CO4	Develop the algorithms applicable for robotics	Apply
CO5	Develop 4-axis and 6-axis robot	Apply

UNIT – I INTRODUCTION TO ROBOTICS

[09]

Motion - Potential function - Road maps - Cell decomposition sensor and sensor planning - Kinematics - Forward and inverse kinematics - Transformation matrix and DH transformation - Geometric methods and algebraic methods.

UNIT – II COMPUTER VISION

[09]

Projection - Optics, projection on the Image plane and radiometry - Image processing - Connectivity - Images - Gray Scale and binary images - Blob filling - Histogram - Convolution - Digital convolution and filtering and Masking techniques - Edge detection - Face detection.

UNIT - III SENSORS AND SENSING DEVICES

[09]

Introduction to various types of sensor - Resistive sensors - Range sensors - Radar and Infra-red - Introduction to sensing - Light sensing - Heat sensing - Touch sensing and position sensing.

UNIT – IV ARTIFICIAL INTELLIGENCE

[09]

Uniform Search strategies - Breadth first, Depth first, Depth limited - Iterative and deepening depth first search and bidirectional search - The A* algorithm - Planning - State-space planning - Plan - space planning - Graph plan/Sat plan and their comparison - Multi-agent planning 1 and Multi-agent planning 2 - Probabilistic reasoning

UNIT – V INTEGARATION TO ROBOT

[09]

Building of 4 axis or 6 axis robot - Vision system for pattern detection - Sensors for obstacle detection - Al algorithms for path finding - Decision making.

CO1	Describe what IoT is and how it works today.	Understand
CO2	Design and program IoT devices.	Understand
CO3	Describe the functions and characteristics of IoT sensors.	Understand
CO4	Illustrate the wireless, energy, power, RF and sensing modules.	Understand
CO5	Describe the applications and technological challenges faced by IoT devices.	Understand

UNIT – I BASICS OF IOT [09]

Definitions and Functional Requirements – Motivation – Architecture - Web 3.0 View of IoT – Ubiquitous IoT Applications – Four Pillars of IoT – DNA of IoT - The Toolkit Approach for End-user Participation in the Internet of Things. Middleware for IoT: Overview – Communication middleware for IoT – IoT Information Security

Protocol Standardization for IoT – Efforts – M2M and WSN Protocols – SCADA and RFID Protocols – Issues with IoT Standardization – Unified Data Standards – Protocols – IEEE 802.15.4 – BAC Net Protocol – Modbus – KNX – Zigbee Architecture – Network layer – APS layer – Security

Industrial sensors – Description & Characteristics – First Generation – Description & Characteristics – Advanced Generation – Description & Characteristics – Integrated IoT Sensors – Description & Characteristics – Polytronics Systems – Description & Characteristics – Sensors' Swarm – Description & Characteristics – Printed Electronics – Description & Characteristics – IoT Generation Roadmap.

UNIT- IV TECHNOLOGICAL ANALYSIS [09]

Wireless Sensor Structure - Energy Storage Module - Power Management Module - RF Module - Sensing Module

The Role of the Internet of Things for Increased Autonomy and Agility in Collaborative Production Environments - Resource Management in the Internet of Things: Clustering, Synchronization and Software Agents. Applications - Smart Grid – Electrical Vehicle Charging

LIMIT	CONCUMED ELECTRONICS EUNDAMENTALS	1001

UNIT – I CONSUMER ELECTRONICS FUNDAMENTALS

[09]

History of Electronic Devices - Vacuum Tubes, Transistors, Integrated Circuits - Moore's Law, Semiconductor Devices, Diodes, Rectifiers, Transistors, Logic Gates, Combinational Circuits, ADC, DAC and Microprocessors, Microprocessor Vs Microcontrollers, Microcontrollers in consumer electronics, Energy management, Intelligent Building Perspective.

UNIT – II ENTERTAINMENT ELECTRONICS

[09]

Audio systems: Construction and working principle of: Microphone, Loud speaker, AM and FM receiver, stereo, 2.1 home theatres, 5.1 home theatres, Display systems: CRT, LCD, LED and Graphics display Video Players: DVD and Blue RAY. Recording Systems: Digital Cameras and Camcorders.

Technology involved in Smart home, Home Virtual Assistants- Alexa and Google Home. Home Security Systems - Intruder Detection, Automated blinds, Motion Sensors, Thermal Sensors and Image Sensors, PIR, IR and Water Level Sensors.

UNIT-IV HOME APPLIANCES

[09]

Home Enablement Systems: RFID Home, Lighting control, Automatic Cleaning Robots, Washing Machines, Kitchen Electronics-Microwave, Dishwasher, Induction Stoves, Smart Refrigerators, Smart alarms, Smart toilet, Smart floor, Smart locks.

UNIT - V COMMUNICATION SYSTEMS

[09]

Cordless Telephones, Fax Machines, PDAs - Tablets, Smart Phones and Smart Watches, Introduction to Smart OS - Android and iOS. Video Conferencing Systems - Web/IP Camera, Video security, Internet Enabled Systems, Wi-Fi, IoT, Li-Fi, GPS and Tracking Systems.

Total = 45 Periods

CO1:	Explain the life cycle of data science.	Understand
CO2:	Interpret the data manipulation statements and functional programming in R.	Understand
CO3:	Outline the packages to implement machine learning techniques.	Understand
CO4:	Explore the concepts of object-oriented programming in R.	Understand
CO5:	Discuss the data visualization packages in R.	Understand

UNIT – I DATA SCIENCE [09]

Data Science: Data Science Lifecycle – Dealing with Missing Values – Using R Packages – Expression – Data Types – Control Structures – Functions – Recursive Functions – Simple Programs.

UNIT – II DATA MANIPULATION AND FUNCTIONAL PROGRAMMING

[09]

Data Manipulation – Data Import and Export – Manipulation Data – Vectoring Functions – Infix Operator – Replacement Functions – Function with arguments and return statement.

UNIT – III MACHINE LEARNING

[09]

Dealing with large Dataset – Sampling – Supervised Learning Methods: Linear Regression – Logistic Regression – Evaluating and Validating Models – Decision Trees – Neural Network – Support Vector Machine – Unsupervised Learning – Clustering – Association Rule Mining.

UNIT - IV CLASS AND OBJECTS

[09]

Immutable objects and Polymorphic functions – Data structures – Classes – Programming with New Classes – Inheritance and Inter-Class Relations – Virtual Classes – Creating and Validating Objects.

UNIT - V DATA VISUALIZATION AND PACKAGES

[09]

Data Visualization: XY Plot – Graphics Package – ggplot2 – Package concept and tools – Creating R package – Namespace – R Oxygen – Adding data to Package – Documentation for Packages.

Total (L= 45, T = 0) = 45 Periods

Text Book:

CO3:	Summarize the latest trends in ethical hacking.	Understand
CO4:	Discuss the fundamentals of computer forensics and evidence collection.	Understand
CO5:	Describe the vulnerabilities in cyber security.	Remember

UNIT – I CYBER CRIME [09]

Cyber Crime – Types of Cyber Crime – Classification of Cyber Criminals – Tools used in Cyber Crime – Challenges – Strategies – Crypto Currency – Bitcoin and Block chain – Ransomware.

UNIT – II CYBER FORENSICS

[09]

Cyber Forensics: Definition – Disk Forensics – Network Forensics – Wireless Forensics – Database Forensics – Malware Forensics – Mobile Forensics – Email Forensics.

UNIT - III ETHICAL HACKING

[09]

Ethical Hacking – Hacking Windows – Network Hacking – Web Hacking – Password Hacking – Malware – Scanning – Cracking.

UNIT – IV DIGITAL EVIDENCE IN CRIMINAL INVESTIGATIONS

[09]

Digital Evidence in Criminal Investigations: The Analog and Digital World – Training and Education – Evidence Collection and Data Seizure: Collection Options Obstacles – Types of Evidence –Rules of Evidence –Volatile Evidence.

UNIT - V CYBER SECURITY VULNERABILITIES

[09]

Vulnerabilities in software – System administration – Complex Network Architectures – Open Access to Organizational Data — Unprotected Broadband communications – Poor Cyber Security Awareness – Encryption Tool: KeePass.

UNIT - II SOFTWARE TESTING REQUIREMENTS

[09]

Software Testing Requirements – Analyzing the requirements – Functional and Non-Functional Requirements. Software Testing Review Process – Types of Reviews: Peer Review – Walkthrough – Inspection – Checklists of Review Process.

UNIT - III WHITE AND BLACK BOX TESTING

[09]

White Box Testing Techniques: Decision/Branch Coverage – Basic Path Testing – Control Flow Graph Coverage – Conditional Coverage .Black Box Test Techniques: Boundary Value Analysis – Equivalent Class Partition – Cause-Effect Analysis – State Transition Table.

UNIT - IV TESTING TECHNIQUES

[09]

Functional Testing: Smoke Testing – Integration and System Testing User Acceptance Testing – Non-Functional Testing: – Performance Testing – Recovery Testing – Security Testing – Compatibility Testing – Usability Testing – Ad Hoc Testing.

UNIT - V TEST CASE DESIGN

[09]

Test Case :Standards, Characteristics, Guidelines and Naming Conventions – Test Case Templates – Creation of Test Case – Requirement Coverage – Traceability Matrix – Test Case Review Process – Test Execution – Test Log – Reporting of Test Execution

Total (L= 45, T = 0) = 45 Periods

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Summarize the various approaches in problem solving.	Understand
CO2:	Discuss the different algorithm design techniques.	Remember
CO3:	Demonstrate the various array based problem.	Understand
CO4:	Summarize the concept of sorting and searching.	Understand
CO5:	Outline the various methods to solve number based problem.	Understand

UNIT – I PROBLEM SOLVING PROCESS

[09]

Problem Solving Process – Approaches in Problem Solving: System Centric– Problem Centric– Solution Centric and Solver Centric Approach – Algorithm – Pseudocode – Flowchart– Important Problem Types.

UNIT - II ALGORTHMIC PROBLEM SOLVING

[09]

Notion of the Algorithm – Algorithm Design and Analysis Process – Time and Space Complexity – Algorithm Design Techniques: Divide and Conquer – Dynamic Programming – Greedy Technique – Backtracking.

UNIT - III ARRAY BASED PROBLMES

[09]

Array Order Reversal – Array Counting – Removal duplicates – Finding the kth smallest element – Swapping of elements – Subarray with given Sum – Find the longest consecutive subsequence.

UNIT - IV SORTING AND SEARCHING

[09]

Searching: Linear Search – Binary Search. Sorting: Bubble Sort – Selection Sort – Insertion Sort – Merge Sort – Quicksort – Heap Sort.

UNIT - V NUMBER BASED PROBLEMS

[09]

Swapping the values – Summation of Set of Number – Fibonacci Sequence and Factorial Computation –Integer Reversal – Euclid's algorithm – Prime Numbers Generation.

CO3:	Discuss the concept of cloud architecture.	Understand
CO4:	Infer the knowledge on cloud simulators.	Understand
CO5:	Outline the usage of simulators like VMWare simulator.	Understand
UNIT – I	CLOUD COMPUTING	[09]

Origins of Cloud Computing – Cloud Components – Essential Characteristics – Broad Network Access – Location Independent Resource Pooling – Rapid Elasticity – Measured Service – Roots of Cloud Computing.

UNIT – II CLOUD INSIGHTS [09]

Architectural Influences – High-Performance Computing – Utility and Enterprise Grid Computing – Cloud Scenarios – Benefits – Application Development – Security level of Third Party – Security Benefits – Regularity Issues.

UNIT – III CLOUD ARCHITECTURE

[09]

Layers in Cloud Architecture – Software as a Service – Features of SaaS and benefits – Platform as a Services – Features of PaaS and benefits – Infrastructure as a Service – Features of laaSand benefits – Cloud Service Providers – Challenges and risks in cloud adoption –Types of Cloud.

UNIT – IV CLOUD SIMULATORS

[09]

CloudSim Simulator - Architecture - User code - CloudSim - GridSim - SimJava - Working platform for CloudSim - GreenCloud.

UNIT-V VMWARE SIMULATOR

[09]

VMWare– Advantages of VMWare virtualization–VMWare workstation–Virtual Machines – Create a new virtual machine on local host – Cloning virtual machine – Recent Trends.

CO1:	Outline the need and importance of Linux Open Source Software.	Understand
CO2:	Discuss the manipulations on Array and String using PHP.	Remember
CO3:	Summarize various functions in String and Date object	Understand
CO4:	Describe simple code segment using list and tuple in Python.	Understand
CO5:	Outline the usage of decision and looping statements in PERL.	Remember

UNIT – I LINUX [09]

Open Sources: Need, Advantages and Applications – Open Source Operating Systems: LINUX – Kernel Mode and – Process – Scheduling – Personalities – Cloning and Signals.

UNIT – II PHP [09]

PHP :Syntax of PHP –Common PHP Script Elements –Variables and Constants – Data types – Operators and Statements –Arrays and Functions –String Manipulations– Regular Expression.

Setting up an account – Starting, Terminating and writing your own MySQL Programs – Record Selection Technology – Strings – Date and Time – Sorting Query Results module – DDL – DDL – DDL – TDL.

Syntax and Style – Python Objects – Numbers – Sequences – Strings – Lists and Tuples – Dictionaries – Decision and Loops – Files – Input and Output Statements – Errors and Exceptions – Functions.

Perl : Perl Parsing Rules – Variables and Data – Statements and Control Structures – Subroutines – Packages and Modules – Files and Data Manipulation.

CO5:	Discuss the process involved in verification and validation.	Understand
UNIT - I	SYSTEMS ENGINEERING	[09]

Professional and Ethical Responsibility - Systems Engineering – Legacy Systems – Critical System – Software Process Models – Process Iteration – The Rational Unified Process – Project Planning – Project Scheduling.

UNIT - II REQUIREMENTS ANALYSIS

[09]

Software Requirements: Functional and Non-Functional Requirements - User Requirements - System Requirements - Requirements Validation - Requirements Management - System Models: Context Models, Behavioral Models, Data Models, Object Models, Structured Methods- Risk-Driven Specification, Safety Specification.

UNIT - III ARCHITECTURAL DESIGN

[09]

Architectural Design Decisions – System Organization – Multiprocessor Architectures – Client – Server Architectures – Data Processing Systems – Objects and Object Classes – Real–Time Operating Systems – Monitoring and Control Systems – User Interface Design: Issue, Process, Analysis.

UNIT - IV CRITICAL SYSTEMS

[09]

Agile Methods – Rapid Application Development – Software Prototyping – Components and Component Models – Fault Tolerance – Fault-Tolerance Architectures – Software Maintenance – Evolution Processes – Legacy System Evolution .

UNIT - V VERIFICATION AND VALIDATION

[09]

Planning Verification and Validation – Software Inspections – Verification and Formal Methods – Systems Testing – Component Testing – Test Case Design – Test Automation – Safety Assurance – Security Assessment.

Total (L= 45, T = 0) = 45 Periods

CO3:	Describe the knowledge of power plants and pumps.	Understand
CO4:	Interpret the basic concepts of IC Engines.	Understand
CO5:	Analyze the Refrigeration and air conditioning systems	Analyze
UNIT - I	FUNDAMENTALS	[09]

Introduction to mechanical engineering, concepts of thermal engineering, mechanical machine design, industrial engineering, and manufacturing technology.

UNIT - II MANUFACTURING TECHNOLOGY [09]

Manufacturing, classification, lathe, drilling machines, milling machines, metal joining, metal forming, casting, forging, and introduction to powder metallurgy.

UNIT - III POWER PLANT ENGINEERING

Introduction, Classification of Power Plants – Working principle of steam, Gas, Diesel, Hydro-electric and Nuclear Power plants – Merits and Demerits – Pumps and turbines – working principle of Reciprocating pumps (single acting and double acting) – Centrifugal Pump.

Internal combustion engines as automobile power plant – Working principle of Petrol and Diesel Engines – Four stroke and two stroke cycles – Comparison of four stroke and two stroke engines.

UNIT - V REFRIGERATION AND AIR CONDITIONING SYSTEM [09]

Terminology of Refrigeration and Air Conditioning. Principle of vapour compression and absorption system–Layout of typical domestic refrigerator–Window and Split type room Air condition.

Prerequisite:

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Explore the measurement of solar radiation and their application to various systems.	Understand
CO2:	Illustrate the principles of non-concentrating collectors and apply the principles in various real time applications.	Apply
CO3:	Describe the concept of concentrating collectors and their application to a wide range of systems.	Apply
CO4:	Analyze the various material characteristics of solar cell and determine maximum efficiency of solar cells.	Analyze
CO5:	Demonstrate the solar storage equipment and evaluate the economic analysis of various solar equipment.	Understand

UNIT - I INTRODUCTION TO SOLAR ENERGY

[09]

Introduction - Sun-Earth relationships- solar constant- solar radiation at the earth surface- depletion of solar radiation-measurement of solar radiation- solar radiation data- solar time- solar radiation geometry- solar radiation on tilted surfaces-Sun as the source of energy sun angles - overview of applications.

UNIT - II NON CONCENTRATING COLLECTORS

[09]

Types and classification of solar collectors - terminology related to flat plate collectors - evacuated collectors-Heat transfer processes and efficiency of a solar collector -solar drying- solar desalination- solar mechanical cooling- solar desiccant cooling- detailed study on heat pump – it needed.

UNIT - III CONCENTRATING COLLECTORS

f 09 1

Tracking systems - compound parabolic concentrators - parabolic trough concentrators - concentrators with point focus - Heliostats- comparison of various designs - central receiver systems - parabolic trough systems - solar performance analysis - solar power plant - solar furnace.

UNIT - IV SOLAR PHOTOVOLTAIC

[09]

Fundamentals of solar cells- - types of solar cell- P-N junction photodiode- description and principle of working of a solar cell- cell structure- solar module and panel- I-V characteristics of a PV module- maximum power point- cell efficiency- fill factor- Manufacturing of solar cell.

UNIT - V SOLAR ENERGY STORAGE AND ECONOMIC ANALYSIS

[09]

Storage of solar energy - thermal storage-sensible and latent heat storage-Economic Analysis: Initial and annual costs-definition of economic terms for a solar system- present worth calculation-repayment of loan in equal annual installments-annual savings- cumulative savings and life cycle savings- payback period- clean development mechanism -solar vehicle -BIPV(Building Integrated photo voltaic) - house hold appliances.

UNIT –	ENGINEERING MATERIALS			[09]	
Enginee	ring materials - their classification - Mechanical properties of materials, strength, elasticity	, plas	sticity,	stiffn	ess,	

Engineering materials - their classification - Mechanical properties of materials, strength, elasticity, plasticity, stiffness, malleability, ductility, brittleness, toughness, hardness, resilience, machinability, formability, weldability. Steels and cast irons: Carbon steels, their classification based on percentage of carbon as low, mild, medium & high carbon steel, their properties & applications. Wrought iron, cast iron. Alloy steels: Stainless steel, tool steel.

UNIT - II MACHINING [09]

Basic principles of lathe - machine and operations performed on it. Basic description of machines and operations of Shaper-Planner, Drilling, Milling & Grinding.

UNIT - III WELDING [09]

Introduction, classification of welding processes. Gas welding, types of flames and their applications. Electric Arc welding. Resistance welding, Soldering & Brazing processes and their uses.

UNIT - IV ADVANCED MANUFACTURING PROCESS [09]

Abrasive flow machining - abrasive jet machining - water jet machining - Electro Discharge Machining (EDM) - Wire cut EDM - Electro Chemical Machining (ECM) - Ultrasonic Machining (USM / USD) - Electron Beam Machining (EBM) - Laser Beam Machining (LBM).

UNIT - V CNC MACHINE [09]

Numerical control (NC) machine tools - CNC: types, constitutional details, special features – design considerations of CNC machines for improving machining accuracy - structural members – slide ways - linear bearings - ball screws - spindle drives and feed drives. Part programming fundamentals - manual programming.

Prerequisite:

Course	Cognitive Level	
CO1:	Explore the classification and properties of engineering materials	Understand
CO2:	Acquire the knowledge on mechanical properties of various metal alloys.	Understand
CO3:	Identify different types of availability materials.	Analyze
CO4:	Examine required materials for engineering applications.	Analyze
CO5:	Select suitable material for various applications	Evaluate

UNIT - I ENGINEERING MATERIALS

[09]

Introduction – classification of engineering materials – selection of materials for engineering purposes –selection of materials and shape –classification metal and alloys, polymers, ceramics and glasses, composites, natural materials, nonmetallic materials - smart materials - physical, metrical properties of metals.

UNIT - II MATERIAL PROPERTIES

09

Mechanical properties – fatigue strength – fracture Toughness - Thermal Properties - Magnetic Properties - Fabrication Properties – electrical , optical properties - Environmental Properties , Corrosion properties – shape and size - Material Cost and Availability – failure analysis.

UNIT - III MANUFACTURING PROCESSING AND ECONOMIC ANALYSIS

[09

Interaction of Materials Selection, Design, and Manufacturing Processes - Production Processes and Equipment for Metals - Metal Forming, Shaping, and Casting - Plastic Parts Processing - Composites Fabrication Processes - Advanced Ceramics Processing - surface treatment - Resource -The Price and Availability of Materials.

JNIT - IV MATERIALS SELECTION CHARTS AND TESTING

[09

Ashby material selection charts-Testing of Metallic Materials - Plastics Testing - Characterization and Identification of Plastics - Professional and Testing Organizations - Ceramics Testing - Nondestructive Inspection.

UNIT - V APPLICATIONS AND USES

[09]

Selection of Materials for Biomedical Applications - Medical Products - Materials in Electronic Packaging - Advanced Materials in Sports Equipment - Materials Selection for Wear Resistance - Advanced Materials in Telecommunications - Using Composites - Manufacture and Assembly with Plastics, fiber and Diamond Films.

Total (L= 45, T = 0) = 45 Periods

Prerequisite:

Course	Cognitive Level	
CO1:	Explore the various types of marine vehicles and its applications	Understand
CO2:	Acquire marine vehicle Safety, Operations and controls of bunkering.	Understand
CO3:	Demonstrate remotely operable vehicle design, construction and its components.	Apply
CO4:	Analyze submersible and autonomous under water vehicles.	Analyze
CO5:	Design and operational consideration of manned and un manned submersible.	Create

UNIT - I MARINE VEHICLES [09]

Types – general – by function – commercial marine vehicles- passenger ship, cargo ships, oil and chemical tankers, cattle carriers, harbor crafts, off shore platform, container ships.

UNIT - II REEFERS AND GAS CARRIERS [09]

.Introduction – Types, design considerations, safety – operation and controls, precaution during bunkering.

UNIT - III REMOTELY OPERABLE VEHICLE (ROV), UMS SHIPS

[09]

Remotely Operable Vehicles (ROV) – The ROV business – Design theory and standards – control and simulation – design and stability – components of ROV – applications, UMS operation, and controls.

UNIT - IV SUBMERSIBLES AND AUTONOMOUS UNDERWATER VEHICLE (AUV)

[09]

submersibles types – applications, AUV – Design and construction considerations – components – sensors – Navigation - control strategies – applications.

UNIT - V MANNED AND UN MANNED SUBMERSIBLE

[09]

Introduction – Design and operational consideration – pressure hull exo-structure – ballasting and trim – maneuvering and control – Life support and habitability – emergency devices and equipment's – certification and classification, towed vehicles – gliders – crawler – Design and construction.

Total (L= 45, T = 0) = 45 Periods

Prerequisite:

20ME908

Course Outcomes: On successful completion of the course, the student will be able to Cognitive Level Understand Select various materials for designing composite structures. CO2: Apply knowledge of fracture mechanics of composites during designing of composite Apply structures. CO3: Analyze critically damping capacity of composite materials. Analyze Correlate various manufacturing/fabricating techniques for composite structures based on CO4: Analyze CO5: Explore various composite applications. Understand

UNIT - I INTRODUCTION [09]

Definition, Reason for composites, Classifications of composites, Thermosets - Epoxy; Unsaturated polyester resin; vinyl ester, polyimides etc.,-preparation, properties, and uses.

UNIT - II REINFORCEMENTS [09]

Types, Properties, chemistry and applications of fillers such as silica, titanium oxide, talc, mica etc., Manufacturing process, Properties, structure and uses of Glass fiber -. Carbon, Aramid, Boron, jute, sisal, cotton.

UNIT - III FABRICATIONS OF THERMOSET COMPOSITES [09]

Hand layup method, compression and transfer moulding, pressure and vacuum bag process, filament winding, protrusion, reinforced RIM, Injection moulding, of thermosets, SMC and DMC, Advantages and disadvantages of each method.

UNIT - IV TESTING OF COMPOSITES [09]

Destructive and non-destructive tests; Destructive-tensile, compression, flexural, impact strength, Hardness–Fatigue-toughness HDT ,basic concepts of fracture mechanisms.

UNIT - V APPLICATIONS OF COMPOSITES [09]

Aerospace, land transport, marine, structural, chemical plants and corrosion resistant products and energy applications sports, electrical, electronic and communication applications.

20ME909	LEAN MANUFACTURING	L	Τ	Р	С
ZUIVIESUS	(Open Elective)	3	0	0	3

Prerequisite:

Course	Outcomes : On successful completion of the course, the student will be able to	Cognitive Level
CO1:	Demonstrate the lean manufacturing principles to find and eliminate wastes.	Understand
CO2:	Identify the lean manufacturing tools and their potential applications.	Understand
CO3:	Summarize the usage of visual management, TPM and lean practices.	Apply
CO4:	Acquire the technology drivers of lean manufacturing.	Understand
CO5:	Describe technology drivers of lean manufacturing.	Analyze

UNIT - I LEAN MANUFACTURING PRINCIPLES

[09]

Lean manufacturing paradigms - lean manufacturing - origin - Toyota Production System - types of wastes -tools and techniques to eliminate wastes - value stream mapping (VSM) - primary icons - secondary icons - developing the VSM.

UNIT - II LEAN MANUFACTURING TOOLS

[09

5S concepts - stages of 5S and waste elimination - Kaizen - steps of Kaizen - lean manufacturing through Kaizen - Single Minute Exchange of Die - theory of SMED - design for SMED - strategic SMED and waste elimination - pull production through Kanban - one piece flow production.

UNIT - III VISUAL MANAGEMENT, TPM AND LEAN IMPLEMENTATION

[09]

Visual management - tools for eliminating wastes - overproduction, inventory, delay, transportation, processing, unnecessary motion, defective parts, underutilization of people - implementation - total productive maintenance - implementation of lean practices.

UNIT - IV MANAGEMENT AND TECHNOLOGY DRIVERS OF LEAN MANUFACTURING [09]

Lean manufacturing - twenty criteria model - management driver - organizational structure - devolution of authority - employee status and involvement - nature of management - business and technical processes - time management - agility through technology driver.

UNIT - V MANUFACTURING STRATEGY AND COMPETITIVE DRIVERS OF LEAN [09]

Quick manufacturing setups - quick response - product life cycle management - product service elimination - automation - competitive driver - status of quality and productivity - compatible cost accounting system.

CO5:	Explore the corrosion behaviour of engineering materials	Understand
UNIT - I	WEAR	[09]

Introduction tribology, surface degradation, wear and corrosion, types of wear, roles of friction and lubrication- overview of different forms of corrosion, introduction to surface engineering, importance of substrate

UNIT - II COATING [09]

Chemical and electrochemical polishing, significance, specific examples, chemical conversion coatings, phosphating, chromating, chemical colouring, anodizing of aluminium alloys, thermochemical processes -industrial practices

UNIT - III SURFACE TREATMENT [09]

Surface pre-treatment, deposition of copper, zinc, nickel and chromium - principles and practices, alloy plating, electrocomposite plating, electroless plating of copper, nickel-phosphorous, nickel-boron; electroless composite plating; application areas, properties, test standards (ASTM) for assessment of quality deposits

UNIT - IV SURFACE TREATMENT TECHNIQUES [09]

Definitions and concepts, physical vapour deposition (PVD), evaporation, sputtering, ion plating, plasma nitriding, process capabilities, chemical vapour deposition (CVD), metal organic CVD, plasma assisted CVD, specific industrial applications

Thermal spraying, techniques, advanced spraying techniques - plasma surfacing, D-Gun and high velocity oxy-fuel processes, laser surface alloying and cladding, specific industrial applications, tests for assessment of wear and corrosion behaviour

Total (L= 45, T = 0) = 45 Periods

Prerequisite: No prerequisites are needed for enrolling into the course

Prerequ	isne: No prerequisites are needed for enrolling into the course	
Course	Outcomes: On successful completion of the course, the student will be able to	Cognitive Level
CO1	Compare the concept and spectrum of health functional units and activities of occupational health service.	Understand
CO2	Identify physical chemical and biological hazards in the work environment and its control measures.	Apply
CO3	Explain the principles of ventilation and its requirements.	Understand
CO4	Demonstrate about the lighting and its requirements.	Understand
CO5	Reduce the gas poisoning and its effects.	Apply
UNIT - I	OCCUPATIONAL HEALTH	[09]

Concept and spectrum of health - functional units and activities of occupational health services - occupational and work-related disease - Levels of prevention of diseases - notifiable occupational diseases such as silicosis, asbestosis, pneumoconiosis, siderosis, anthracosis, aluminosis and anthrax.

UNIT - II VIBRATION [09]

Recognition, evaluation and control of physical hazards. Vibration - Description and measurement of vibration. Vibration control methods. Effects of whole-body vibration on human body and control measures - Noise - noise measurement, evaluation, noise control methods - hearing loss - causes - Biological effects of noise exposure.

UNIT - III VENTILATION [09]

Ventilation systems - Purpose of ventilation - General principles ventilation requirements. Physiological and comfort level. Natural ventilation - Dilution ventilation - Mechanical ventilation - Local exhaust ventilation - Ventilation measuring instruments. Fundamentals of hood and duct designs. Standards on ventilation.

UNIT - IV LIGHTING [09]

Purpose of lighting - Advantages of good illumination - Lighting and the work - Sources and kinds of artificial lighting principles of good illumination. Design of Lighting installation - Maintenance - Lighting and Color Standards on lighting and illuminations.

UNIT - V GAS POISONING [09]

Lead - Nickel, Chromium and Manganese toxicity - Gas poisoning (such as CO, ammonia, coal and dust) their effects and prevention - Local and systemic and chronic effects - Carcinogens, Mutagens, Teratogens. Personal monitoring devices - Medical support.

UNIT - I INTRODUCTION [09]

Safety aspects of construction planning- Human factors in construction safety management. Roles of various groups in ensuring safety in construction industry.

UNIT - II SAFETY IN VARIOUS CONSTRUCTION OPERATIONS

Excavation- underwater works- Ladders & Scaffolds - Tunneling- Blasting- Demolition- Pneumatic caissons- Confined Space-Temporary Structures. Indian Standards on construction safety- National Building Code Provisions on construction safety.

UNIT - III SAFETY IN MATERIAL HANDLING EQUIPMENTS [09]

Storage & stacking of construction materials, Safety in the use of construction equipment's - Vehicles, Cranes, Tower Cranes, Lifting gears, Hoists & Lifts, Wire Ropes, Pulley blocks, Temporary power supply, Mixers, Conveyors, Pneumatic and hydraulic tools in construction.

UNIT - IV CONTRACT CONDITIONS ON SAFETY [09]

Health, Welfare, Social Security and Insurance. Application of ergonomics for construction safety.

UNIT - V CONTRACT LABOUR ACT AND CENTRAL RULES

Buildings and other Construction Workers (RE & CS) Act and Central Rules. Provisions regarding Licensing, safety, health, welfare and social security aspects only.

Total = 45 Periods

2085002	BUILDING FIRE SAFETY	L	T	Р	С
20SF903	(Open Elective)	3	0	0	3

Course	Outcomes: On successful completion of the course, the student will be able to	Cognitive Level
CO1	Explain the human behaviour under emergency movement and the concept of planning and design of seating arrangements in assembly buildings, evacuation routes and exits.	Understand
CO2	Outline the general life safety requirements applicable to all buildings and to plan, design and locate exits in buildings.	Understand
CO3	Illustrate the fire and life safety requirements for buildings of specific occupancy.	Understand
CO4	Choose and distribute portable and fixed firefighting systems in buildings of different occupancies as per BIS.	Apply
CO5	Develop the method of carrying out fire investigation, arson identification, fire training, fire safety audit and fire risk assessment.	Apply

UNIT - I BASIC BUILDING PLANNING AND DESIGN

[09]

Process of emergency evacuation - special features of personnel movement. Parameter characteristics of the movement of people; Stages of evacuation; Planning and design of evacuation routes and exits; planning of seating arrangements in large assembly buildings.

UNIT - II NBC CODES FOR BUILDINGS

[09]

Classification of buildings based on occupancy and type of construction according to fire resistance as per NBC; Fire zone; General fire safety requirements applicable to all individual occupancies. General exit requirements as per NBC; Internal staircases; horizontal exits; fire tower; ramps; fire lifts; external fire escape ladders; Planning of location and calculation of capacity, number and width of exit as per NBC for different occupancy classification.

UNIT - III FIRE PREVENTION AND BIS STANDARD

[09]

Fire and life safety requirements in different groups of buildings-Hotel, Schools & Colleges, Hospitals, Theatres, shopping malls, etc., Fire protection and prevention in high rise buildings - Fire protection in underground structures and in buildings under construction. Sitting of detectors as per relevant Indian standard specifications; Selection and planning of alarm system as per relevant standards (BIS).

UNIT - IV FIRE PREVENTION AND BIS STANDARD

[09]

Selection and distribution of portable extinguishers (for class A and B fires) and other fire protection equipment and systems for different occupancy classification as per NBC; Planning of fixed fire fighting installation for different occupancy classification-sprinkler system; total flooding system; CO2 system; foam system; Fire Investigation; Detection of arson; Fire training and education - fire drill, fire order; Fire safety audits; Fire risk assessment.

UNIT - V FIRE SAFETY AND CODES

[09]

Causes of fire in buildings. Stages of fire and how it spreads. Fire drill. Heat / fire / smoke detection. Alarm and extinguisher systems. Fire safety standards. General guidelines for egress design for multi-storey buildings. Understanding all the above through product literature/ field visits. Exercise on design of fire safety systems for different building types through choice, calculations, layout and drawings.

Total = 45 Periods

CO3	Recall human safety aspects over electric and magnetic fields.	Remember
CO4	Compare various protective equipment and enumerate their working and application.	Understand
CO5	Identify hazardous areas/locations in a given industrial site for selection, installation, operation and maintenance of electrical equipment.	Apply

UNIT - I INTRODUCTIONTO ELECTRICAL EQUIPMENTS

[09]

Transformers, DC Machines, Alternators, Induction Machines- Characteristics, application Protection Relays: Requirements of relay- types of protection, Classification: Distance Relay, Differential Relay, Static Relay- Definitions and types.

UNIT - II CIRCUIT BREAKERS

[09]

Function switch gear, Arc Phenomenon- Initialization of an Arc, Arc interruption, Recovery voltage, and Restriking voltage classification and working, Working of MCB and ELCB. Faults in Power System: Causes and types, Fuses: Definition, types of fuses, selection of fuses, advantages and disadvantages.

UNIT - III EFFECT OF ELECTRIC FIELD AND MAGNETIC FIELD

[09]

Human Safety Aspects, Effect of Current and Voltage on Human being- distance from the source, Typical V-I characteristics of skin - Nervous System, Electrical Shocks and their prevention, Insulation: Classes of Insulation, FRLS insulation, Continuity test.

UNIT - IV SAFETY DURING INSTALLATION OF PLANT AND EQUIPMENT

rnaı

Safe sequences in installation -Risk during installation, Safety during testing and commissioning- steps, Test on relays- Protection and interlock system on safety.

UNIT - V HAZARDOUS ZONES

[09]

Classification of hazardous zones. Intrinsically safe and explosion proof electrical apparatus, Selection of equipment in hazardous area. Electrical Fires: Hazards of static electricity, Safety procedures in electrical maintenance, Statutory requirements from Electrical Inspectorate. Introduction to Indian Electricity Act and Rules.

Total = 45 Periods

K.S.R. COLLEGE OF ENGINEERING (Autonomous) LEGAL ASPECTS OF SAFETY L T P C (Open Elective) 3 0 0 3

Prerequisite: No prerequisites are needed for enrolling into the course

Course	Outcomes: On successful completion of the course, the student will be able to	Cognitive Level
CO1	Describe about the factories act and rules.	Understand
CO2	Illustrate the legal obligations regarding any injury by gaining knowledge of Workmen's Compensation Act. ESI Act & Rules.	Understand
CO3	Outline about the legal aspects granting of license for storage, transportation and usage of explosive substance as applicable as per Petroleum Act and Explosive Act.	Understand
CO4	Explain the Environment (Protection) act and Rules.	Understand
CO5	Choose the concept, powers and functions of Central, State and Joint Boards, provisions regarding prevention and control of Water & Air pollution, Penalties, Central & State Laboratories.	Apply

UNIT - I FACTORIES ACT

20SF905

[09]

Factories Act- Definitions, Preliminary, inspecting staff, Health, Safety, Provisions relating to hazardous processes, Welfare, Working hours of adults, Employment of young persons, Special provisions - Definitions, Powers of inspectors, Power of Govt. to direct inquiry. Duties of Safety Officers, Reporting of accidents, Emergency Action Plan, Safety Committee.

UNIT - II WORKMEN'S COMPENSATION ACT

[09]

Workmen's Compensation Act: Definitions, Employer's liability for compensation, Calculation of amount of compensation. ESI Act and Rules: Applicability, Definitions and Benefits. Public Liability Insurance Act and Rules- Definitions, Calculation of amount of relief, Environmental Relief Fund, Advisory Committee, Powers of District Collector, Extent of Liability, Contribution to Relief Fund.

UNIT - III EXPLOSIVES ACT

[09]

Explosives Act: Definitions, Categories of Explosives, General Safety Provisions, and Use of Explosives, Grant of license, Notice of Accidents, Inquiry into ordinary and more serious accidents. Extension of definition to other explosive substances. Explosives Rules, SMPV Rules and Gas Cylinder Rules (in brief). Petroleum Act with important rules - definitions, safety in the import, transport, storage, license, exemption, notice of accidents.

UNIT - IV ENVIRONMENT (PROTECTION) ACT

[09

Water Act and Air Act: Definitions, powers and functions of Boards, prevention and control of pollution, consent administration. Environment (Protection) Act and Rules-Definitions, powers of central government, power of giving directions, authorities. MSIHC Rules- Definitions, Duties of Authorities, Notification of major accidents, Safety Reports, Safety Audit, On- site &Off-site emergency plans.

UNIT - V POWER TO MAKE RULES

[09]

Powers and Functions of Central, State and Joint Boards, Provisions regarding prevention and control of water pollution, Penalties, Central & State Water Laboratories, Power to make rules, Power of supersession and overriding effect. Rules on Consent for Establishment.

Total = 45 Periods

SAFETY IN INDUSTRIES	L	T	Ρ	С
(Onen Flective)	3	Λ	Λ	3

Prerequisite: No prerequisites are needed for enrolling into the course

Course	Outcomes: On Completion of this course, the student will be able to	Cognitive Level
CO1	Explain the General safety rules, principles, maintenance, Inspections in Foundry Operations.	Understand
CO2	Apply the concepts of safety in design of building fire safety.	Apply
CO3	Develop the safety in industrial operations.	Apply
CO4	Recall about welding, common hazards in welding, personal protective equipment and safety precautions in welding.	Remember
CO5	Illustrate on safety in finishing, inspection and testing of machines.	Understand

UNIT - I FOUNDRY OPERATIONS SAFETY

[09]

Foundry Operations - Furnace - health hazard - safe methods of operation. Forging operations heat radiation - maintenance of machines - final checking of tools, guards, lubrication, shop equipment and hand tools - safe work practice. Operations in hot and cold rolling mills. Shearing -bending - rolling - drawing - turning - boring - milling - planning - grinding. Selection and care of tools - health hazards and prevention.

UNIT - II BUILDING FIRE SAFETY

[09]

Building Fire Safety Objectives of fire safe building design, Fire load, fire resistant material and fire testing - structural fire protection - structural integrity - concept of exit design -exists width calculations -fire certificates - fire safety requirements for high rise buildings - snookers.

UNIT - III PERSONNEL RISK IN INDUSTRIAL OPERATIONS

[09]

Storages and Transportation General consideration, petroleum product storages, storage tanks and vessel-storages layout segregation, separating distance, secondary containment - venting and relief, atmospheric vent, pressure, vacuum valves, flame arrestors, fire relief - fire prevention and protection - LPG storages -underground storages-loading and unloading facilities-drum and cylinder storage ware house, storage hazard assessment of LPG and LNG Hazards during transportation –pipeline transport.

UNIT - IV WORKSHOP PROCESS SAFETY

[09]

Workshop Safety Hand tools and Power tools - Safety while using Grinding stone - Welding and gas cutting safety -Identification of Dangerous points - Lubrication Safety-Safety in Cold Forming and Hot Working of Metals.

UNIT - V SAFETY INSPECTION AND AUDIT

[09]

Safety Inspections Safety Audit- Safety Survey - Plant safety inspection - Safety tour - Safety samplings - What is safety budget - Direct cost - indirect cost - Safety Equipment's & their budget preparation.

Total = 45 Periods

FOOD SAFETY	L	T	Р	С
(Open Elective)	3	0	0	3

Course	Outcomes: On Completion of this course, the student will be able to	Cognitive Level
CO1	Apply the knowledge on food quality in food industry.	Apply
CO2	Identify the food additives and food contaminants and their chemical and toxicological properties.	Apply
CO3	Summarize the effects of pests on food and the various methods for controlling them.	Understand
CO4	Explain about the national and international regulations for biosafety.	Understand
CO5	Demonstrate an ability to recognize the environmental, social and ethical implications of biotech applications.	Understand

UNIT - I FOOD QUALITY

20SF907

[09]

Objective and importance of quality control, classification of quality attributes and its role in food quality, quality assessment of food materials (fruits, cereals, milk and meat), types of quality characteristics of food, methods used for determination of the quality in food industry, factors influencing the quality of food, sample and sampling methods of quality evaluation.

UNIT - II FOOD SANITATION

[09]

Factors contributing to physical, chemical and biological contamination in food chain, prevention and control of food borne hazards, definition and regulation of food sanitation, sources of contamination, personal hygiene-food handlers, cleaning compounds, sanitation methods and pest control, sanitation and safety in foodservices.

UNIT - III FOOD SAFETY

[09]

Principles of food safety and quality, quality assurance, Good Agricultural Practices (GAP), Good Manufacturing Practices (GMP), Good Hygienic Practices (GHP), Good Veterinary Practice (GVP), Applications of HACCP in food safety, Current challenges to food safety.

UNIT - IV FOOD LAWS AND REGULATIONS

[09]

Basic concepts of food standards, Role of national regulatory agencies: Food safety and StandardsAct: salient provision and prospects, FSSAI, PFA, certification- AGMARK, ISI (BIS). Role ofinternational regulatory agencies: USDA, FDA, BRC, WHO, FAO, Codex Alimentarius commission,WTO agreements: SPS and TBT agreements, ISO and its standards for food quality and safety.

UNIT - V FOOD SAFETY AUDITING

[09]

Food surveillance: International and national practices, procedure and protocols, food alerts,traceability and food product recall. Export and import of food in India: introduction, import and export policies, FDA import policy, export-import policy, export control systems. Import intelligence and alert systems, packaging and labelling, specifications and certifications.

Total = 45 Periods

Text Books:

- 1. Fleming & Hunt, Biological Safety, Principles and Practices, ASM Press, Fourth Edition, 2006.

0005000	SAFETY MANAGEMENT AND ITS PRINCIPLE	L	Τ	Р	С
20SF908	(Open Elective)	3	0	0	3

Cours	e Outcomes: On Completion of this course, the student will be able to	Cognitive Level
CO1	Demonstrate the knowledge and understanding of basic terms in safety management.	Understand
CO2	Compare safety organizational requirements for effective safety management.	Understand
CO3	Solve the workplace hazards and apply controls measures using hierarchy of control.	Apply
CO4	Develop the safety performance of an organization.	Apply
CO5	Explain accident investigation methodologies and apply systematic procedure to identify and unearth the root cause of the incident and accident.	Understand

UNIT - I INTRODUCTION OF SAFETY

[09]

Safety – Goals of safety engineering – Need for safety, Safety and productivity. Definitions: Accident, Injury, Unsafe act, Unsafe Condition, Dangerous Occurrence, Reportable accidents, History of safety movement – Theories of accident causation.

UNIT - II SAFETY ORGANIZATION

[09]

Objectives, Types, Functions, Role of management, Supervisors, Workmen, Unions, Government and voluntary agencies in safety – Safety policy – Safety Officer – Responsibilities – Safety committee – Need, Types, Advantages.

UNIT - III ACCIDENT PREVENTION AND TRAINING

[09]

Accident Prevention Methods – Engineering, Education and Enforcement, Safety Education & Training – Importance, Various training methods, Effectiveness of training, Behavior Oriented Training – Communication – Purpose, Barrier to communication. Housekeeping: Responsibility of management and employees – Advantages of good housekeeping – 5 's of housekeeping – Work permit system – objectives, hot work and cold work permits. Typical industrial models and methodology – Entry into confined spaces.

UNIT - IV MONITORING SAFETY PERFORMANCE

[09]

Frequency rate, Severity rate, Incidence rate, Activity rate – Cost of accidents – Computation of Costs – Utility of Cost data – Plant safety inspection types, Inspection procedure – Safety sampling techniques – Job safety Analysis (JSA), Safety surveys, Safety audits – Safety Inventory Technique.

UNIT - V INVESTIGATION ON ACCIDENTS

[09]

Why? When? Where? Who? & How? Basics – Man – Environment & Systems. Process of Investigation – Tools – Data Collection - Handling witnesses - Case study. Accident analysis – Analytical Techniques – System Safety – Change Analysis.

Total = 45 Periods

CO1	Explain about automobile engines, fuel systems and CMV rules for proto type testing and emission standards.	Understand
CO2	Demonstrate the electrical systems-ignition, lighting, horn, wipers, HVAC and concerned CMV rules	Understand
CO3	Classify the transmission systems - clutch, gearbox, steering, and differential. Chassis - springs, axles and brakes and corresponding CMV rules.	Understand
CO4	Outline the lubricating systems, cooling systems and miscellaneous systems. CMV rules for safety devices.	Understand
CO5	Choose passive and active safety.	Apply

UNIT - I INTRODUCTION AND EMISSION

[09]

Types of automobiles, Limiting Dimensions as per Central Motor Vehicles Rules, Engines - Classification, Construction, Materials of engine components. Prototype Testing as per Central Motor Vehicles Rules. Fuel System - Fuel tank, Fuel filter, Types of Fuel system. Carburettor - Simple and Modern, Fuel injection System. Emission Standards as per CMV Rules.

UNIT - II **ELECTRICITY STORAGE AND ITS UTILLIZATION**

Electrical System - Storage Battery Operations and Maintenance. Ignition System - Coil and Magneto Ignition System. Starting System, Lighting System, Horn System-Wind Shield Wiper Motors, Fans, Heaters, Trafficators. Automobile air conditioning. Central Motor Vehicles Rules regarding Lighting, Windshields, Wipers.

TRANSMISSION SYSTEM AND BRAKING SYSTEM UNIT - III

Transmission System - Clutches - operation and fault finding of clutches, Fluid Flywheel, Gear Box types, Steering Systems, Chassis Springs, and Suspension. Differential, Dead and Live axles, Rims, Tyre etc. Brakes - Types, construction and fault finding. CMV Rules-Brakes, Steering & Tyre.

LUBRICATION AND COOLING SYSTEM

Lubrication Systems-Types, Components, lubricating oil, Cooling system- Details of components, Study of Systems, Types. Miscellaneous - Special gadgets and accessories for fire fighting vehicles. Automobile accidents. CMV Rules regarding Safety devices for drivers, passengers.

UNIT - V **PASSIVE AND ACTIVE SAFETY**

Design of body for safety, deceleration of vehicle, passenger. Concept of crumble zone, SafetyCage. Optimum crash pulse. Barrier test - Crash tests - Antilock braking system, Stability Control. Adaptive cruise control, Lane Keep Assist System, Collision warning, avoidance system, Blind Spot Detection system, Driver alertness detection System. ADAS, DAT.

UNIT - I RAILWAY ENGINEERING

[09]

Introduction of Railway Engineering: Permanent way. Curves, super-elevation, negative super elevation, transition curve, grade compensation on curves. Railway operation and control - points and crossings turn-out. Signalling and interlocking. Centralized traffic control. Railway accidents & safety. Rapid transit railways - types, merits & demerits.

UNIT - II HIGHWAY ENGINEERING

[09]

Introduction of Highway Engineering: Classification of highways and urban road patterns. Typical cross section of roads. Factors controlling the alignment of roads. Basic geometric design - stopping and overtaking sight distances.

UNIT - III TRAFFFIC ENGINEERING

[09]

Introduction of Traffic Engineering: Traffic characteristics. Various traffic studies and their applications. Traffic signals. Carriage-way markings. Traffic islands. Highway intersections. Principles of highway lighting. Road Accidents prevention, investigation and reduction.

UNIT - IV HARBOUR AND DOCK ENGINEERING

[09]

Introduction of Harbour & Dock Engineering: Water transportation, classification of harbours, accessibility and size, ports, Indian ports. Layout of ports, breakwater, facilities (in brief) for docking, repair, approach, loading and unloading, storing and guiding.

UNIT - V AIR TRANSPORTATIONENGINEERING

[09]

Classification of air transportation, Types of air craft engines - Propellants-feeding systems – Ignition and combustion - Theory of rocket propulsion - Performance study - Staging - Terminal and characteristic velocity-Applications – spaceflights. Air way accidents & safety.

Analyze CO₂ Applying the concepts of Correlation and Regression analysis **Apply** CO3 Remember Testing the samples using method of hypothesis to obtain inferences. CO4 Develop their skills in Design of Experiments. Remember CO₅ Understand Solving Non Parametric data to obtain inferences.

UNIT- I DESCRIPTIVE STATISTICS

[09]

Introduction to Statistics, Measures of Central Tendency - Mean, Median, Mode, Weighted

Mean, Geometric Mean, Harmonic Mean, Measures of Variability- Range, Inter-Quartile Range, Variance, Standard Deviation, Coefficient of Variation.

UNIT – II CORRELATION AND REGRESSION ANLYSIS

[09]

Types of Correlation-Karl Pearson's Coefficient of Correlation- Spearman's Rank Correlation-Regression Analysis-Uses-Regression equations-X on Y and Y on X Estimation.

UNIT – III TESTING OF HYPOTHESIS

[09]

Large sample test based on Normal distribution for single mean and difference of means - Tests based on t - F distributions for testing means and variances-Chi-Square Test.

UNIT – IV DESIGN OF EXPERIMENTS

[09]

Analysis of variance - One-way and two-way classifications - Completely randomized design - Randomized block design - Latin square design.

UNIT – V NON PARAMETRIC TESTS

[09]

The Sign Test- Rank Sum Test- Mann-Whitney U Test, One Sample run Test-Spearman's Rank Correlation and Kruskal-Wallis Test (H-test).

Total (L: 45 T:0) = 45 Periods

COMBINATORICS AND GRAPH THEORY	L	T	Р	С
(Open Elective)	3	0	0	3

Prerequisite: No prerequisites are needed for enrolling into the course

Course	e Outcomes : On Completion of this course, the student will be able to	Cognitive Level
CO1	Interpret the concept of combinatorics Principles in Computer applications.	Understand
CO2	Acquire knowledge in Recurrences and Generating Functions.	Evaluate
CO3	Applying the concepts of graph theory	Apply
CO4	Constructing algorithm using Trees	Remember
CO5	Developing Skills in Colouring and Directed Graphs.	Analyze

UNIT-I COMBINATORICS [09]

The pigeon-hole principle - Basic counting problems- The binomial coefficients (the binomial theorem, algebraic vs. combinatorial proof, Pascal's identity, Pascal's triangle, Catalan numbers) - the principle of inclusion and exclusion.

UNIT – II RECURRENCES [09]

Fibonacci numbers - The substitution method- Linear recurrences (mostly homogenous recurrences, the characteristic polyr Generating functions.

UNIT – III INTRODUCTION TO GRAPH THEORY [09]

. Definition - examples - subgraphs - complements and graph isomorphism - Euler trail and circuits - planar graphs - Hamilton paths and cycles.

UNIT – IV TREES [09]

Definition - rooted trees - trees and sorting - weighted trees and prefix codes - bi connected components and Articulation points.

UNIT – V MATRICES, COLOURING AND DIRECTED GRAPH [09]

Chromatic number – Chromatic partitioning – Chromatic polynomial – Matching – Covering – Four color problem – Directed graphs – Types of directed graphs – Digraphs and binary relations – Directed paths and connectedness – Euler graphs.

UNIT - I LINEAR PROGRAMMING PROBLEM

[09]

Introduction - scope and role of OR - phases of OR - limitations of OR - linear programming problem - formulation of linear programming problem - optimum solution by graphical method - simplex method (using slack variables only).

UNIT - II TRANSPORTATION AND ASSIGNMENT PROBLEM

[09]

Transportation Models (Minimizing and Maximizing Cases) - Balanced and unbalanced cases - Initial Basic feasible solution by North West Corner Rule, Least cost and Vogel's approximation methods. Check for optimality by Modified method.

Assignment Models (Minimizing and Maximizing Cases) - Balanced and Unbalanced Cases - Solution by Hungarian method.

UNIT - III NETWORK MODELS

[09]

Network - Fulkerson's rule - construction of a network - critical path method (CPM) - optimistic, pessimistic and most likely time estimates - project scheduling by PERT analysis.

UNIT - IV INVENTORY MODEL

[09]

Types of Inventory - Deterministic inventory models - EOQ and EBQ models with and without shortages - Quantity discount model - Price breaks - probabilistic inventory model.

UNIT - V REPLACEMENT MODELS AND SEQUENCING

[09]

Replacement of items that deteriorate with time - value of money changing with time - not changing with time - optimum replacement policy - individual and group replacement. Sequencing problem - assumptions - processing of 'n' jobs in 2 machines, 'n' jobs with 'm' machines.

Prerequisite: Only NCC Cadets are eligible for opting into the course.

Course O	utcomes: On Completion of this course , the student will be able to	Cognitive level	
CO1	Develop the character, camaraderie of NCC cadets	Apply	
CO2	Inculcate the discipline and secular outlook.	Apply	
CO3	Educate weapon handling and training.	Understand	
CO4	Learn the quality of selfless service among the cadets by working as a team.	Remember	
CO5	Learn the basis of military management.	Understand	
	NOO ODGANIZATION O NATIONAL INTEGRATION		^^ 1

UNIT – I NCC ORGANIZATION & NATIONAL INTEGRATION

[09]

NCC Organization – History of NCC- NCC Organization- NCC Training- NCC Uniform – Promotion of NCC cadets – Aim and advantages of NCC Training- NCC badges of Rank- Honours and Awards – Incentives for NCC cadets by central and state govt. National Integration- Unity in diversity- contribution of youth in nation building- national integration council-Images and Slogans on National Integration.

UNIT - II BASIC PHYSICAL TRAINING & DRILL

[09]

Basic physical Training – various exercises for fitness (with Demonstration). Food – Hygiene and Cleanliness.

Drill- Words of commands- position and commands- sizing and forming- saluting- marching- turning on the march and wheeling- saluting on the march- side pace, pace forward and to the rear- marking time- Drill with arms- ceremonial drill-guard mounting.(WITH DEMONSTRATION)

UNIT - III WEAPON TRAINING

[09]

Main Parts of a Rifle- Characteristics of 5.56mm INSAS rifle- Characteristics of .22 rifle- loading and unloading – position and holding- safety precautions – range procedure- MPI and Elevation- Group and Snap shooting- Long/Short range firing(WITH PRACTICE SESSION) - Characteristics of 7.62mm SLR- LMG- carbine machine gun.

UNIT – IV SOCIAL AWARENESS AND COMMUNITY DEVELOPMENT

[09]

Aims of Social service-Various Means and ways of social services- family planning – HIV and AIDS- Cancer its causes and preventive measures- NGO and their activities- Drug trafficking- Rural development programmes - MGNREGA-SGSY-JGSY-NSAP-PMGSY-Terrorism and counter terrorism- Corruption – female feticide -dowry –child abuse-RTI Act- RTE Act-Protection of children from sexual offences act- civic sense and responsibility

UNIT - V SPECIALIZED SUBJECT (ARMY)

[09]

Basic structure of Armed Forces- Military History – War heroes- battles of Indo-Pak war- Param Vir Chakra- Career in the Defense forces- Service tests and interviews-Field craft and Battle craft-Basics of Map reading including practical.

CO4	Understanding about social evils and shall inculcate sense of whistle blowing against such evils and ways to eradicate such evils	3	2	1	1	3	3	3	3	3	3	ı	-	1	-
CO5	Acquaint, expose & provide knowledge about Army/Navy/ Air force and to acquire information about expansion of Armed Forces, service subjects and important battles.	3	2	1	1	3	3	3	3	3	3	-	-	-	-
	Average	3	2	1	1	3	3	3	3	3	3	-	-	-	-

	K.S.R. COLLEGE OF ENGINEERING (Autonomous)			R	2020
	PROFESSIONAL COMMUNICATION	L	T	Р	С
20SH905	(Open Elective)	1	0	2	3

Prerequisite:

Cours be ab	se Outcomes : On Successful Completion of the Course, the student will le to	Cognitive Level
CO1	Organize and compose resume' and SWOT analysis.	Understand
CO2	Prioritize the skills for interviews and job hunt.	Understand
CO3	Interpret by Listening and reading a text and comprehend it.	Understand
CO4	Identify the purpose of writing short messages and presentation.	Understand
CO5	Optimize the speaking skills to do well in Group Discussion.	Understand

UNIT – I SWOT Analysis and Resume' Writing

[09]

SWOT Analysis – Key SWOT Questions- Assessment of strength and weakness – Mind map and Activity – Job Application and Resume' – Types of Resume' – Common mistakes in Resume' writing – Cover Letter (Email).

UNIT – II Interview Skills [09]

Types of Interviews – Telephone Interview (HR and Technical) – Dos and Don'ts in telephone Interview – Video Interviews – Practice for successful interviews – Video Samples.

UNIT - III Listening and Reading

[09]

Listening – Listening and typing – Listening and sequencing of sentences – Filling in the blanks – Listening and answering questions.

Reading - Filling in the blanks - Cloze exercise - Vocabulary building - Reading and answering questions.

UNIT - IV Writing Short Messages and Presentation Skills

[09]

Writing Memos – Email writing - Business Email – Elements of effective presentation – Structure of presentation – Audience analysis – Body Language.

UNIT - V Group Discussion and Essay Writing

[09]

Introduction to Group Discussion – Structure of GD – Brainstorming the topic – Body Language – Mock GD – Five steps to writing an essay – writing short essays.

Total = 45 Periods

Text Books:

- Ravindran, Padma, English for Work, Ebek Language Laboratories Private Limited, Trichy, First Edition, 2011
- 2 Kalpana V, Communication Skills Laboratory Manual, Vijay Nicole Imprints Private Limited, Chennai, First Edition, 2013

- Norman Whitby, Business Benchmark: Pre-Intermediate to Intermediate –BEC Preliminary, Cambridge University Press, New Delhi, First Edition, 2008.
- 2 Meenakshi Raman and Sangeeta Sharma, Technical Communication English for Engineers, Oxford University Press, New Delhi, 2008.
- Rizvi Ashraf M, Effective Technical Communication, Mc GrawHill, New Delhi, 28th Reprint, 2015.
- 4 Department of English, English for Technologies and Engineers, Orient Black Swan, Hyderabad, First Edition, 2016.

Prerequisite: NIL

1 101094	NOTO THE	
Course O	utcomes: On Completion of this course , the student will be able to	Cognitive level
CO1	Learn the basics of nanotechnology in physics, chemistry and biology	Remember
CO2	Recognize the methods of preparation of nanomaterials	Analyze
CO3	Relate the characterization techniques for confirming nanomaterials	Apply
CO4	Categorize the nanomaterials and its preparation	Analyze
CO5	Identify the area of application and its field	Understand
UNIT – I	INTRODUCTION	1 00 1

Classifications of nanostructured materials - nano particles - quantum dots, nanowires-ultra-thin films multilayered materials. Length Scales involved and effect on properties: Mechanical, Electronic, Optical, Magnetic and Thermal properties.

UNIT - II GENERAL METHODS OF PREPARATION

[09]

Bottom-up Synthesis-Top-down Approach: Co-Precipitation, Ultrasonication, Mechanical Milling, Colloidal routes, Self-assembly, Vapor phase deposition, MOCVD, Sputtering, Evaporation, Molecular Beam Epitaxy, Atomic Layer Epitaxy, MOMBE.

UNIT – III NANOMATERIALS

[09

Nanoforms of Carbon – Buckminster fullerene- graphene and carbon nanotube, Single wall carbon Nanotubes (SWCNT) and Multi wall carbon nanotubes (MWCNT)- methods of synthesis (arc-growth, laser ablation, CVD routes, Plasma CVD), structure-properties. Applications- Nanometal oxides-ZnO, TiO2, MgO, ZrO2, NiO, nano alumina, CaO, AgTiO2, Ferrites, Nano clays- functionalization and applications-Quantum wires, Quantum dots-preparation, properties and applications.

UNIT - IV CHARACTERIZATION TECHNIQUES

09

X-ray diffraction technique, Scanning Electron Microscopy – experimental techniques, Transmission Electron Microscopy including high-resolution imaging, Surface Analysis techniques- AFM, STM, ESCA-Nanoindentation.

Nano InfoTech: Information storage- nano computer, molecular switch, super chip, nanocrystal, Nano biotechnology: nanoprobes in medical diagnostics and biotechnology, Nano medicines, Targeted drug delivery, Bioimaging – Micro Electro Mechanical Systems (NEMS)- Nano sensors, nano crystalline silver for bacterial inhibition, Nanoparticles for sun barrier products – In Photostat, printing, solar cell, battery.
